them the right to voice their opinions, Judge Alley held.

Judge Alley said that he had given the matter much thought and deliberation, and he was satisfied that the Cabe bill was unconstitutional, he suggested that the case be appealed and taken to the state supreme court.

T. A. Clark, of Canton, represented the plaintiffs, who were J. T. Bailey and H. A. Osborne, Canton, Edwin Fincher, Clyde, and M. T. McCracken, of Waynesville.

Proponents of an election of the ABC liquor control, took their defeat in the best of spirits, and one man, freely expressed himself in a humorous vein, when he remarked: "Here we go seeking a liquor store, when our present is far more convenient. Now, all we have to do is to call a bootlegger any hour of the 24 and get the stuff delivered to us, and even get 30 and 60 days to make payment. The ABC stores will be cash and carry and only open during daylight hours. Maybe we are better off than we think for with the present system, when it comes to convenience."

nery. Any person interested should get in touch with Mr. Davis or the person who hauls from their vicinity.

The canning of beans was begun the first of July, but the main crop has not come in yet. One hundred and seventy-five acres have been contracted for the cannery this year. This is a large increase over previous years. In 1937 there were 103 acres contracted. There are three farmers in this section, who altogether have contracted forty acres of the 175.

If the weather conditions continue favorable between 250 and 300 tons of beans will be canned in the local plant this season. At the present the cannery is paying 45 cents, 75 cents and 90 cents according to quality of the beans, per bushel, while the green beans shipped from here to the principal markets supplied by this section are bringing only 25 cents a bushel.

At present the Hazelwood plant is canning all beans brought in to them, but when the green vegetable market improves and the beans bring more than the cannery prices, the vegetables will be sold for the benefit of the growers on the green market.

To date there have been canned 2,200 cases of beans with the daily output on the gain.
