

TOTAL WAR...

Wounded Men Coming Home To America For Your Help!

This war has cost 566,000 army casualties

Army casualties! Think of these casualties as men like those closest to your own heart and then face the facts. The war mounts in fury . . . these wounded soldiers' needs mount hourly. Can you refuse to help them when the need is so great that the President must ask for a national service act?

Time is precious, so is this cargo of the DOGWOOD; which alone has returned some 31,000

wounded to the Charleston Port of Embarkation. Women's Army Corps Medical Technicians are needed to serve in hospitals. What are you women of Haywood going to do about these casualties which are YOURS? Must we announce to the world that our women would not volunteer to aid the wounded, but had to be forced? Wake up, America, this is TOTAL WAR!
