Lions Sponsoring Magician Here On December 12

Announcement was made today that Birch, one of America's foremost magicians, with his company of assisting artists will play an engagement in this city on Wednesday, December 12, at the high school.

The Birch show is the largest magic production now on tour in this country. Equipment, scenery and effects valued in excess of \$25,000 are carried and will be seen at the local performances.

Slicing a beautiful girl into four parts, shooting a live canary into a burning light bulb, causing a live pony to vanish in mid-air, and many other startling mysteries will be presented by this master magician and company in a magic potpourri of thrills and fun.

The current tour is Birch's twentieth annual one, and his attractive personality makes him one of the most pleasing entertainers the magic world has ever produced. Thurston publicly declared that Birch is the only magician sufficiently talented to be his successor and the man he picked to "fill his shoes."

Heading the Birch staff of assisting artists is Mabel Sperry, hailed by critics as the world's greatest girl xylophonist. Miss Sperry charms music lovers everywhere with brilliant solos on her special built Marimba Xylophone.

The Lions club here is sponsoring the event for the benefit of their work in sight conservation.

OVERLOADED!

No one would expect an overloaded truck to operate efficiently. Neither should anyone expect electrical house wiring that is badly overloaded to efficiently deliver current to lights and appliances. You see, your house wiring is something like your plumbing—it can carry only the amount of electricity that it was designed to carry. And, if your wiring was installed several years ago when electricity was used only for old-fashioned lighting and perhaps one or two appliances, you can readily see that with your increased use of electric service, you may be overloading the wiring in your home. Such overloading results in inefficient operation of appliances and lights, and may make impossible the addition of the new electrical appliances you plan to buy.

Better have your electrical contractor check your house wiring now. He can install new circuits if needed and prepare your home for full enjoyment of electrical living.
