Figure It Out For Yourself— People Don't Appreciate Just How Cheap Electricity Is—

The expenditures for admission to moving picture theatres during 1935 was \$750,000,000—about \$50,000 more than all the residential and farm customers in the United States paid for all electricity they used that year.

Federal taxes on liquor and tobacco are 1 1/2 times the total paid by 21 million American homes for electric service.

Again—the total cost of electricity to all the families in the United States is less than American automobile owners pay in taxes on gasoline—not for the gas itself, but just for the privilege of buying it.

Study the above a little, and you will appreciate more than ever your Cheap Electricity
