

TOWN and FARM in WARTIME

Prepared by OFFICE OF WAR INFORMATION

REMINDERS

MEATS, FATS — Red Stamps AS through Z8, good indefinitely.

PROCESSED FOODS — Blue Stamps AS through Z8 and A5, good indefinitely.

SUGAR—Sugar Stamps 30, 31, and 32, each good for five pounds indefinitely. Sugar Stamp 40, good for five pounds of canning sugar through February, next year.

GASOLINA — A-10 coupons, good through August 8.

FUEL OIL—Period 4 and 5 coupons, good through September 30. New period 1 coupons, now good.

SHOES — Airplane Stamps 1 and 2, good indefinitely.

KEROSENE HAS GONE TO WAR

Kerosene use on the home front must be reduced wherever possible this year, the Petroleum Administration for War warns, because of the tremendous and increasing consumption of kerosene in vital war fuels. Diesel engines use a fuel a portion of which has been diverted from the manufacture of kerosene. Diesel fuel oil, made of approximately one-third kerosene fractions, powers bulldozers, diesel trucks, caterpillar tractors, construction machinery, dock and yard locomotives, every American submarine and nearly 100,000 invasion barges. PAW calls on users to use sparingly of kerosene—also known as coal oil, range oil, lamp oil, burning oil and stove oil.

MORE WORK CLOTHING

More civilian work clothing for men and boys is indicated by a War Production Board order requiring manufacturers of work clothes to produce during each quarter beginning July 1 at least 90 per cent of the number of garments manufactured during the third quarter of 1942. Items to be produced are bib overalls, dungarees, work shirts, one-piece work suits, pants, overall jackets and blanket-lined coats. In line with recent national legislation, manufacturers' prices for the basic constructions of denim (used widely in manufacture of overalls) have been raised one cent a yard, the office of Price Administration announced.

NOTICE OF SALE

Monday, July 24, 1944, 11:00 o'clock A. M., at the Courthouse door in Waynesville, N. C., I will offer for sale at public outcry to the highest bidder for cash the following described lands and premises, situate, lying and being in Haywood County, N. C., to-wit:

Being the same lands sold and conveyed by Zeb Queen and wife, Ellen Queen, to T. H. Gentry and wife, Lucinda Gentry, by deed dated the 18th day of May, 1925, and which said deed is duly recorded in the office of the Register of Deeds of Haywood County, N. C., in Book of Deeds No. 78, page 104, to which said deed and record reference is hereby made for a full and complete description.

Sale made pursuant to power and authority conferred upon me by that certain deed of trust dated July 21, 1928, from T. H. Gentry and wife, Lucinda Gentry, recorded in Deed of Trust Book 39, at page 34, Haywood County Registry, to which instrument and record reference is hereby made for all the terms and conditions thereof.

This June 23, 1944.
GEO. H. WARD, Trustee
A. T. WARD, Atty.
No. 1373—June 29-July 6-13-20

NOTICE OF SALE

On Monday, July 31, 1944, at eleven o'clock A. M., at the Court House door in the Town of Waynesville, N. C., I will offer for sale at public outcry to the highest bidder for cash certain lands and premises lying and being in Waynesville Township, Haywood County, more particularly described as follows:

BEGINNING on an iron stake, H. L. Hyatt corner; thence N. 1° E. 420 feet to center of Richland Creek; thence up said creek S. 77° 30' W. 140 feet to a stake, center of creek; thence S. 74° W. 280 feet to a stake in center of creek, and center of a ditch; thence up ditch S. 10° 30' E. 340 feet to a stake six feet North of pavement; thence N. 84° 45' E. 340 feet to the BEGINNING, containing 2.98 acres, more or less.

Sale made pursuant to the authority vested in me by that certain deed of trust dated June 6, 1938, executed by Fred W. Hendrix and wife, Elsie Hendrix, and recorded in Book of Deeds of Trust No. 44, page 256, Haywood County Registry, to which instrument and record reference is made for all the terms and conditions thereof.

This June 30th, 1944.
A. T. WARD, Trustee.
No. 1374—July 6-13-20-27

work in Veterans Administration hospitals to help provide adequate care for disabled veterans has been issued by the Veterans Administration. Hospitals are classified in three groups — general medical and surgical, tuberculosis and neuropsychiatric. Nurses work an eight-hour day, six days per week, with rotating shifts and additional compensation for overtime.

OPA PRICE ACTIONS

Prices for the 1944 crops of a number of fresh food items have been set by OPA. Potato prices will be the same as for the 1943 crop except that for July there will be increases in the f.o.b. shipping point prices of 20 cents a hundredweight in Nebraska and 30 cents a hundredweight in Kansas, Maryland, North Carolina and Virginia—States in which adverse weather caused decreased yield. Retail prices of 1944 sweet potatoes—with a national average of about 10 cents a pound over the 12 months—will be lower than for the 1943 crop, OPA says. Retail prices for the 1944 red sour cherries for table use or home canning will be about 18 cents a pound with stems and sold in containers and about 16 cents a pound without stems and sold in containers. The f.o.b. shipping point prices for these cherries in containers will be 11 cents a pound with stems and 9 3/4 cents a pound without stems. Sold in bulk without containers the price is two cents a pound less than the container prices. Highest prices for fresh peaches for table use should range from 14 1/2 to 16 cents a pound, OPA says, as these peaches are now under price control for the first time.

