

Home Agent Says "Spare The Sugar But Save Fruit - Can With Syrup"

Fruits may be canned without sugar, but sugar helps canned fruit hold color and flavor, according to Miss Mary Margaret Smith, county home agent, who gives a number of ways to can with corn sirup.

Unsweetered fruit should be processed the same way as sweetened fruit, points out Miss Smith. Corn sirup may replace up to one third sugar and honey up to one half. It is unadvisable to use molasses or brown sugar, as it gives a dark unattractive color and may cause spoilage, according to the county home agent.

Sweet spreads require more sugar than canned fruits and some families may choose to forego sweet spreads and use their sugar for canning.

Fruit butters are the most economical of the sweet spreads, requiring only half as much sugar as fruit pulp used. A pound of sugar will make three pints of fruit butter.

In jam and preserve recipes that ordinarily call for equal parts by weight of sugar and fruit, the proportion can be cut to three-fourth as much sugar. With this proportion, one pound of sugar will make around one and one-half to two pints or four to six jelly glasses of jam.

For jellies, Miss Smith advises a pound of sugar with a pint of fruit juice which yields on the aver-

Cpl. Paul M. Mull Served In 3 Campaigns

Corporal Paul M. Mull, of Waynesville, R.F.D. No. 1, who has served in the European theatre for sometime, has been awarded his third battle star, according to information received from headquarters of the 30th Division.

Cpl. Mull is attached to Company H, 119th Infantry, and took part in the Normandy, Northern France, and German campaigns. He had previously been awarded the Combat Infantryman's badge.

age one and one-half pints or about four glasses. When jelly recipes call for three-fourths to one part sugar for every part by measure of fruit juice, one may use the smaller proportion of sugar. Jelly making is a delicate art, and tinkering with jelly recipes is unwise. Failures mean the loss of precious sugar.

In using corn sirup put water and sugar in the saucepan and bring to boiling point. Remove from heat and use hot for packing fruit. Prepare the fruit and select uniformly ripe and perfect fruit. Wash, stem or pit according to type. Pack fruit into clean, hot jars, arranging compactly without crushing. Fill the jars to within one half inch to top using one cup sirup for quart jars, and one half cup for pints.

Adjust lid according to manufacturer's direction for type of canner. Process in boiling water bath for length of time shown on chart which may be secured from manufacturers of corn sirup. Place jars off bottom of pot, on rack; be sure water is boiling and at least two inches above tops of jars.

10,500.00 Messages Sent By Armed Forces Since '42

Over 10,500,000 expeditionary force messages have been handled by Western Union since June, 1942, between servicemen overseas and their friends and relatives at home, it was announced yesterday by Hilda Keener, local telegraph manager. Of these only 2,900,000 EFM's were sent from the folks at home. Those in service sent 2.6 to each one they received.

More than 400,000 EFM's were sent to members of the armed forces overseas in the first seven months the service was in effect in 1942, nearly 900,000 in 1943, and over a million in 1944. Around 100,000 a month are sent now. Messages from the servicemen to home jumped from 700,000 in 1942, to 3,200,000 in 1944, and are running about 300,000 a month now.

The EFM service provides 237 phrases from which a combination of any three is sent to or by a serviceman at a cost of only 60 cents. The phrases range from such terse expressions of affection as "Kisses" or "Love" to the more loquacious text No. 61, "You are more than ever in my thoughts at this time."

Frequently selected EFM phrases sent by servicemen and also by their families are "Are you all right? Worried about you" and "Please don't worry."

Other well-worn phrases are both reassuring and affectionate: "Writing," "All well at home," the popular "Darling," "All my love" and ever-welcome "Letters sent" or "Telegram received." Many thanks, or just plain "Well." Still others convey the news, "Son born," or "Daughter born."

