More Farm Machinery

A total of 300,000 tons of carbon steel, with other materials in proportion, has been allocated to the farm machinery program for the quarter beginning July 1. An additional 200,000 tons of steel have also been approved for each of the three quarters from October 1, 1943, to July 1, 1944. During the third quarter of this year, special emphasis will be given to the manufacturer of harvesting machinery for this year's crops. The whole farm machinery program has been stepped up.

Inspection Requirements Changed

Tire inspections for North Carolina commercial motor vehicles may be made every 5,000 miles or every six months, whichever occurs first, ODT says. Previously, commercial vehicles had to have tire inspections every 5,000 miles or every 60 days, whichever occurred first.

Data on Prisoners

American soldiers officially reported as prisoners of war in

enemy countries to date total 17,983, the war department has announced. Of these, 11,307 are held by Japan; 3,312 by Germany and 2,464 by Italy. However, these reports are incomplete. Information in the hands of the war department indicates that the basic diet of an American soldier in German prison camps is largely potatoes, cabbage, fish, and an indefinite amount of meat.

To Substitute Tires

Farmers in the State needing farm implements or front wheel tractor tires will be permitted to purchase suitable substitutes when they are unable to find a dealer with tires designed expressly for their purpose, the OPA has announced. Dealers may also sell passenger car owners tires and tubes of a slightly different size than is called for by the rationing certificate.

Gas Coupons Changed

A new "TT" gasoline coupon, which replaces the present "T" coupon, will become valid for use on July 1. The old type of "T" coupon will be invalid after July 25. OPA expects the change in design to help take up "slack" mileage and remove potential sources of black market gasoline.
