

Softball Schedule Is Announced for League

Play in the local community softball league for men is going on daily. W. E. Tenney, recreational director has announced. Plans are underway to get the women's teams into action within the next few days.

In announcing the schedule, Mr. Tenney also gave ten rules for players as follows:

1. Don't throw the ball before you catch it.
2. You'll never make a .300 hitter unless you take the bat off your shoulder.
3. Outfielders, who throw the ball back of a runner, lock the barn after the horse is stolen.
4. Keep your heads up and you may not have to hold it down.
5. When you start to slide, slide. He who changes his mind may change a good leg for a broken one.
6. Don't alibi on the bad hop—anybody can stop the good ones.
7. Look ahead—not backwards. Remember what happened to Lot's wife.
8. Don't throw the ball to the base after the runner is there. A ball in the hand is safer than in the air.
9. Touch all the bases, that's what they are there for.
10. Don't find too many faults with the umpire. You can't expect him to be as perfect as you are.

The schedule for the season is as follows:
 Thursday, July 13—Pet vs. R&P.
 Friday, July 14—Tannery vs. R&P.

The other evening our neighbor up the street was reading his newspaper when his son who was doing his school work, asked:

Son—Dad, can you tell me where the Pyrenees are?
 Dad—How should I know? Ask your mother. She's been tidying up.

From where I sit... by Joe Marshall

Matt Doorly Versus the Tomato

Matt Doorly's skin broke out in a rash last week. He finally admitted to Doc Hollister he'd eaten twelve tomatoes in a row just the day before.

"Shucks," said Doc. "That's all that's the matter with you. That kind of eating would turn anybody red."

So now Matt has not only cut out all tomatoes for himself. He's forbidden his family to eat tomatoes. And won't even have them in the house. Says tomatoes are anti-social and ought to be prohibited by law.

Funny how some people get off to extremes like that. They take a wholesome thing and overdo it till it disagrees with them—or maybe find they do happen to like it—and then they want it banned for everybody.

From where I sit, folks ought to realize there's a middle ground in everything—a middle ground of moderation on the one hand... and tolerance for the neighbors on the other.

BUY WAR BONDS AND STAMPS

Hey, Chum! Wanna buy some nice fresh kilowatts?

IT'S not likely that a shifty, fast-talking gent will ever sidle up to you with such an offer.

Bootleggers and Black Markets exist only where there are shortages—and a chance to make big profits by breaking ceiling prices.

There are no Black Markets in electricity, nor are there any shortages.

And far from pushing against price ceilings, the price of electricity has stayed right down on the floor. In fact, over the last 15 years, the average price to the average family has been cut just about in half. Of course, you probably have more electric appliances and use more electricity today than you did then—but you're getting twice as much for your money!

Your thanks for such a big bargain belong largely to your friends and neighbors who work with this company. They're doing a better, more efficient job every year.
