Too Close to the Panama Canal

The possibility of swift American action to place French Martinique, Guadeloupe and probably French Guiana under "protective custody" is believed foreshadowed by the Vichy collaboration with the Axis. Martinique long has been proclaimed by defense experts as an air and naval base site essential in the ring of island fortresses protecting the Panama Canal.

Letters To The Editor

Editor The Mountaineer:— Col. Lindbergh, I see, is scheduled to make another speech, May 29th. This time in the liberty loving city of Philadelphia. Judging by past performances we cannot hope for a recantation, but for a reiteration of former opinions of appeasement and isolationism.

The Colenel's public utterances attract more attention and are more widely publicised, than those of all other isolationists combined.

It is equally true, that his utterances are harmful to Democracies and more helpful to Dictators than those of all other isolationists combined.

Therefore, it behooves those who still believe in American ideals and its might and right to defend and preserve those ideals to be ever on the alert to detect, combat and to counteract all his clever, subtle and subversive utterances.

The Colonel has already declared his intention to continue his criticism of his government until it silences him. He further declared that the people of Germany are "better informed" on Dictators intentions and policies of government "than the people of Democratic America," the evil and error of this statement are so apparent and so far from the truth, that we are forced to the inescapable conclusion, that Lindbergh has either turned completely Hinderberg, or, else he is woefully, if not wilfully, ignorant of conditions both in Germany and America. Therefore, it is dangerous to heed his false assertions or listen to his dire predictions.

Some one has said that "Windy Lindy" should now do a Hess and console his grief stricken idol, Adolph.

It's unkind to repeat such a remark, but, he deserves the admonition, so long, as he continues to encourage Hitle and denounce Roosevelt.

Lindbergh could render the American aviation forces a service of incalculable importance. The airplane we now know, is indispensable to the successful defense of any nation.

America is now feverishly and lavishly improving the efficiency of its air fleet. But its chief ace flier and adviser has suddenly turned government critic and world politician, while his vast fund of invaluable air knowledge has turned to dust to the great detriment of world Democracy and the indescribable delight of world Dictatorship.

FRANK SMATHERS.