MAKE CHAIN FOR FARM USES

To provide necessary chain for farm uses, WPB has issued instructions to chain manufacturers on filling orders for suppliers and dealers serving the farm trade. Chain that the WPB expects to keep available includes harness chain, wagon chain, cow ties, tie outs, halter chain, log chain under one-half inch and repair and lap links.

ROUND-UP

USDA says: In all States, farmers who need lumber for essential maintenance and repairs on farms may get preference ratings AA-2 or AA-3, as high as those assigned to any other civilian use. . . . Civilian butter supplies for the last half of this year will be shorter than for the first half, inasmuch as production during the next six months is expected to be lower than during the corresponding months last year and purchases for the armed forces are behind schedule.

Fines Creek News

By Mrs. D. N. Rathbone

Seaman James Green who has been on sea duty for sometime, is now spending a furlough here with his parents, Mr. and Mrs. Vance Green.

Mallie Woody has returned to Wilmington where he holds a position with the North Carolina Shipbuilding Company, after spending the past two weeks with his family here.

Mr. and Mrs. V. B. Green, and Mr. and Mrs. Lee Green spent Thursday in Sevierville, Tenn., where they visited the uncle of the former, Milas Green, who is seriously ill.

A. J. Rathbone has as his guests at his home near Max Patch, his daughter, Miss Effie Rathbone, Miss Bonnie Wines, Miss Beatrice Wines, Milton Blalock and Lester Brown, of Spartanburg.

Warrant Officer Robert Green, of the U. S. Navy, who has been serving in the Atlantic war theatre, is home on leave with his parents, Mr. and Mrs. Bob Green, in the Cove Creek section of Fines Creek.

Corporal Roe Ledford has returned to his post of duty in Arkansas after spending a furlough here with his parents, Mr. and Mrs. Sam Ledford, at their home in the White Oak section.

Fines Creek men in service who have been serving overseas, all seem to agree that there is no place like Haywood.

The crops in this area are much refreshed after the rains of last week.

A man went into an insurance office to have his life insured:
Agent—Do you drive?
Man—No.
Agent—Do you ride a bus?
Man—No.
Agent—Do you fly?
Man—No.
Agent (snapping curtly)—Sorry sir, we don't insure pedestrians.

Washing Pretties, Makes Curtains Last Longer

Washing is not merely a matter of prettying the curtains. It is a means of making them last. The sheerer and more fragile your curtains are, the more necessary it is to protect them by washing them as soon as they need it.

Before putting curtains into cool sudsy water, loose dust should be shaken out. Let them soak for about 15 minutes, then squeeze out the blackened water and place in fresh lukewarm suds, either in the washer or tub. Run the washer about five minutes for fragile curtains; eight or ten minutes for the more durable ones. Before going into the washer, lacy curtains should be put into thin pillow slips so the agitator will not break fine threads. For hand washing, a light rubbing against the washboard or between the hands may be needed to remove all the grime. Rinse, starch lightly, and dry on a stretcher or by hanging evenly over the line, being sure to square the corners.

Many curtain fabrics, especially those with a net or mesh weave, shrink during washing. This should be taken into consideration when they are purchased or made. If no such allowance has been made and the curtains have shrunk materially they can be re-lengthened by false-facings the top and bottom hems, or by adding fringe to the bottom hem, or by a bias fold of contrasting material.

Enact Laws to Govern Increasing Bicycle Traffic

Appearance of a growing number of bicycles on the nation's streets and highways since 1940, coincident with restricted motor vehicle transportation, has led many cities to enact ordinances and take other steps during this period to regulate use of these vehicles.

At present, three of every five cities in the country report an ordinance in effect for the regulation of bicycles, according to information to the American Municipal Association.

The information is based on an analysis by the American Automobile association of answers from 326 cities in a survey to determine the seriousness of the bicycle problem and steps taken to meet it. The survey indicated that about 54 per cent of the regulatory ordinances have been enacted since 1939.

Most of the cities require registration of bicycles, 118 requiring annual registration and 66 requiring registration whenever bicycle ownership changes hands. The registration fee charged most commonly is 25 cents, with 50 cents next in line. Three of the cities reported a \$1 registration fee.

Food Yeast Processing

Food yeast has a protein value twice that of meat and, more important still, is exceedingly rich in B complex vitamins. It costs as little as 10 cents a pound, and can be easily manufactured, shipped, stored and used.

