The Mountaineer

Another Call

The War Production Board is calling on

woodsmen and farmers to cut more pulp

woods and acid woods and to give at least

three extra days of work this year in sup-

plying this need to the mills. The farmers

have had many calls since Pearl Harbor

and we know that right now they are in-

tent on harvesting their crops in our county,

but this urgent cail must be met. There is

a serious shortage, reaching 2,500,000 cords.

paign, cooperating with the War Production

Board and the National Newspaper Pulp-

wood Committee to bring this snortage be-

fore the public. The American people have

never tailed to meet an emergency. The

people of this county have never failed to

offer their services in time of national need.

have and expect to continue to produce food

in larger quantities, with a labor shortage,

but we also feel that they will answer this

The farmer who answers the call will also

derive a personal benefit. No doubt the

woods on his farm need thinning out, and

he could use the money received for the

pulpwoods and acid wood to a mighty good

advantage at this time, and also aid in keep-

ing a steady stream of raw material going

into the mills to speed up supplies to our

North Carolina ranks high among the

states of the nation in the cutting of pulp-

woods, producing annually around 800,000

cords. There are four pulpwood mills in

Two of the four mills are located in this

section, the Champion Paper and Fibre Com-

Delinquent Taxes

The public in general is becoming more interested and more conscious of governmental problems, so we reprint the following editorial from the Raleigh News and Observer, which deals with a pertinent problem:

"At the meeting of the State Association of County Commissioners of North Carolina in Raleigh recently, Governor Broughton said that there are two sore spots in our local government:

"1. The laxity of control over the bonds of those handling public funds.

"2. The enormous amount of delinquent taxes.

"He suggested that suits be brought as the law requires and that the bonded public servants be checked on by a public audit.

"The statement has been made by an officer of the association that past due real estate taxes are more than \$12,000,000. Certainly it is so large a sum as to demand action. It is not only essential that all taxes be paid for the good of wise administration, but it is unjust to people who pay their taxes for others to be permitted to escape their fair share of the cost of government. If everybody paid his taxes due there might be reductions of rates in many of the counties. Certainly this large sum of unpaid taxes on real estate speaks strongly for action.

"Which all reminds us our own county

Schools Face Even More Wartime Changes

Includes

Pre-Flight

Emphasis to Be Pl On Pre-Army Train

• WASHINGTON-To ease the high school iad's transition Classroom to battlefront, certain far-sighted educators seek ner to groom youths, approaching draft age, with pre-induction in tion that will prepare them mentally and physically for serv the armed forces. If the plan works, the Army willowave six m in the training time of raw recruits. To make it work in a hurry, Senator Carl Hayden, of Anzor

introducing a bill in the senate authorizing \$8,000.000 to pi high schools of America on a war-time basis

The legislation is aimed at providing pretion aids to future soldiers

1-More and better instruction in mathem science and pre-flight aeronautics. Instruction 2-Physical examinations to help the store

lect his preference in the various branches of the armed services need to take pre-flight aeronautics if the student knows his eye not correctable to a 20-20 vision. The many boys who hope pilots can find out early if they qualify. If not, they might take courses to prepare for the ground forces.)

3-Appointment of teacher-trainers to give other teachers ref er courses. (To include suggestions for teaching the war-tim proach to classroom subjects.)

4-Emphasis on special training for the 610 specialized jobs in Army (Men for such jobs were easy to get in the first year of war, but mechanics, carpenters, linesmen and radio operator now much in demand.)

Some fear that the bill, which was favorably approved by senate committee on education and labor, may arouse that old aboo argument used against all educational bills involving fe "regimentation of our educational system by congr funds . . But the bill follows the accepted pattern for educational le tion . . . placing the allocation of funds under state control

The proposed legislation will help not only the 80 per cent of high school boys who, it is estimated, will go into the armed for but also all high school students, boys and girls, needed acuted other non-combative tasks.

