Dr. Hunter Says Haywood Benefited By W. C. T. C.

"Sixty per cent of all teachers now Have been strictly tried to find hus- in Haywood, have had some training ge, old maids You may at Western Carolina Teachers Colthat it is a big job judg- lege," Dr. H. T. Hunter told Rotamans from the way Susan Van Court last week, at which time he traced the

He pointed out that some 1,500 students have taken some class of work from the college during the past 12 months. Some are taking correspondence courses, so day students, some taking extension work. and other phases of college work offered by the institution.

When Dr. Hunter assumed the presidency of the school 15 years ago. there were 45 college students enrolled. At present there is something like a million dollars invested in the school, but many improvements are needed, according to Dr. Hunter.

During his discussion of the sacrifices made by the school he pointed; out that in one year, the legislature alloted \$300,000 more to Eastern Carolina Teachers College than Western Carolina Teachers College has had in almost 50 years.

"Sixty-five per cent of all our students come from Western North Carolina," the speaker said. "We stress thorough training of all our PHONE 48 students that are to become teachers. If after two years in our school, we decide, or the student decides they will not take up teaching, we recommend a change to some other school. After our second year, our work deals solely with training for teaching."

Another phase of the work recent- cemetery near Cruse. ly undertaken by the college is that of acting as interpreter for Western North Carolina. Many who are not familiar with this area have tried to do this, and most of them have made miserable failure. "It is our pur pose to give a true interpretation and one that will tend to elevate this section, rather than to tear it down, the speaker concluded.

Women's clothes are said to be the

Aged Resident Passes Away

Last rites were conducted at 11 o'clock on Wednesday morning at the home near Cruso for Mrs. Sallie Truff, 91, who died on Tuesday morning at 10 o'clock. She was the widow of the late John Trull and is survived by one child, a daughter, Eunice Trull. Mrs. Trull was the oldest reader of the Mountaineer, the oldest pensioner in the county, and as far as could be ascertained the oldest resident in Haywood County. Burial was in the Samily

-T I M E L Y-Farm Questions and Answers

Question: When should young birds be vaccinated for pex or sorehead.

Answer: Birds are more susceptible to this trouble than adults and the best time to vaccinate is when the birds are from 10 to 15 weeks old. At this time, the chicken pox virus (not pigeon pox) should be used. Pull a few feathers from the thigh and rub the small brush, which comes the holes. When vaccinating is once started, all birds on the place should be treated as the vaccinating material is alive and might find its way to the face parts of unvaccinated birds and thus spread the disease.

Question: What is the best control for the black spot disease in my rose garden?

Answer: Since the organism that causes this disease makes most of its development within the leaves it is necessary the leaves be kept coated with a fungicide at all times. Dust the leaves with a fine grade of dusting sulphur or spray with 4-4-50 Box deaux mixture when the leaves open and continue the application as often as is necessary to keep them covered. Pick off all dead leaves and twigs and burn them. This same treatment will controll the powdery mildiew so common on roses.

Question: How can the quality of eggs be maintained during the sum mer months?

Here Is Mrs. WELBORN'S Statement About

Electric Cookery

"Our service bills speak for the economy of electricity. Even if it cost many times more it would still be the cheapest form of service possible, for the convenience, comfort, and time-saving features are invaluable. It is so clean and cool that cooking no longer is a drudgery and the cooking results are always just right with so little attention."
