

Lions Club To Have Musical Program Tonight

There is always something doing at the local Lions Club meetings, according to Rev. L. G. Elliott, chairman of publicity. Sometimes the Lions chase a fox, listen to humorous stories, enjoy the showing of pictures by amateur photographers and listen to learned and cultured lectures on various subjects.

Tonight at 7 o'clock the attendance committee will present Arthur G. Donhauser in a short program of accordion music. The guest is an accomplished artist not only in music but in painting, moulding and carving. Mr. Donhauser is a resident of Hazelwood. Lion Harvey Dulin will introduce the guest, and Lion Johnny Edwards, chairman of the attendance committee, will have general charge of the program.

The Melvin Jones membership contest will end with the meeting tonight. Also the attendance record for the month will be completed and reported to headquarters. It is important that every member be present for this last meeting of January.

Bowel Cleansing Power Of Inner-Aid Medicine

One man recently took INNER-AID three days and said afterward that he never would have believed his body contained so much filthy substance. He says his stomach, intestines, bowels and whole system were so thoroughly cleansed that his constant headaches came to an end, several pimply skin eruptions on his face dried up overnight, and even the rheumatic pains in his knee disappeared. At present he is an altogether different man, feeling fine in every way.

INNER-AID contains 12 Great Herbs; they cleanse bowels, clear gas from stomach, act on sluggish liver and kidneys. Miserable people soon feel different all over. So don't go on suffering! Get INNER-AID Sold by all Drug Stores here in Haywood County.

To those who are waiting for telephones

From now on our story is more cheerful for many who are waiting for a telephone.

With the receipt of larger amounts of telephone equipment, we will be in position to install telephones for those who have been waiting longest.

But there are places where we have complicated switchboards to install—even places where we must build new buildings for the new switchboards. In those places it will necessarily take more time.

We're working hard to serve those and striving to give everybody quicker and better service than ever before.

'Cuddleseat,' Latest Plan In Transportation, Expected To Become Popular With Mothers

CHICAGO—Mothers, this is the very latest thing in baby carriages—although the idea is a little old.

In fact, the idea was used by Indians a long time ago, and even before that, Mama Kangaroos had a modified version of this new-fangled baby knapsack.

Speaking of kangaroos, incidentally, brings to the origin of this latest device, because it comes from Australia. The inventor of the contraption, which is known as the "cuddleseat," doesn't say whether he got the idea from Kangaroos, but there might be a subconscious influence somewhere.

The man who invented the things is named W. Hancock and he lives in Maroubra, Australia, somewhere near Sydney. He fell awfully sorry for Mrs. Hancock, who had to lug the Hancock infant around in her arms.

So, deciding to make a bit with the little woman, he invented the cuddleseat. It looks sort of like a fishing reel and is carried over one shoulder pretty much the same as you would take a bunch of trout home. It's a canvas sling-like affair with a padded seat at one end. That's where junior sits.

When mama has to take the heir to the family fortune anywhere, she scoops him up, places

canvas strap onto her shoulder. Junior is left riding conveniently in midair somewhere around his mother's hip—like a side-saddle papoose.

Well, Mrs. Hancock liked the idea fine. So thought it saved her a lot of trouble and when she tried it on for size in public, women raved. The result was that Hancock's rich brother-in-law got interested in the thing and started manufacturing them, and the mothers flocked to department stores to buy them, promoters claim 100,000 of them were sold last year.

Then John McHoe, a Los Angeles businessman, got interested in the contraption and bought one for his wife. Mrs. McHoe liked the idea, so her husband got American manufacturing rights on the cuddleseat and began shipping them out to San Francisco and Los Angeles stores.

So, American women now have their chance to fix junior up with transportation. The cuddleseat will keep him from running around the grocery store, dashing in front of automobiles, and getting involved in the mazes of department stores. But San Francisco store owners are a little cautious in predicting the future popularity of the inven-
