

W. C. Farm Leader Cites Eight Reasons Why Farmers Should Dread Inflation

Farm people who study President Roosevelt's seven-point program to control the cost of living will recognize in it an attempt to prevent the disastrous results which followed the upward spiralling of prices during the first World War, says Dean I. O. Schaub, director of the State College extension service.

Every person who farmed from 1918 through the early 1920's will want to avoid inflation of prices, and values, and other things that led to mortgages which scores of farmers have never been able to pay.

Dean Schaub said that President Roosevelt's program is designed to not only control the cost of living, but to: (1) Prevent a farmer from getting rich at the expense of many; (2) make it possible for the poor and rich to share alike in the products available; (3) help prevent a serious depression after the war, such as analyzed America following World War I; (4) maintain, insofar as possible, desirable social and economic conditions for our soldiers and sailors to return to after winning the fight for America's freedom; and (5) cause much of the war debt to be paid as we go.

The extension director listed eight reasons why farmers dread inflation. First, he said, inflation

creates a feeling of prosperity which is not sound. It tends to get farmers into debt for such things as land and machinery, which they cannot pay for quickly.

Third, inflation gets farmers into the habit of living above their income. Inflation increases taxes and public debt. It reduces tendencies to save and discourage thrift. Sixth, it establishes a price level higher than normal to which farmers adjust their level of living and outlook on life, which cannot be maintained.

Inflation means higher prices which make it hard for low income

Hub Caldwell Buys Two Purebred Animals

In co-operation with Pet Dairy Products Co., Hub Caldwell, prominent dairyman and farmer, recently bought a purebred Guernsey bull at Boone, and also a purebred Guernsey cow at the state sale at Swannanoa.

Howard Clapp, county agent, assisted in selecting the animals.

farm families to buy what they need. And finally, it makes dollars cheaper. Therefore, farmers have to borrow—have to mortgage for the future.

Plans Being Worked Out For Starting Mechanical Classes Here Immediately

Plans are going forward for the establishment of classes for young men from 17 to 26, with courses in woodwork, metalwork, welding, blacksmithing, auto mechanics, and general repair and maintenance of farm machinery.

The classes would be held here in Waynesville, at the vocational shop at the high school, according to J. C. Brown, who has been named by the state board to inaugurate the work here. The classes must be started at once.

No tuition charges will be made, and everything will be free to the students. They must take 15 hours of instruction a week, and classes

will be arranged to suit the convenience of the majority, Mr. Brown said. A course requires eight weeks.

Competent instructors will be secured to direct the work. Regulations for starting such classes require a minimum of ten students.

A new high in production was made in 1941 by the government mints; they turned out 1,827,486,276 coins with a face value of \$102,209,510.45.

Useful and Timely Hints For Homemakers

Your sugar ration is all you will need if you plan your meals wisely, if you cook carefully, and if you don't waste any. But if you have a very sweet tooth and insist you want more sugar than you are getting—remember, "We're in a war!"

The shadow of Japanese conquest falls right across your spice chest. Nutmeg, cloves, cinnamon, allspice, pepper and curry come from the southeastern Pacific. Try growing a herb garden and learn how to use old time recipes that depended upon sage, thyme, rosemary, anise, coriander, cumin, fennel and marjoram for their spiciness.

If you find starch on the bottom of your electrical iron, try cleaning it with a cloth wrung from soapsuds, using very mild scouring powder like silver polish.

If you keep aluminum clean from day to day, you won't have to resort to drastic cleaning measures. Most every metal in your house can be cleaned frequently by washing in hot, suddy water, rinsing and drying.

The way to protect garden shoes from moisture and mud is to keep them well greased and oiled. This not only prevents the leather from becoming hard and dry, but it also keeps your feet dry. For greasing shoes, you can use neat's foot oil, or cod or castor oil, tallow or wool grease, or combination of these.
