Small Grower To Be Aided By Act

Small farmers are to give small farmer breaks under new farm act. It is explained.

The small farmer a "break" in the purposes of the new act, according to E. Y. Floyd, AAA executive officer at State College.

Provisions for larger payments to small farmers who co-operate in the Agricultural Conservation program, a part of the act, have been provided. Growers who would have received \$200 under the regular act will have payments increased to \$250.

The following scale will be used for conservation payments are made:

Payment is not more than \$20, total payment will be increased 50 per cent; payments of \$20 to \$40 will be increased \$8 plus 20 per cent of the amount over \$20; payment of \$40 to \$60 will be increased \$12 plus 20 per cent of the amount over \$40; payments of \$60 to \$186 will be increased 44; and payments of \$186 to \$200 will be increased to \$200.

The scaling upward of the smaller payments will be a first charge against the available for payments, Floyd said.

Small farmers who take part in the AAA plan this year will qualify for payments by staying within their allotted crop acreage allotments.

Produce Prices

Next week we will pay in cash the following prices:

EGGS, doz. 12c
HEAVY HENS, lb. 14c
LIGHT HENS, lb. 13c
CHICKEN, lb. 16c

Farmer's Exchange and Produce Co.

Waynesville—Asheville Rd.
NOTE—This space each week for our cash prices for eggs and poultry.

Plumbing Specials

1,100 feet wrought iron, 1/2 inch to 4 inches, at 10% below cost.

Stove pipe and elbows, 5 to 7 inches, 15c each.

All pipe fittings and toilet repairs at reduced prices.

OLIVER HARROWS

Ideal for Mountain Farming

Built to penetrate all soils. Its design naturally draws discs downward into earth. Can be had with round or cut-out discs.

Heavy side rails add to the strength of this spike tooth harrow and keep the tooth bars rigid.

COUNTY AGENTS' COLUMN

BARN STAINS

There have been numerous inquiries about the use of old burned motor oil for stains. Many farmers in the county have recently stained their barns and out-building, and several more are expecting to do likewise.

The mixture we recommend is one pound mortar coloring to four gallons old motor oil (the quantity used can be varied some, depending on the color of the old oil and the color desired by the individual.) Oil and coloring should be well mixed and strained before using, especially if a spray is used. The mortar coloring can be obtained in various colors. The oil can be had free by carrying a barrel to a filling station and leaving it to be filled, or by paying two to ten cents a gallon for the old oil.

A. J. McCracken used 150 gallons of old oil, 40 pounds brown mortar coloring, and required 30-man hours to spray it on. Mr. McCracken says that about one-half this quantity would be needed if it were applied with a brush, but that the labor cost would be much greater. Expense was as follows: Oil, \$2.00; mortar coloring, \$3.00; labor, \$3.50—making a total of \$8.50.

TOWN AND COMMUNITY FORESTS

Many American towns and communities have discovered that community forests pay as they grow. Many more communities may obtain profits for taxpayers and wages for unemployed by using cheap, abandoned, tax-delinquent, or otherwise waste land to produce a crop of trees.

Strange as it may seem to Americans, there are communities in Europe where local citizens receive a bonus check from the operation of their local forest instead of a tax bill to maintain the town.

Finland obtains several million dollars and by measuring up to their soil-building goals.

The new act, in the main, merely adds to the present Agricultural Conservation program by providing for acreage allotments, marketing quotas when producers desire them, and crop loans.

If the cotton-tobacco referendum March 12, larger growers will receive steeper acreage cuts than will the smaller farmers, Floyd pointed out.

—TIMELY— Farm Questions and Answers

Question: Can skim milk or buttermilk be substituted for dried milk or other products in the laying mash?

Answer: Skim milk (clabber) or buttermilk may be used in place of the dried milk products at the rate of one gallon of milk to each 100 hens. When the skim milk or buttermilk is used at the rate of three gallons a day for each 100 birds it may be substituted for all the dried milk products, one-half of fish meal, and one-half the meat meal. The success of these substitutions, however, depend upon the regularity in feeding the milk and unless there is an ample supply available at all times no substitutions should be made.

Question: How can I get rid of white grub in my tobacco plant bed?

