## Wheat Growers To Be Effected By Marketing Quotas

It is Estimated That Between 500 and 700 Farmers Will Take Part In Program

The wheat marketing quota law which was approved by over 80 per cent of the wheat farmers in the United States in a recent referendum held by the government will effect all producers of wheat in Haywood county, it was learned this week from the county farm agents.

Attention is called to the fact that all buyers, millers and processors of wheat must execute necessary forms in all transactions.

Farmers who have wheat for market or to be processed into flour must have a marketing card for his wheat. This also applies where a farmer plans to feed wheat to livestock and poultry to be sold.

The necessary forms are being prepared in the county farm agent's office and will be ready for distribution by the time wheat is threshed in this section.

All threshers of wheat or combine operators are required to have special forms to be executed at the time wheat is threshed and the toll is taken.

These regulations have been set up by the AAA officials in Washington in view of the largest surplus of wheat on record and also to the limited export markets under war conditions.

The estimated production of wheat in 1941 in the United States is above 950,000,000 bushels and the expected market is only calculated at 750,000,000.

All millers, buyers and threshers of wheat in this county are asked to meet in the court room here on Monday, June 23rd, at nine o'clock a. m., for instructions as to how to execute the necessary forms.

All committee men and supervisors are supposed to attend this meeting and any farmer interested in the program.

The county farm agents estimate that between five and seven hundred farmers will be affected by the wheat referendum in this county.
