

46 Students On Honor Roll At Hazelwood School

During the past month, 46 students of the Hazelwood school attained the honor roll, according to Lawrence Leatherwood, principal, in announcing the following list of students:

Grade 1—Emma Hensley, Shelby Jean Wood, Bobby Hooper, Carl Hudson, Doris Buchanan, Gene Davis.

Grade 2—Helen Conard, Tommy Gentry, Patsy Hall, Emily Smiley, Wanda Sue Mills, Mary Sue Morgan, Mona McLean, Juanita Kelley.

Grade 3—Bobby Joe McClure, Thomas Nichols, Shirley Sheehan, Betty Jean Mathis, Adelaide McLean, Richard Hoyle, Patsy Brendle, Mary Ann Byrd, Sarah Jane Davis, Patsy Blalock.

Grade 4—Catherine Bell, Jun Colvard, Kathleen Creasman, Carmon Green, Carroll Sawyer, Terry Swanger, Patsy Smiley.

Grade 5—Martha Creasman, Marjorie Cogdill, Rosalee Burgess, Jimmie Swift, Mary Evelyn Plemons, Juanita Wright.

Grade 6—Frances Hendricks, Marie Hooper, Helen Kilby, Alden McCracken, Robert Putnam, Betty Sue Sheehan, Homer Snyder, Jr., Mary Evelyn Sorrells, and Deryle Davis.

More Beef From Less Feed In '44

"The fattening of cattle to excessive finish, as was common a few years ago, is under present conditions a wasteful and unpatriotic practice," says Dr. J. E. Foster, in charge of beef cattle and sheep research for the experiment station at State College.

"When cattle are fed to excessive finish, the gains during the latter part of the feeding period are slow and expensive," and most of the fat so produced is not consumed by humans," he says.

These statements were based on a series of feeding experiments which he points out that beef cattle and other livestock in production should be fed from products which are

ACT FAST WHEN A COLD THREATENS

At the very first sniffle, sneeze, or any sign of a cold just try a few drops of Vicks Va-tro-nol up each nostril. If used in time, Va-tro-nol's quick action helps prevent many colds from developing. . . . And remember this, when a cold makes you miserable, or transient congestion "fills up" nose and spoils sleep—3-purpose Va-tro-nol does three important things. It (1) shrinks swollen membranes, (2) relieves irritation, (3) helps clear clogged nasal passages. Enjoy the relief it brings. Follow directions in folder.

State College Hints

By Ruth Current, State Home Demonstration Agent N. C. State College.

Sharpen knives often. A tapered steel rod, oil stone, or grindstone can be used. See that the cutting edge always leads when sharpening.

To keep knives sharp, cut food on wooden cutting board and not on a metallic or enameled surface. Avoid leaving knives in hot water. Store in a wooden wall rack. Never store knives loose in a drawer as the edges become dulled.

To prevent dents in utensils, store them in an easy-to-reach place so they can be removed without moving others. Make racks for storing pots, lids, pie pans, thin baking sheets and trays.

Remove all ashes regularly from the firebox and ash pan of the range. Never allow ashes in the ash pit to remain in contact with the grates.

Clean soot from chimney, flue and pipe once a year, and from bottom of lids and around oven once a week.

Wash the inside of the oven and racks with soap and water, rinse, and dry thoroughly. If inside is rusted, clean with steel wool and paint with aluminum paint, if you can get it. Allow oven door to remain slightly open until cool.

Never store food in the oven. Keep the top of the stove in good condition by rubbing it each day while it is still warm with a piece of waxed paper or unsalted fat, rather than blacking. Clean the nickel, chromium, or enameled parts with soap and water.

Indigestible to man, such as pastures, hays, stovers and straws.

In the feeding tests corn was the only feed used that was suitable for human consumption and the amount fed during the fattening period returned from \$3.18 to \$4.23 per bushel.

Yearling steers averaging 663 pounds were produced ready for the feed lots at a total cost of only \$5.00 to \$5.50 per hundred-weight. This cheap cost was made possible by proper utilization of native reed pastures, corn stalks and soybean field gleanings and winter pastures. This work was carried on at the Blackland Station in Washington county.

Cottonseed meal and soybean oil meal were found to be excellent protein supplements for fattening beef cattle and of practically equal value.

"To produce more meat is not enough, but the aim should be to produce more meat more efficiently and from less foods that are suitable for human consumption," Dr. Foster says.

Jesus Betrayed, Denied, Condemned

HIGHLIGHTS ON THE SUNDAY SCHOOL LESSON

By NEWMAN CAMPBELL
(The International Uniform Lesson for March 12 is Mark 14:10-15:20, the Golden Text being Isaiah 53:3, "He was despised and rejected of men; a man of sorrows, and acquainted with grief.")

THE TRAGIC story of Jesus' last days on earth is the subject of our lesson today.

Two days before the Passover was to be celebrated, His enemies were planning how to get Jesus into custody. They said, however, "Not on the feast day, lest there be an uproar of the people."

At this time Jesus was in Bethany, at the house of Simon the leper. As he sat at supper with His companions, a woman came in holding an alabaster box of precious ointment. She broke the box and poured the ointment over Jesus' head. Some of the company were indignant, saying the ointment could have been sold and the money given to the poor.