Answer: A poisoned bait made with 25 pounds of wheat bran, one pound of Paris Green and enough water to moisten has given good results. The mixture should be broadcast at the rate of 10 to 20 pounds to each 10 square yards of plant bed. Do not al-

Uncle Jim Says

I wonder how many city folks realize that a 10-cent loaf of bread contains less than two cent worth of wheat, and that a dollar shirt is made from less than 20 cents worth of raw cotton.

lars from the operation of its forests. In Germany there are several hundred towns where the residents receive dividends from the town forests instead of paying local taxes. At least two-thirds of the forest lands in Switzerland, and about half the forests in Bulgaria, are owned by communities. The average net profit from these forests is reported at about \$5 an acre annually although many are on exceedingly poor land, ill-suited even to the growing of tree crops. The gross annual return from forests in Germany varies from \$3.08 to \$8.64 an acre a year.

Throughout Europe, the city or town without a forest is an exception. The city of Zurich, Switzerland for example, has the famous Sihlwald. It contains more than 4,000 acres, much of which has been carefully managed for 500 years and has been owned by the community for 600 years. The forest shows a net return of \$12 an acre per year, employs one man for every 23 acres and additional labor during the season as needed. The Thun Forest, also in Switzerland, is reported to be yielding \$20 an acre annually.

There are some excellent examples of town and community forest operations in this country, although they have shorter records.

Milton, New Hampshire, with an estimated population of 700, has a community forest. In 1839 the town of Milton purchased a farm of 140 acres located in the northern part of the town, the primary purpose being to acquire a place to take care of the poor. During the next years those needing help and having no home resided on the farm. No records are available giving the date of cutting of the growth on the lot, but in recent years the town has received considerable revenue from the sale of wood and timber. In 1907 the town received \$7,000; in 1913 \$2,325; in 1917 \$3,875; and in 1927 about \$250; or a total of \$13,450. It has been estimated that there is over 200 M. board feet of merchantable timber on the town forest at this time. The money from the sales has been used by the town for building sidewalks, improvements to highways and town buildings; 2,000 trees have been plant-

ed as low bait to fall on plants. The same bait applied in the same way will also control slugs and snails when mixed and applied the same way as for grub control. Several applications, however, may be necessary for the snails whereas one application is sufficient for the grubs.

SUBSCRIPTIONS

The following subscriptions have been received since last week:

Mrs. Lloyd Teague, Cove Creek.
Joe N. Tate, City.
F. R. Medford, Clyde, Route 1.
M. O. Galloway, City.
S. H. Keller, City.

Allens Creek Club

Study Color Schemes

The Allen's Creek home demonstration club met at the school house for a very interesting meeting.

R. R. Smithwick county agent, was speaker with the important subject, "The Home Poultry Flock."

The demonstration of color in the home was followed by a social hour with Mrs. Alma Allen and Mrs. H. McCracken hostesses.

After the meeting the entire group visited the home of Mrs. Will Corzine to help her plan the color in her house.

There were 17 members present.

Henry Medford, Canton, Route 2.
A. T. Medford, Canton, Route 2.

"Did you fill your date last night?"
"I hope so. She ate everything in sight."

1938 FRIGIDAIRE WITH NEW SILENT METER-MISER and Frigidaire Electric Range

Cuts Current Cost Deepest in Frigidaire History! Here's the greatest all-around money-saver in Frigidaire history! Slashes current cost to an all-time low! Saves amazingly more on food—on ice—on up-keep, too! And offers a host of new convenience features! NEW "Double-Easy" Quickube Trays throughout! NEW Moisture-Seal Hydrators. A NEWLY-Styled, roomy, 9-Way Adjustable Interior! And many more!

In every refrigeration duty, the new 1938 Frigidaire saves more—offers more! Come in and see the PROOF today!

and Frigidaire Electric Range

Offers More Advanced Cooking and Baking Features Than Any Other 2 Ranges Combined!

At last! A range that makes tastier, cleaner cookery easier and cheaper than ever! A range that—in every model, every price class—unites more advanced features than any other two ranges combined!

Point for point, feature for feature, this sensational new Frigidaire Electric Range offers you more than any other range you've ever seen. Come in and see for yourself. Check each of Frigidaire's advantages one by one—then compare! You'll find that Frigidaire offers more...and proves it!

GET BOTH!
Low Prices
Easy Terms

COME IN AND SEE HOW FRIGIDAIRE'S NEW "EVEN-HEAT" OVEN—Ends baking uncertainties. "SPEED-HEAT" UNITS—Cook better—at less cost. "THERMIZER" COOKER—Cooks a whole meal for less than 2 cents.
