

Along The Skyline with the Rambler

Noticed in passing: Trees coming down in front of the Garrett funeral home. . . And that vacant Pure Oil station has become a parking lot. . . Big things and plenty of excitement at the wedding last Saturday night for and it rained. . . Two trucks filled with C. C. boys. . . all with dudded bags. . . moving out. . . That ratted phonograph noise emanating from one of the stores down town on Saturdays. . . Leaves blowing all over the place Monday. . . Never saw so many women wearing sweaters. . . all in different colors. . . Surprising how many people drink from the public fountains scattered over town. . . In number of numerous requests to the driver that bus driver still leaves early with the cut-out wide open. . . Little school boy with his head swathed in bandages. . . a playground accident. . . Henry Francis, a hard worker. . . New windows in the group. . . Nassau. . . Never can tell what Rose is going to have on that night. . . keeps 'em guessing. . . That new "Quick Lunch" room half way down the hill below the bank. . . Dr. J. P. Gay sorter swings from side to side as he walks along.

There was an awful racket in the post-office the other day. A girl had stooped to pick up a letter that she had dropped beneath the writing tables. . . Concluding up she made an error in judgment and cracked her head on the sharp edge. . . If it hurt like it sounded she still has a headache. My sympathy.

In spite of the fact that it had to be the time of the biggest wedding in the town in some time, I don't think it was ever more welcome in Waynesville than it was Saturday night. . . It was Sunday night a night for sleep.

The high school team looked better last Friday against the Farm School. They played heads-up ball. That intercepted pass which gave Waynesville its second touchdown was unique. Never saw one just like that before. The Farm School had one little hard driving back who was plenty fast on the uptake. I'd love to have seen him get away one time. Just curiosity, you know.

Wonder if anybody else is getting tired of those pictures of visitors, featured by one of the Western North Carolina papers?

Two churches have been busier than usual lately. The Baptist people are pushing that Sunday School addition right along and the Methodist folks have been busy winding up their yearly finances in preparation for the Annual Conference in Salisbury this week. According to all reports they're both doing well.

Wonder just exactly what there is about scandal that makes it such a delectable morsel for a conversation at meal? At any rate we'd all be healthier if we'd cut it out of our diet.

diet. Good opportunity for church people—to be instrumental in making up another menu.

As it is I don't know whether they all get home or not but if an officer were stationed in a certain section south of town on Saturday afternoons and the officer did his duty I know a lot of fellows wouldn't get home—at least until they had paid "and costs."

Pretty good book length novel in the back of this month's issue of the Red Book magazine.

Four bears nearly ran over Claude Revere the other day—what did you say it was, Claude?

Questions —and— Answers

1. Who was Huey Long's assassin?
2. What is the capital of Louisiana?
3. What is the term used to describe the radio by which the actor or speaker may be seen during the program?
4. What is the difference between a cyclone and a hurricane?
5. In the alphabetical government set up what is the meaning of WPA?
6. What is the name of the man who made a reputation for his ability to bring back to this country many wild animals from the jungles for use in circuses and zoos?
7. What is the name of the man who with his wife has taken many moving pictures of wild animals at liberty in the jungles?
8. What is the name of the Secretary of Agriculture?
9. What is the term used in Congress to define the method used to prevent the passage of a bill when a speaker holds the floor for long periods?
10. What is the name of the automobile driver who recently attained a speed of 301.33 miles an hour in an automobile on the salt flats near Bonneville, Utah.

- ANSWERS**
1. Dr. Carl A. Weiss.
 2. Baton Rouge.
 3. Television.
 4. In a cyclone the wind moves in a violent circulating movement at the same time the storm center moves forward. In a hurricane the wind blows with high velocity in but one direction.
 5. Works Progress Administration.
 6. Frank Buck.
 7. Martin Johnson.
 8. Henry A. Wallace.
 9. Filibuster.
 10. Sir Malcolm Campbell.

