Little Ferry's Famous Four t's Flourish

Frances, Frank, Felix and Ferdinand with nurses
 The four famous "F's" of Little Ferry, N. J., Frances, Frank, Felix and Ferdinand Kasper, shown top with their nurses, quadruplets born to Mrs. Elizabeth Kasper, were reported flourishing on a diet of whiskey and sugared water following the stork's arrival. Mrs. Elizabeth Kasper, wife of a \$20-a-week railroad worker, has already given birth to two children, one of whom, Ellen, is shown kissing her mother, below.

Comic Opera Will Be Given Aug. 15th.

"H. M. S. Pinafore," by Gilbert and Sullivan, will be given at Lake Junaluska on August 15th under the direction of Evander Preston. This popular comic opera will be presented by the Waynesville Choral Club, assisted by members of the New College Community and Lake Junaluska.

The Waynesville Choral Club has made two appearances since its organization last fall, which were considered to be among the outstanding musical programs ever presented in this section. The first was a candle light service and was given at the Baptist church, and the second was "Strainer's Crucifixion," given during Holy Week at the Presbyterian church.

The principal parts are well cast as follows: The Right Honorable Sir Joseph Porter, K. C. B., Admiral, Lester Potrat; Captain Corcoran, Walter Herbert, of Atlanta; Ralph Rackstraw, George Allen; Dick Peabody, Frank Do'an Drea, New College; Bobstay, Edwin Potrat; Bob Beckett, Dr. Paul Lambert, New College; Josephine, Virginia Martin; Hebe, Margaret Walker; Mrs. Cripps (little buttercup) Marguerite Spurlock.

 Anthony Redmond, Trustee, to Metropolitan Realty Company.
 C. S. Bradley to William F. Strange.

26-Inch Trout Caught Saturday In Cataloochee

What is believed to be the largest trout ever caught from a Haywood stream, was landed Saturday morning by Fred Ferguson, of Clyde. The trout weighed five pounds dressed, and measured 26-inches long. The weight was about 6 1/2 pounds when caught.

The trout was caught by Mr. Ferguson in Cataloochee, in about two feet of water near a rock just above Jarvis Palmer's at what is known to fishermen on the creek as Wildcat Bend.
 Many fishermen believe that they have hooked this trout in the past, but none were able to land him. It was estimated that the fish was at least eight years old.

A peculiar incident in landing the trout was that the fish was snagged by the hook and did not swallow it.

The hook caught the fish in the lower side, and held firm in a fin.

The fish was landed in about two minutes, and quickly gave up the battle because of the shallow water. Mr. Ferguson saw the fish some time before he hooked it. Just before catching the big one, Mr. Ferguson landed a half dozen about nine inches long.

Numerous fishermen here, after seeing the prize catch, remarked that they had often caught the same fish, but "he always got away."

3 FROM HAYWOOD AT U.N.C. SUMMER SCHOOL.

S. J. Strangfield, Colbie Garner and Corna Mae Moore, all of Waynesville, were among the students from Haywood county enrolled in the first term of the University of North Carolina summer school at Chapel Hill which closed this week. Over 1,000 were enrolled at the school, which was a gain of 15 per cent over the first term last year.

1,351 People Are Given Tubercular Examination Here

The District Health department conducted a clinic for the examination of suspected cases of tuberculosis, largely referred by physicians, for the period of June 22nd to July 10th, inclusive. The examinations were made by Dr. H. L. Seay, a specialist from the State Tuberculosis Sanatorium. The examination consisted of a fluoroscopic examination of all applicants, with a complete chest examination of selected cases. A total of 1,351 individuals were examined by Dr. Seay, among which number it was found that 78 were infected with childhood type of tuberculosis, and 36 with the adult type. These were new cases not having formerly been diagnosed. Also, 56 individuals that had previously been diagnosed as having tuberculosis were examined. In addition 3 individuals were designated as probably having tuberculosis, and 11 doubtful cases were found. A total of 1,044 were free from any indication of having the disease.

In Haywood county 377 individuals were examined, among which 23 new cases of childhood type, and 10 new cases of adult type tuberculosis were found. Also, 27 individuals who had previously been diagnosed as having tuberculosis were examined. One case was declared to be doubtful, and 297 were found to be free of tuberculosis. Seven of the positive cases were advised to take sanatorium treatment, 30 were advised to take home treatment, and 18 were advised to have X-ray pictures made.

The successful handling of tuberculosis depends almost entirely upon an early diagnosis. The health department expects to have a clinic of this nature annually, and by so doing assist the physicians in confirming their diagnosis at a stage of the disease when much can be accomplished in its treatment.

Eskimos Skillful With Whips

Eskimos of the Labrador coast are so skillful with their dog whips that they can snap the head of a dozing ptarmigan while coasting along on a sledge.

ADMINISTRATOR'S NOTICE NORTH CAROLINA, HAYWOOD COUNTY.

HESTER DAVIS, Administrator of Mollie J. Davis, Deceased.
 No. 479 - June 25-July 2-9-16-23-30.

NATIONAL FOOD-SAFETY CHECK-UP

WARNING!

...BE SURE YOUR REFRIGERATOR IS COLD ENOUGH IN HOT WEATHER

● If the food compartment of your refrigerator is above 50 degrees, there is danger to health as well as wasteful food spoilage. Don't take a chance. Find out whether your refrigerator is cold enough. The one sure way to know is to "take its temperature." That's why we, as local sponsors for National Food-Safety Check-Up, offer this valuable Cold-Gauge free to adults calling at our store. It's not an ordinary thermometer, but a special instrument designed expressly to check refrigerator temperatures.

U. S. Government Bulletins warn...

that the temperature of the compartment in which food is stored must be kept at 50 degrees or less if rapid development of harmful bacteria is to be avoided. Even at a few degrees above 50, many kinds of mold and bacteria, always present in food, multiply by the millions and become a serious menace to health. Many hot weather "upsets," especially those common to babies and children, are really caused by improperly kept food. And you can't depend on sight, smell or taste. Leading authorities agree that

food may seem all right - yet actually be unfit to eat. keep safe, low temperatures during hot summer weather. So stop in at our store and get your Cold-Gauge free, while the supply lasts. Check up on your refrigerator at once.

End uncertainty Make the Cold-Gauge test without delay. It is a mistake to take for granted the safety of your refrigerator. Recent surveys reveal an amazing percentage of refrigerators fail to

BERRIES WANTED

Cannery Now Ready to Purchase Blackberries and Huckleberries

—Price—

BLACKBERRIES 15c per gallon or 2 1/2c per pound
 HUCKLEBERRIES 24c per gallon or 4c per pound

Fruit must be ripe but not over-ripe, and must be free from stems and leaves.