In Italy

SGT. CLAUDE M. SUTTON, son of Mr and Mrs. Richard Sutton, of Waynesville, R.F.D. No. 2, has been awarded the Bronze Star, for meritorious service. The citation in part read as follows:

"For meritorious service in combat on 15 April, 1945, near Maslo, Italy. When a group of fighting men lost contact with the main elements of their company, Sgt. Sutton voluntarily moved out into a murderous peppering of small arms and artillery fire to search out the other elements.

"Although another soldier had been wounded making an attempt to establish contact, Sgt. Sutton weathered the lance of enemy fire and established liaison with his company. He then returned, organized the group of lost men and helped carry the wounded back to the main group. His highly significant conduct while under fire is admirably in keeping with the highest traditions of the United States Army and worthy of praise and commendation of the highest."

He entered the service in February, 1944, and was inducted at Fort Dix, N. J., and from there was sent to Camp Walters, Tex., for his basic training and has been overseas since December, 1944.

He has been awarded the Bronze Star for gallantry in action. At the time he entered the service he was employed by a glass factory in Salem, N. J.

S/Sgt. Zeb H. Smith Comes Home From Italy

Staff Sgt. Zeb H. Smith, of Canton, who has been serving with the Fifth Army's 91st "Powder River" Division in Italy, is returning home under the adjusted service rating system, according to information received from headquarters in Italy.

Sgt. Smith attended a farewell ceremony at which Major General William C. Livesay, the division commander, spoke. The general in part said, "It is your duty to continue this job, which is not finished. As a division is what you make it, so is your country. I wish each and everyone of you happiness and success in whatever you may undertake, wherever you may go from here. Good luck."

Sgt. Smith was a platoon sergeant with headquarters company, 362nd Infantry Regiment.

Woman Authority On Deafness Holds Clinic Here

MISS FAY HOLLIDAY Acousticon Expert on Hard of Hearing Problems

Miss Holliday, one of the country's foremost experts on deafness and a direct representative of Diagraph Products, Inc., manufacturers of Acousticon Hearing Aids for 43 years, will conduct a free clinic for the hard of hearing at LeFaine Hotel, Tuesday, July 10 from 10:00 a. m. to 5:00 p. m.

Hard of hearing herself, Miss Holliday has worn a Hearing Aid for years and is well qualified to make scientifically correct fittings of bone or air conduction. A free hearing test and private demonstration of three new models Futura Acousticons priced at \$79.50, \$99.50 and \$159.50 will be given. Eleven new receivers, an outstanding war development, are now being used in our fittings. We are indeed fortunate to have Miss Holliday here for this clinic and I extend a cordial invitation to you to consult her.

Home demonstration by appointment.

A New "House of Magic" for Postwar America

"... one of the strongest guarantees of progress and world peace is continuous scientific preparedness through industrial research."

General Electric has approved plans for a new \$8,000,000 Research Laboratory. This expenditure has tremendous significance. Scientific research has contributed much to our progress as a nation.

"Many things have been discovered during this war, and we can and must develop them into better things for peacetime.

"Today we have 550 research people on our staff. These new facilities will not only give increased outlet for their abilities, but will provide opportunities for new research minds with new talents.

"From this new laboratory we think new achievements will come. In the past, G-E research has contributed much to better living in America—not only through new developments in x-ray,

electricity, metallurgy, electronics and chemistry, but also through reduced cost and increased efficiency, as in the modern incandescent lamp.

"Even more than in the past the laboratory will emphasize research in pure science—continuing and expanding the work begun by Dr. Whitney and the late Dr. Steinmetz forty-five years ago.

"To find new facts of the physical world, to extend the limits of knowledge, is a forward step in creating More Goods for More People at Less Cost."

W. E. Brown
President
GENERAL ELECTRIC COMPANY

New 8-million-dollar G-E Research Laboratory will be built five miles east of Schenectady, New York, on the Mohawk River. The geographic location offers special advantages for television, high voltage x-ray, and radar research. Buildings with 300,000 square

feet of floor space will accommodate an expanded post-war research staff of about 800. Research rooms will be a scientist's paradise of equipment for experiments in chemistry, physics, mechanics, electronics. It is hoped that construction can start in six months.