Jesus said, "Let her alone; why trouble her? She hath wrought a good work on me. For ye have the poor with you always, and whenever ye will ye may do them good; but Me ye have not always."

Judas Goes to Chief Priests
Judas Iscariot went from this gathering to the chief priests, to arrange with them how he would betray his Master.

On the first day of unleavened bread, when they killed the passover, the disciples asked Jesus where they would eat the feast. Jesus told two to go into the city and there they would see a man carrying a pitcher of water on his head. They were to follow him and where he went they were to say to the owner of the house, "The Master saith, Where is the guestchamber where I shall eat the passover with My disciples?"

The man would show them an upper room which had been prepared for them. The disciples did as He said and presently they were eating the Passover in this room. Jesus said, "Verily I say unto you, One of you which eateth with Me shall betray Me."

Jesus took bread and blessed it and gave it to His companions, saying, "Take, eat: this is My body." He also took the cup, gave thanks, blest it, and they all drank.

"This is My blood of the new testament, which is shed for many."

After they had sung a hymn they went out into the mount of Olives and to Gethsemane, and Jesus took Peter, James and John with Him and asked them to

watch awhile while He went aside to pray. He fell on the ground, asking that God would take the bitter cup from His lips, "nevertheless, not what I will, but what Thou wilt."

Finds Friends Sleeping
Returning to His three friends whom He had asked to watch with Him, He found them asleep. Sorrowfully He asked, "Couldst not thou watch one hour?"

He told them to watch and pray, "lest ye enter into temptation. The spirit is truly ready, but the flesh is weak." Again He went away to pray, and again coming found them asleep. A third time He prayed, and became reconciled, and on rejoicing the disciples, said to them, "Sleep on now, and take your rest: it is enough. The hour is come; behold, the Son of man is betrayed into the hands of sinners."

Almost immediately the garden was filled with men armed with swords and staves, led by Judas who had said they were to take the man he should kiss. He went straight to Jesus, saying "Master, Master," and kissed Him, and the rest took Him into custody.

The Chief Priests were determined to destroy Him, so they hired false witnesses, who told how they had heard Him blaspheme, but they could not agree among themselves.

During the trial Peter followed Jesus and was in the same building, warming himself at the fire. A servant recognized him and said, "And thou wast also with Jesus of Nazareth." Peter denied it, and then he heard the cock crow. Three times he denied he knew Jesus, the last time with cursings and swearings. A second time he heard the cock crow and remembered that Jesus had said, "before the cock crow twice, thou shalt deny Me thrice."

After the trial before the chief priests, Jesus was taken and delivered to Pilate, the Roman governor. Pilate asked Him, "Art Thou the King of the Jews?" Jesus answered, "Thou sayest it," and would answer nothing more. Pilate could find no fault with Him and suggested that he release Jesus. At the feast of the passover it was customary for a prisoner to be released. The people, moved by the chief priests, said no, they would take instead Barabbas, a murderer.

"What shall I do unto Him whom ye call King of the Jews?" asked Pilate, and the shout went forth, "Crucify Him, crucify Him!" So Pilate, not being a strong man, let them take the Lord and lead Him away to abuse and death.

-TIMELY- Farm Questions and Answers

Question: Can peanut seed be treated in advance of planting?

Answer: Yes, says Howard R. Garriss, extension plant pathologist at State College. Have peanut seed tested for germination and avoid injury to the seed coat in shelling, he advises. The agronomists suggest that peanuts be planted just as soon as the grower has finished planting cotton. For full information on "Producing Peanuts For Oil," write the Agricultural Editor, State College, Raleigh, for a free copy of War Series Bulletin No. 17 or ask your county agent for this publication.

Question: What are the latest recommendations for fertilizing tobacco?

Answer: For blue-cured tobacco, use 800 to 1,200 pounds of 3-9-6 or 3-8-5 per acre for average soils; 3-9-9 on potash deficient soils; and 2-10-6 or 2-12-6 on rich or fertile soils, say State College specialists. On sandy soils, one-third of the fertilizer may be dropped around the tobacco 20 days after transplanting. For average conditions, the specialists suggest that you lay off the rows, mix the fertilizer with the soil, and bed 7 to 10 days before transplanting. Applying the fertilizer ahead of setting saves time and helps to prevent fertilizer damage to the newly set plants.

Question: What should I do to improve my pasture?

Answer: We would suggest that you write the Agricultural Editor, State College, Raleigh, for a free copy of Experiment Station Bulletin No. 338 or ask your county agent for a copy. Its title is "Establishing and Improving Permanent Pastures in North Carolina." One important point to be remembered is that it should not be overgrazed in early spring or during dry weather. An application of 300 to 500 pounds of superphosphate per acre, if such has not been applied in the last 3 to 5 years will give good results. Pastures also need lime.

VISITS HERE

Lane Arrington, Jr., son of Mr. and Mrs. Lane Arrington, of Waynesville, who has been spending a six-day furlough at home, has been visiting on the campus of Western Carolina Teachers College, where he was a junior last year. He is in the Army Air Corps stationed at Houston, Texas.
