

TOWN and FARM in WARTIME

Prepared by OFFICE OF WAR INFORMATION

REMINDERS

EATS, FATS— Spare Stamp Book Four is good for five points of work (except lard) in system of sausages through all types of stamps V, W, X, Y and Z are good through February 26. Brown stamp B is good through February 26. Red 10-point stamp A8, and C8 in Book Four are good through May 20. Red 10-point stamps are redeemed at rate plus four cents.

PROCESSED FOODS— Green stamps K, L and M are good through March 20. Blue 10-point stamp B is good through March 20. D8 and E8 are good February 26. Book Four are good February 26 through May 20.

TOBACCO— Stamp No. 30 in Book Four is good for five pounds through March 31. Stamp No. 40 in Book Four is good for five pounds of canned sugar through May 28, next year.

GASOLINE— A-9 coupons are good through May 8.

INSPECTION DEADLINES— For A-coupon holders, B, C and D coupons are good through February 28.

HOES— Stamp No. 18 in Book Four and No. 1 on the airplane in Book Three are each good for one pair.

INCOME TAX— March 15 is the deadline for filing returns. Earlier filing is desirable.

RATION TOKENS IN USE SUNDAY

During the three-week period, February 27 through March 20, in buying from the old-rationing program to the simplified token program, two sets of stamps, green and red, will be used for processed meats and fats. The old stamps, green and red, will be used for other purchases.

Quick To Treat Bronchitis

Chronic bronchitis may develop if a cough, chest cold, or acute bronchitis is not treated and you cannot afford to take a chance with any medicine less potent than Creomulsion which goes right to the seat of the trouble to help loosen and expel germs and phlegm and aid nature to the end of raw, tender, inflamed, and mucous membranes. Creomulsion blends beechwood bark by special process with other tested medicines for coughs. Contains no narcotics. No matter how many medicines you have tried, tell your druggist to give you a bottle of Creomulsion with understanding you must like the way it quickly allays the cough, permits rest and sleep, or you are to get your money back. (Adv.)

Marine's Guest

MARINE Pfc Robert H Landingham, 27, of Clarksdale, Miss., is shown feeding a baby wallaby with an eye dropper at a camp somewhere in the Pacific. The leatherneck adopted the baby when it dropped from its mother's pouch as she hopped into the camp. U. S. M. C. photo. (International)

State Specialist Says Dairying To Become A Leading Enterprise Soon

Dairying is destined to become a leading farm enterprise in North Carolina because all the requirements for successful milk production can be met here, says John A. Arey, extension dairyman at N. C. State College.

"Our climate and our soils make it possible to graze cows on a combination of permanent and temporary pastures approximately three-fourths of the year. During the war years, when milk is so badly needed, we should redouble our efforts to have maximum grazing for every milk cow in the State," he said.

"For the winter and semi-winter months an abundance of good quality legume hay should be provided, two tons for each cow is not too much. This will keep up the mineral needs of the cow and furnish valuable protein to make milk. Its bulk is also valuable as an aid to the proper digestion of more concentrated feeds.

"Where five or more cows are kept it is practical to provide silage for them. Three to four tons of silage should be provided for each mature cow. This provides succulence and a cheap source of nutrients for milk production. An acre of corn fed through a silo will make more gallons of milk than any other way it can be fed," he continued.

Grain is essential, but should be balanced with the roughage. It should be so mixed as to supply the nutritional needs of the cow not met by the roughage that is being fed. High protein hay and reasonably low protein grain will give excellent results. Low protein hay and high protein grain will give fairly good results. Re-

surplus materials of war are released. . . . Although the points-for-fats plan did not go into effect until December 13, fats collections for December were 33 per cent over November, WPB reports. . . . If war food goals are to be met all available red clover seed must be planted this year, WFA asserts. . . . WPB has reduced the 1944 manufacture of paper towels for home use to 80 per cent of the 1943 base period output. . . . Farmers will have more potash salts for fertilizer use this year than during the two preceding years, WPB announces. . . . A general retail price reduction to the consumer of chinook salmon is expected to result from establishment by OPA of a 20 cents per pound ceiling price for certain producers.

State College Hints

By Ruth Current, State Home Demonstration Agent N. C. State College.

Victory Gardens: Buy only the best garden seed for the Victory Garden. Good seeds are usually the cheapest. Don't buy more seed than you need. There will be enough for every gardener if this is done.

Plant enough seed for early canning and for sufficient vegetables for the table.

And don't forget, we need green, red, and yellow vegetables in our diets. Keep in mind the color of your vegetables when you buy your garden seeds.

Plant some herbs. Herbs don't take up much growing space and they add interest to your meals. One or two plants of each variety will give you enough herbs for use all summer and also to dry for the winter.

One of the herbs you will probably want to include is parsley. It's rich in vitamin A and C; so put it right into foods where it will be eaten. Chives give a delicate onion flavor. For summer drinks and sauces and jellies, you'll want to plant mint. It's good with meats and in soups and salads.

You might pick and choose from this group: thyme, sage, rosemary, majoram, rue, dill, savory and caraway. Why not plant your herb garden near the kitchen. Remember herbs need sunshine.

Housecleaning? When cleaning a room don't take time out to do repair jobs. Instead, list on a pad all the repair needs and later, at a more convenient time, attend to each item in turn and cross it off your list.

Remember there is no substitute for high quality legume hay.

"If our dairy cows are given all these desirable feeds, housed in comfortable barns and treated with kindness maximum milk production can be expected," Arey concluded.

TO REVIEW FARMER DEFERMENTS

Local selective service boards have been ordered to review promptly deferments of agricultural workers because of the sharp curtailment of available manpower for the armed forces, selective service announced. "It is not expected that local boards will defer or continue to defer a registrant as necessary to and regularly engaged in agriculture unless by his own personal and direct efforts he produces 16 or more war units each year," selective service asserted. About 1,700,000 men in agriculture were deferred in Class II- and Class III-c as of January 1, 1944. Of this total, 400,000 are single men below 22 years of age and more than one million are non-fathers. In all other war production and war supporting activities less than 125,000 non-fathers below the age of 22 were deferred as of January 1.

RUBBER FOOTWEAR PRICES UP

An average increase of 6 1/2 per cent in retail ceiling prices of waterproof rubber footwear—rubbers, arctics, gaiters, and rubber boots—has been allowed by the Office of Price Administration to compensate for increased costs.

FRUITS-VEGETABLES SET ASIDE

Canners were directed to set aside increased quantities of canned fruits and vegetables from their 1944 production for government requirements in order to meet expanded military needs, the WFA announced. The increases principally are for canned apples, fruit cocktail, peaches, pears (Bartlett), lima beans, sweet corn, peas, tomatoes, and tomato juice.

ROUND-UP

WPB has authorized production during 1944 of 1,400 motorcycles for essential domestic civilian use, 80 for Canada, 650 for export, and 50,000 for military use. . . . Use