PIE SUPPER

There will be a pie supper at the Ratcliff Cove school house Friday night, Oct. 25, 7:30 o'clock. Benefit of Methodist church. Everybody invited to come.

Local Team Beat Farm School, 14-0

Mountaineers Journey To Asheville School Saturday Afternoon For Contest

By W. Thos. Reeves.

Tearing the Aggies line to pieces for three quarters the much-improved team of Coach Weatherby's added another brilliant victory to their record as they defeated the eleven of Farm School here Friday 14-0.

Early in the first period Co-Captain Cecil Yount returned a punt from his 40 yard line to the Farm School 45. The Mountaineers' line opened holes permitting the backs to make three successive first downs to place the ball on the visitor's 13 yard mark. er. Bill Swift, offensive star for game, raced on a beautiful dash for twelve yards around his left end to score the first touchdown standing up. Yount drove the line for the extra point. Waynesville 7; Farm School 0.

In the second period the Mountaineers threatened twice, reaching the eighteen yard line on drives by Summerrow and Yount. All backs made nice runs to place the ball in scoring position another time but recovered fumbles by Farm School checked any further score. The half ended soon after Patton, star left-end of the visitors, sent a fifty-five yard punt toward the enemy's goal.

In the third period Farm School had the edge. Crawford punted to Waynesville one yard line where the ball was downed by Barnwell. Sease placed the local eleven back in the game by making a spectacular interception of a Farm School pass.

On the first play of the last quarter Doug Moore kicked to Farm School.

School. On the next play the Aggies were penalized fifteen yards for pushing. Then Patton kicked to Moore who placed the ball on Farm School's forty. Here Bill Swift made the most thrilling run as well as the longest gain of the day. He went through left tackle and cut back for twenty-five yards. In two downs Reeves added a first. Yount made four and Garrett Reeves dashed through the line for a score but the ball was returned and Waynesville penalized fifteen yards for holding. A pass failed and the ball went to Farm School. But the Mountaineers were due to score. Gibson's attempted pass was blocked and intercepted by Gibson, Waynesville tackle, who ran five yards to score in the last few minutes of the game. Reeves added the final point as he drove over tackle. Waynesville 14; Farm School 0.

Playing the best ball of the season the Mountaineers' line looked like a new outfit from the boys playing in other home games this season. They all played heads-up ball. Byrd, Gibson, Bryson and Sease appeared to stand out from the others. In the backfield Bill Swift was the offensive star of the day. The blocking of the entire team was much improved. Garrett Reeves was the defensive player who stopped the driving backs of the Aggies. The playing of Patton and Barnwell was with the best seen here this season. They were Farm School's outstanding stars.

Line-up and summary:

Waynesville	Pos.	Farm School
Sease	LE	Patton
Bryson	TE	Greene
Sawyer	LG	Walters
Byrd	C	Barnwell
Schultz	RG	Patterson
Richards	RF	Mears
Yount	RE	Hall
Yount	QB	Crawford
Summerrow	LB	Creamer
Swift	RB	Lanfear
Reeves	FB	Eller

Legumes Produce Much Nitrogen

Legumes are natural nitrogen factories—but their production may be increased with the use of phosphorus and potash, points out County Agent W. D. Smith.

Many farmers grow legumes as green manure crops because they collect nitrogen from the air and put it into the soil. Applications of phosphorus and potash to legumes stimulate their growth enabling them to produce more nitrogen than if they did not receive these fertilizer materials. These are not wasted as they are available for the next crop as corn or cotton when the legumes are plowed under and decay.

By this method the farmer gains the first down, Waynesville, 9; Farm School 6. Penalties, Waynesville 50; Farm School 25. Officials, Heiman, Stretcher, Swearingen.

Waynesville will journey to Asheville Saturday afternoon to play Asheville School.

