Fashion Now

Just how much time and thought do you usually give to the selection and preparation of your Christmas gifts? It is a matter of consideration for you to do you just go down and buy a number of things and then sort them out when you get home?

Your gift is an expression of you to those to whom the gift is made. It either shows a great deal of time and thought expended or it expresses the idea of doing something to get it over with.

Each selection should be made with the person in mind who is to receive it and, as far as possible, something suitable to them. This does not necessarily mean an ultra-practical gift but something that the recipient can enjoy using.

Numbers of people in these days are doing without little things that would add much to their joy in living. These things are not luxuries but because many have had to economize greatly, they have had to be eliminated.

Nothing thrills the average feminine heart more than something to enhance her charm and what an unending list one could mention—silk stockings, pretty handkerchiefs, colorful necklaces, bracelets and the like, gloves and so on.
