It Took A War-

It took a war to bring home the contrast between what happens to small children in North Carolina and what happens to tiny tots in Nazi occupied Europe. Published pictures show emaciated and starved children there. Above are children, 2 to 4 years of age, in a WPA nursery school. There are twenty-eight WPA nursery schools in North Carolina besides the one here. More than 5,000 pre-school-age children have "graduated" from the schools. At present 72 children are being taught and cared for with play ime, story telling time, a nap, a well-balanced meal in the middle of the day with plenty of milk, and how to get along with each other,

If the mule died before being fully depreciated then you would be entitled to deduct the difference between the depreciation reserve on Company to Baxter D. Morrison, the mule and the remainder of the asset on your books at the time of his decease. This, of course, would be a loss for the taxable year if he died during the taxable year. Of course the above is subject to furth-A. P. Liner, et ux, to Robert er restriction. What did the mule do when living? If you used him for riding to and from your work, or for driving him to church, he is not deductible as expense or otherwise. Otherwise he is deductible.

you adopted this method, that of Rambling Around scrapping, did you credit the sale of the scrap against the fixed asset accounts or did you credit it to junk sales, so that you could establish beyond question that the mule was scrapped? In case scraps are not reduced to money values, ment of scraps to take place in the woods or on a high cliff where the buzzards carry the dead mule off which would tend to prove to the tax authorities that your mule at least was gone.

When you have disclosed from your records the facts herein before required, you have derived the point of tangency between your dead mule and your income tax

I trust I have made myself perfectly clear.

Respectfully submitted,

SCRAP

Scrap dealers last year supplied a record quantity of 25,000,000 or value of the mule, whichever is gross tons of scrap, as much as the lowest, nor the rate used for the combined purchased and home scrap used in the first World War.

You did not state how the mule this whole year will slip by with-