KILLS SONS AND SELF

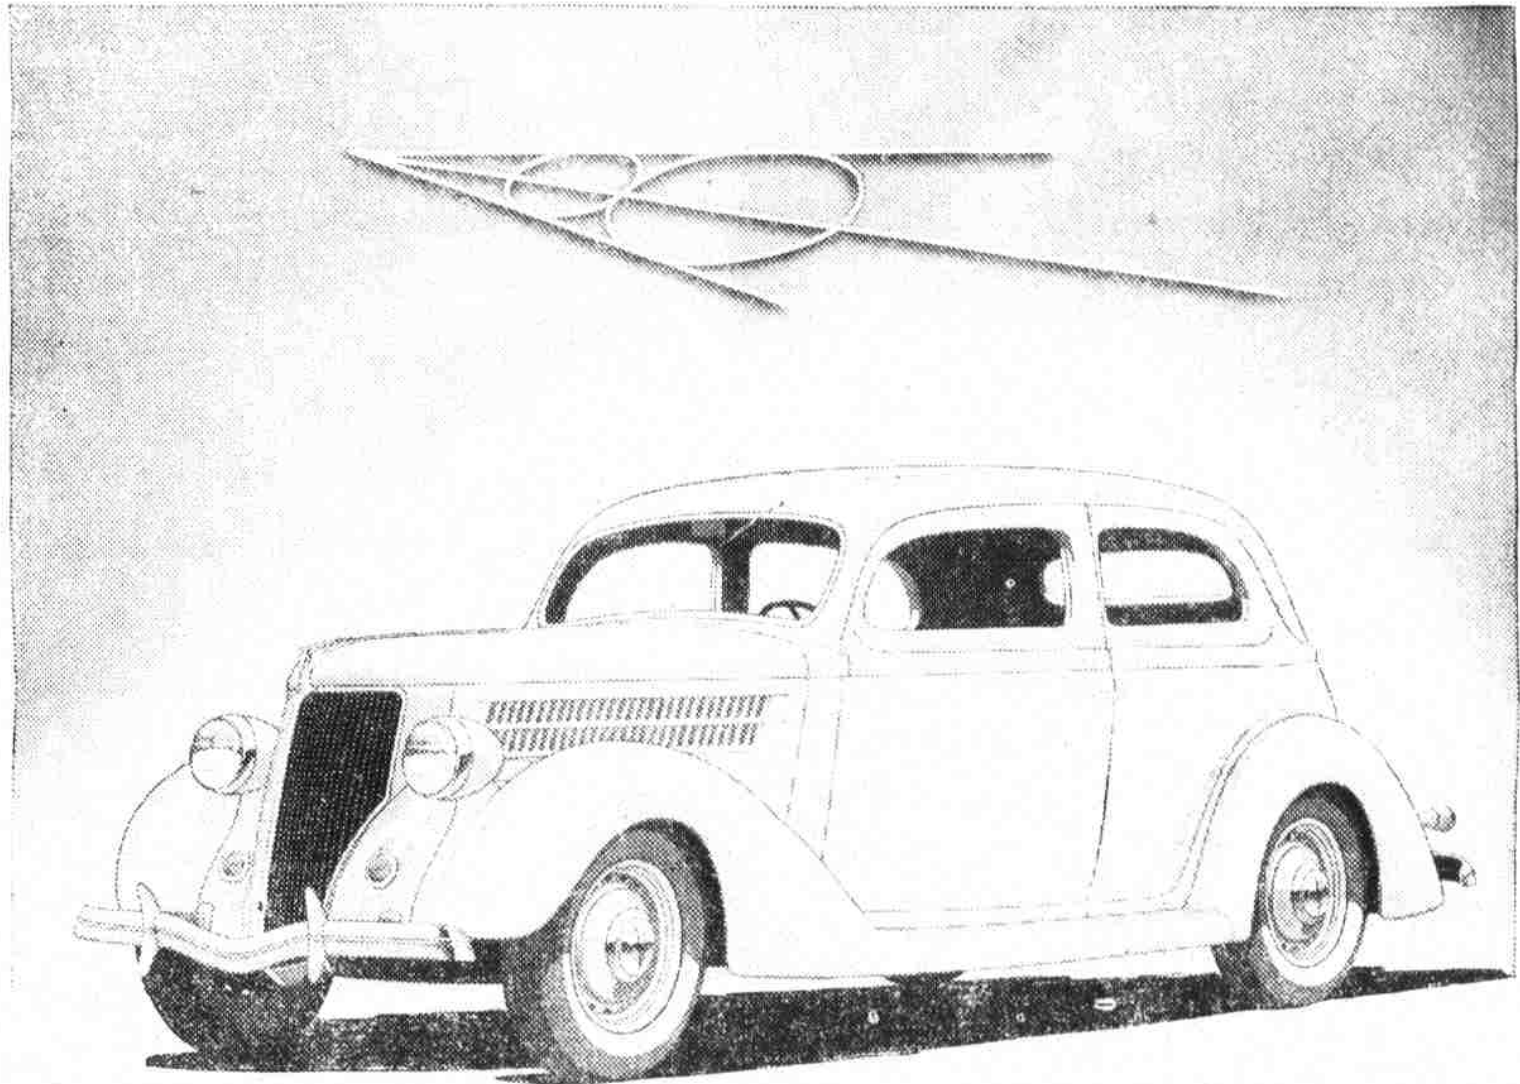

Harvey Dail, 40, tenant farmer near Kinston, killed his five-weeks-old son by catching the child by the legs swinging its head against the hearth, and then committed suicide. He shot himself in the heart.

use of three fertilizer materials for other crops although he applied only two.

Phosphorus and potash applied to legumes when grown as a green manure crop help to produce heavier yields of corn and other crops than if the same fertilizer is applied directly to the crops, tests show.

THE NEW FORD V-8 FOR 1936

Why do we say The New Ford V-8 for 1936?

What is new about it?

Of course, the newest engine in the low-price car field is still the V-8 engine. Since Ford made it available to all car users (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the newest engine on the market, and remains the newest for 1936.

You may buy a car on minor "talking points"—some specially advertised feature "with the car thrown in"—but, after all, it is the engine you buy when you buy a car. Hence we put the engine first.

Other new points about the car make a long list.

Its lines are much more beautiful. The hood is longer and sweeps forward over the distinctive new radiator grille, giving the car a length and grace that are instantly impressive. The fenders are larger, with a wide flare. Horns are concealed behind circular grilles beneath the headlamps. New steel wheels.

Ford upholstery—always of sterling quality and excellent taste—is rich and enduring. The appointments of the car have a new touch of refinement. There

