Roy M. Green **Tells a Farm Story**

By President Roy M. Green Colorado A & M College Fort Collins, Colorado @

Big crops and good prices left a If I don't invest this in inflated land values, what can I do with it to earn anything". I said to him.
Did you ever think of using part of it to pisme yourself a steadier farm meome after the war" For \$150 month or \$1,800 a year in War Bonds, you can begin to collect ten years after the war \$200 a month. As you will be getting older by that time, wouldn't that be a better supptement to what income the farm then produces than having to turn your wife can make out of chickens? Wouldn't it be a nice retirement fund for a fellow that is now 35 years old? Wouldn't you like to have had \$200 a month eash coming in last time" In addition, if you can put in War Honds a lump-sum as reserve for operations in bad years, for deferred purchases of equipment, for repairs for up-keep, for new household equipment; and then whatever the postwar adjustment, you would have an easier time of it than you had

You wouldn't have to wait on somebody's extra special plan; you sould have already completed one

It you are proud of the independence of your occupation, and jealous of preserving as much of it as pos-sible don't orate and speculateorder WAR BONDS