Those screened out will be given specialized training for a war civilian job in a factory, in the government, on the farm. Right after Pearl Harbor, the military authorities were not

cerned over what was taught in the high schools of the cou But with the coming of the 18-year-old draft, they immediate alized the service that the school system could render the soldier the near future.

Sixty educators formed a U. S. Wartime Commission and a to the drafting of high schools in an organized way. Requests the war and navy departments were answered in the creation of High School Victory Corps, working through a policy comm headed by Capt. Eddie Rickenbacker.

Throughout all of these days of planning, the influence of one of vision, Dr. John W. Studebaker, was a vital force. As c sioner of the U S. Office of Education, his agency

was charged with the responsibility of offering a specific pattern for procedure to the 48 states and the District of Columbia. Naturally, he could make no demands of the states because he doesn't have that kind of authority So first he inspired them.

Then he offered a specific program, but one elastic enough t courage local ingenuity.

Along with other realistic educators, Dr. Studebaker recog that the emphasis on the physical must overshadow the acad He's fond of quoting General Sir Harold Alexander, of the B First Army, "The physical fitness of an Army is one of the important battle-winning factors in modern war. When fighters it is the men who stick it longest who win in the end."

So, today we find high schools giving five days of physical e tion instead of two, competitive sports replaced by calestheni commando training.

Scarcely a school in the country has not made some change curriculum to meet wartime demands. Some 76.6 per cent placed increased emphasis on science. Mathematics classes almost doubled. Foreign languages are popular. Shop work, ticularly with metals, is encouraged.

High school students from Maine to California are encourage gain work experience. Even school hours have been revamped the west coast, students attend classes from 7 until 11 so they work in the nearby Lockheed airplant for four hours during afternoon. O

PICKLE SEASON

records must be far above the average of of this county are aware of the situation others in the state today."

Hewing the Mark

We understand that for sometime citizens of the community have been expected to park within a certain line, parallel with the sidewalks on Main Street. We feel sure that you will agree that most of us have been pretty careless in the past, but not now.

This spring the word got about that the officers meant business, and that if you disobeyed and did not "hew the mark", you could expect to pay a fine. We hear that quite a number of persons paid the fine, but will not have to do so again soon.

Others have profited by their example, until the cars parked on Main Street now have a nice regular look, as you check them down all in line.

We think this is one of the best illustrations we have seen in sometime of how the public acts when they realize that the officers mean business.

A Good Example

State College extension service reports that 46 Negro churches in Pitt County have designated the first and second Sundays of August as " Harvesting Sundays". On these occasions the pastors of the churches plan to make special appeals to the members to help in harvesting of 1943 crops,

The preachers will tell their congregations how important it is that the home front carry on so that the battle fronts may be kept going to "preserve the freedom of worship."

This is a fine example that well might be followed by the rural churches throughout the state, for the harvesting of crops in the year 1943 forms a major part of the home attack on the enemy.

What human beings are unable to understand they attribute to the Almighty, either as a blessing or a punishment.

each one will make plans to cut the necessary cordage from his farm.

The War Production Board estimates that

Remember "every stick of wood is a club in a hurry . to smash the Axis."

It's Time To--

The following is a pertinent list of things to do now which was pointed out by a farm lived here, but just suppose I tried magazine for those who live on farms:

farm equipment are good humor and good health.

Arrange now for seed of vetch, Austrian peas and other winter legumes.

Ask your county agent about the wilting method of making grass silage.

Consider using the brooder house if extra storage space is needed.

See that all the animals have plenty of shade and fresh water.

Be ready to fight cotton insects when they appear in force.

Keep check of news and policies affecting agriculture.

Plan the purchases needed on the next chickens . . . the clerks are extrip to town.

Collect and put away farm tools not being used.

Order lime and seed for fall legume-sowing

Replace missing rung in the family ladder. Plan to requeen the bees in September. Vaccinate the pullets against sorehead. Use all AAA soil-building allowance, Cooperate in using farm machinery. Check 1944 machinery needs now.

American soldiers in Sicily stood up against concentrated machine gun and mortar fire for 23 hours.
