DDT, highly effective supplement o nature's own method of controlling insect pests, is still under inensive study by researchers and

he results of tests made to date are encouraging, according to spe-

cialists of the State College Exension Service. One of the early fears-that DD'I would destroy too many bees which are useful as honey collectors and particularly valuable as poilentz-

MacFADDEN IS GRANTED FINAL DIVCORCE DECREE

MIAMI, Fla.-Bernard MacFadden, 77-year-old physical culturist. was granted a final divorce decree from the British beauty contest winner whom he accused of "hu-

miliating" him by losing her trim figure during their 33 years of married life. The decree from Circuit Judge

Paul D. Barnes was awarded after a three-year court fight during which sensational charges frequently were written into the records. A separation at Paris in 1930

marked the beginning of the cud for the romance which had been tagged "a perfect union" when the couple was married in London. They had seven children. Much

of their domestic difficulties cen-tered around the children-Mrs. MacFadden, the former Mary Williamson, accusing her husband of endangering their health by ordering one child dipped in cold water daily and all of them to dance in

the open on wintry days clad in filmy garments. She claimed, too, that her business astuteness benefitted MacFadden. Displaying a photograph of her husband standing on his head. she testified: He would still be standing on his head except for me. I put him on his feet.