The present manufacturing methods were developed in England in 1940. It is made from molasses and ammonia, and will soon be in full production in both this country and England. The process, a continuous one, consists of planting 125 pounds of this new yeast strain in a vat containing 7,000 gallons of water, a ton and a half of molasses and some ammonia. The yeast feeds on the sugar in the molasses, and the ammonia provides the nitrogen that the yeast converts into protein. Normally the yeast would ferment the sugar, resulting in alcohol, but in the aforementioned manufacturing process, the mixture is stirred by 1,000 cubic feet of air per minute, which prevents fermentation. The yeast multiplies itself about 16 times in weight in 12 hours and emerges from the vat as a ton of creamy mass which is then dried and ready for use.

Electoral College

Voters cast ballots not for the President directly but for electoral candidates, who are nominated in various ways according to state laws and who are pledged to vote for the candidate of their party. Each state has as many electors as it has U. S. senators and representatives combined.

It is the electoral vote and not the popular vote which elects the President. The electors meet on the first Monday after the second Wednesday in December at a site directed by their state legislatures to cast their votes. The ballots then are sealed and each electoral college appoints a member to deliver the vote of that state to the president of the senate. The senate and the house of representatives meet in joint session at 1 p. m. on the following January 6 to hear the vote counted.

Plane Production

In building a typical fighter plane, the first plane to come from the production lines, Model "A," took 157,000 manhours to build.

Tenth plane of that model took 59,000 manhours. By that time the engineers were beginning to discover ways and means to improve the ship, so the 13th plane was a slightly revised model—Model "B"—which still took 59,000 manhours to build. Despite design and model changes and changes in specifications, the 100th plane took only 26,500 manhours to build and the 1,000th, only 7,800 manhours.

Kelly Brothers Stationed In Texas

MR. AND MRS. J. M. KELLEY, of Waynesville, have two sons in the service. They are (left to right): Private Robert R. Kelley and Private James J. Kelley. They both entered the service on March 16, of this year and are now stationed at North Camp Hood, Tex. Prior to entering the service they were employed by Hyatt and Company.

HERE and THERE

By HILDA WAY GWYN

(Continued from page 2)

down the river from the dam. From its 400-foot walls come tons of rock, which is crushed. It is carried on moving belts over about two and one half miles of mountain side to a building that looks like a fancy silo. Here it is mixed with water and cement to become concrete. The concrete goes on another belt to a hopper at the end of the construction bridge, 420 feet above the river bed. This hopper is a sort of "Grand Central station" for the construction.

Looking down on the upper side of the dam, is about as impressive sight as we have ever seen. It is breath-taking to look down and then across the great expanse of mountainous area and to realize that soon water will cover the section. A staggering realization of how man and nature can work together, when experts plan the construction.

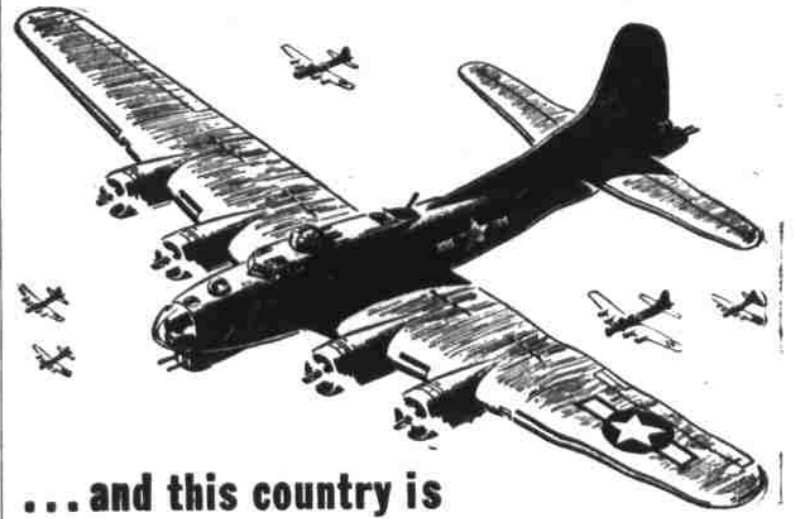

After the tour of the village and

construction area followed by the meeting, the trip was closed with dinner at the cafeteria. We were loath to leave, for we had been told that the sight of the men working on the night shift, with the area lighted by electricity with the "light of day," is of major interest. In fact we hoped to get back to view that very sight. Maybe we can get Jonathan to take us on that promised trip.

The ride back just after sunset along the winding road, which had lost its disturbing effects, with Mrs. Bryson taking her time, was a thing of sheer beauty. The reflection of the trees in the river and in Santeetlah Lake is beyond description.

Fontana dam makes one want to live beyond their allotted three score years and ten to vision the world of tomorrow, of which the project is a symbol of the vast changes and improvements that will continue to make America the greatest nation on earth.

It takes thousands of telephone calls to build a bomber

... and this country is making more bombers than ever before

More planes, more ships, more of everything for war mean more Long Distance calls. And right now things are moving double-quick.

Today with war in its critical stage, everyday is a rush day for Long Distance telephone lines. You can help keep the lines clear for war calls by making only really urgent calls.

More calls get through quicker when everybody helps that way.
