

A Page Devoted to the Interest of Haywood County Farming

COUNTY AGENT'S COLUMN

W. D. SMITH

A number of our dairymen attended the Guernsey sale at Hendersonville last Friday. The interest in this sale was very good. Mr. Earl Ferguson, our good dairyman of Dellwood, purchased the top animal of the sale.

Under our conservation program for 1936 only about 100 checks are behind. We received this week 131 checks which brings our total disbursement to Haywood county to date \$30,521.34. This could have been considerably increased had all our people understood how to make the program mean the most. We are delighted that 200 more work sheets have already come in for 1937 and others are coming in every day. Those who intend to be in the program for 1937 and who were not in the program for 1936 should see to it that a work sheet is made out before June 1. Remember June 1 is the closing date.

Mr. W. A. Corpening, assistant county agent, is out of the county this week attending the state conference at Manteo, N. C. He will return Monday. The county agent and assistant county agent, S. R. Mitchiner, will be out next week for the same purpose. This is the first time the spring conference has been held in Eastern North Carolina.

We are having a good many calls for pigs these days. We are not able to supply these calls. If you have pigs to sell, please let us know about it. We are glad that we have a few reg-

istered pigs here in the county. They are 5 or 7 weeks old now and those who wish to have good animals for breeding purposes should purchase these registered pigs.

Indications Are Increase Acreage In Burley Crop

On recent inquiries it is indicated that there will be an increase in acreage of burley tobacco in Western North Carolina. The growers seem to have sowed sufficient plant beds for an increase. While the plants are small and being damaged to some extent by insects it is very evident that some increase in acreage will be set out.

According to the report of the North Carolina Department of Agriculture, the mountain counties of Western North Carolina produced approximately six million pounds of burley tobacco last season, and the income to the growers from last year's burley production was over \$2,000,800.

Burley tobacco is one of the most important money crops of Western North Carolina, according to the acreage planted, and in the face of three short tobacco crops, and with increased consumption of burley tobacco, the prospects are very promising for good prices this coming season.

Although as yet this has not been verified, it is generally reported that by the opening of the 1937-38 to-

Uncle Jim Says

By planting trees on poor, hilly land you can stop gullies and produce future income.

Once A Millionaire, But Died In Poverty

An old woman froze to death about two years ago in a shanty inside the famous Matchless Mine, in Leadville, Col. The woman as "Baby Doe" Taber had once been a Denver social leader, had been a beauty too. At her wedding to Senator H. W. A. Tabor in 1883, her dress was said to have cost \$7,000. President Arthur was on hand to toast the bride. Her husband had made \$10,000,000 out of the Matchless Mine. But he squandered his fortune and he died practically penniless, but left instructions that his wife must hold on to the mine. She followed his advice, and legend has it that she often defended it with a shot gun, but she died leaving only a few trunks with mementos of other days. Last week it was announced that the Matchless Mine had been leased by its present owners, and miners would again seek wealth in its hidden treasures.

bacco season there will be at least another large modern warehouse on the Asheville tobacco market.

-TIMELY- Farm Questions and Answers

Question: What is the best control for cabbage worms?

Answer: Rotenone dust will, in all probability, give the best control. The dust should contain about 75 per cent of rotenone and the first application should be made just as soon as you see the first small white butterfly in the cabbage field. Dust as often as worms are found and be sure and get the dust down into the center of the plants. This dust will also control bean beetles and should be applied when the first cluster of eggs are found on the underside of the bean leaves. For bean beetles the dust should be applied under the leaves and not on top.

Question: Is there any cure for Bumblefoot in chickens?

Answer: Where the trouble is not too severe it is possible to cure it by making an incision in the injured foot and carefully removing the infected material. The area should then be sterilized with iodine and bandaged and the bird kept closely confined while the wound is healing. However, unless the bird is of exceptional value no cure should be attempted as these attempts in the majority of cases are unsuccessful.

Question: When is the best time to treat sheep for stomach worms?

