New Point System To Speed Army Releases

WASHINGTON—The Army reported yesterday it was revising its point system to speed up discharges and would reduce its strength from 8,000,000 to 2,500,000 men by next July 1.

War department officials, testifying before the House military committee, nevertheless supported President Truman's proposal to keep on drafting men for military service. They made no specific mention, however, of the Chief Executive's suggestion that only men 18 to 25 years old be drafted for terms limited to two years.

During their appearance before the committee they outlined plans for:

1. Establishing a point system for releasing officers—the present one covers only enlisted men.
2. Reducing from 85 to 80 the number of points required for discharge of enlisted personnel.

3. Barred from overseas duty all men with 60 points, a cut from 75.

4. Recomputing all points, now based on calculations made May 12, as soon as General MacArthur tells us he does not need any more combat men.

Maj. Gen. Stephen G. Henry, assistant chief of personnel, told the committee on recomputation would give men more points so that those overseas, who now have approximately 72 points will be eligible for immediate discharge.

Renew Seals

Your empty milk containers will make nice little discs to renew seals in jar lids. Cut the discs to fit and you will find they are just the right thickness and better than the layers of wax paper which many now use.
