COUNTY AGENT W. D. SMITH'S column

"CONTROLLING A WANDERING SOIL."... tried but to the practical minded person Nature's method of a vegetative cover seems most economical and most permanent. So my suggestion is "Plant trees—give those Wandering Soils the binding influence of tree roots, and put them to sleep under a Marston of leaf litter."

W. D. SMITH, County Agent. NOTICE TO THE FARMERS... Through a mistake made in the Raleigh and Washington offices some of the 1934 tobacco marketing cards and tax payment warrants, (Forms T-122 and T-123) have been mailed to the producer when they should have been sent to the county agent's office.

A Timely Warning! I have just had turned over to me all taxes—both current and delinquent, with orders to COLLECT. And according to the law on the case, I must obey orders, which means that we must levy on all personal property. We are now making this levy throughout the county, working from township to township. Your township may be next. Our time is limited, therefore we are obliged to make these collections AT ONCE. As you know we have no choice in the matter, and the above procedure of collecting applies to all taxes. It will save us embarrassment, and will save you time, trouble and expense if you will come to the office and pay rather than have us look you up with garnishee papers and levy. This is a straight-forward and sincere warning, and we hope you will make the most of it. D. A. HOWELL Tax Supervisor and Collector