is no question about the increased beauty of the Ford V-8 for 1936.

In more practical matters, many improvements have been made—

Steering is made easier by a new steering gear ratio. The cooling system circulates 5½ gallons of water through a new, larger radiator. Natural thermosiphon action is assisted by two centrifugal water pumps. New style hood louvers permit a rapid air-flow around the engine.

Easier, quieter shifting of Ford gears—

The gear shift lever now travels a shorter distance.

The two qualities you want in brakes— Brakes that stop the car with ease and certainty. Ford Super-Safety Brakes of the long-tested, fool-proof, mechanical design.

Safety—as always— in the electrically welded genuine steel body. Safety Glass all around at no extra cost. Hundreds have written grateful letters because this glass has protected the safety of their families.

A car you can drive without strain all day, if you like, in city or country. Steady, holds the road, responds to the

driver's touch like a well-trained horse. You don't have to "push" or "fight" the Ford V-8—driver and car easily get on terms of good understanding with each other.

An engine has much to do with the roominess of a car. Very much indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by passengers.

It really is a great car in every way, this 1936 Ford V-8—the finest, safest, most dependable Ford car ever built. Now on display by Ford dealers.

LOW FORD V-8 PRICES

THIRTEEN BODY TYPES—Coupe (5 windows), \$510. Tudor Sedan, \$520. Fordor Sedan, \$580. DE LUXE—Roadster (with rumble seat), \$560. Coupe (3 windows), \$570. Coupe (5 windows), \$555. Phaeton, \$590.