Answer: Drenching for stomach worms should begin about June 1. As a usual thing one or two treatments are sufficient for mature animals, but in cases of severe infestation both the lambs and ewes should be drenched every two to four weeks until frost. Keep the animals to be treated off feed for 24 hours before and feed and water for five hours after drenching. The copper sulphate solution is most generally used for stomach worms, but the nicotine sulphate has also proven valuable, especially where tape worms are present. The nicotine sulphate solution is made by mixing together one-half ounce of 40 per cent nicotine sulphate (Black Leaf 40) and one quart of water. Mature sheep should receive two to three

Today's Market

The following cash prices were being paid Wednesday by the Farmers Federation here:
Chickens, heavy weight hens 13c
Eggs, dozen 16c
Corn, bushel \$1.10
Wheat, bushel \$1.20

DOES BLADDER IRRITATE GET YOU UP?

Results guaranteed. 25c. Pleasid in four days so back to your 25c. Flush the bladder would the bowels. Help minute impurities and excrete which can cause irritation results in getting up nights, frequent desire, burning back, leg pains. Get buchu leaves, oil, etc., made into little green. Just say Bukets to any druggist, nesville Pharmacy.

-GET YOUR-
AGRICO FERTILIZER
Manufactured Especially For—
Tobacco - Corn - Potatoes and All Other Crops.
-From—
HYATT AND COMPANY

The AMERICAN AGRICULTURAL CHEMICAL COMPANY
Spartanburg, S. C.

MR. THOMAS BALL OF MARSHALL SAYS:
"I used Agrico on 14 acres of corn and made an average of 64.3 bushels an acre on steep, mountain land. So when time came to plant my tobacco. I fertilized the whole crop with Agrico. I don't have to tell you I'm pleased with results—the figures speak for themselves. After taking out enough for my personal use, my 2.2 acres averaged 4114 lbs., or tobacco which sold for \$2303.84—an average of 56c per pound. I don't know of anyone in this locality who averaged as much on their crop."

MODERN CITY REFRIGERATION

FOR YOU - ON YOUR FARM - NOW!

SERVEL ELECTROLUX RUNS ON KEROSENE (COAL OIL) FOR A FEW CENTS A DAY

- Keeps food fresh for days
- Freezes ice cubes—desserts
- Saves steps, work, money
- Needs no daily attention
- No water or electricity
- Has no machinery to wear

WHEN you choose a Servel Electrolux for your home, you are choosing a modern kerosene refrigerator that is identical in all important respects with the famous Gas Refrigerator which has been serving hundreds of thousands of fine city homes and apartments during the past ten years! That's why farm women are so enthusiastic about Servel Electrolux . . . and why it's going into more kitchens every month!

This ideal refrigerator for homes beyond the power lines assures plenty of ice cubes at all times . . . protects food perfectly year-round . . . enables you to make new dishes and more interesting meals . . . makes your work easier every day you have it. And the cost to run a Servel Electrolux is only a few cents a day. Owners will tell you it actually saves enough to pay for itself. Send for free literature.

A single, glow-type burner does all the work. One filling of kerosene lasts a week or more.

FOR A BETTER PAINT JOB—USE KURFEE'S Varnish

This is Paint-Up Week, and we do not know of any better insurance against pre- a building than KURFEE'S PAINTS and VARNISHES—Paint-Up Now With Kurfee's.

Protection Beauty Economy

The three things to expect from paint.

PROTECTION—Kurfees 80% Lead and 20% Zinc—100% Pure Paint protects the surface with a film that is weather-proof, hides the surface and keeps out dampness as no half lead or adulterated paint can do.

BEAUTY—Kurfees 80 and 20 is made in numerous colors and tints and a glance at the color card will convince you of the beautiful color combinations possible.

ECONOMY—There is no other paint like 80 and 20. It is the purest, best and finest house paint that money can buy. Cheap paints contain clay, chalk, adulterated oils and water. Cheap paints are cheap only in price per can.

Compare formulas. If the manufacturer is afraid to print his formula you be afraid to buy his paint.

GRANITOID QUICK-DRYING ENAMEL

Here's a quick-drying enamel or stain for floors, furniture or wood-work. Unexcelled for wear and beauty. 28 colors.

KURFEE'S PORCH AND FLOOR ENAMEL

Here's a quick-drying enamel for porch and floors of wood or concrete—for outside or inside use. Easily applied. 10 colors.

DIM-TONE—A DULL GLOSS ENAMEL

Here's a dull, satin, water-proof finish for walls, wood-work and furniture. Dries quickly. Washable. 18 colors.
