Will Advertising Do Me Any Good?

Certainly, madam! Let us answer your question by pointing out some of the things advertising already has done for you and your family.

Advertising has given you new and better food, trade-marked to guarantee quality. It has brought you the pleasure of movies ... made your automobile comfortable and safe...and given you labor-saving devices in your home.

Through advertising you have learned where and what to buy to save money. As a result of nationwide sales, possible only through the power of advertising, great laboratories and factories have been developed . . . giving you higher quality merchandise while prices

have come rapidly lower. Hence, advertising has opened the door to developments which have freed you from kitchen drudgery . . . saved you from fatigue of long hours of washing, cleaning, baking.

Advertising has a direct effect on your income in two ways. First, you buy more for your money because large-scale manufacturing, possible only when advertising delivers quantity sales, brings prices down. Second, your income is larger because advertising makes jobs .:: and when jobs are plentiful all incomes are higher.

To eliminate advertising is to destroy American enterprise and the American Way of Living.
