Hard to get? Yes... Hard to pay for? No!

It is a problem, housing, that is. Homes can be bought but the price is likely to be high. Homes can be built, too, but materials are hard to obtain and delays are the rule.

All the more reason for going about the financing of the house you are able to build or buy with care and forethought.

Home buying need not be burdensome, or accompanied by a series of financial headaches. The Haywood Home Building and Loan Association aims to make it simple, inexpensive and everyday practical.

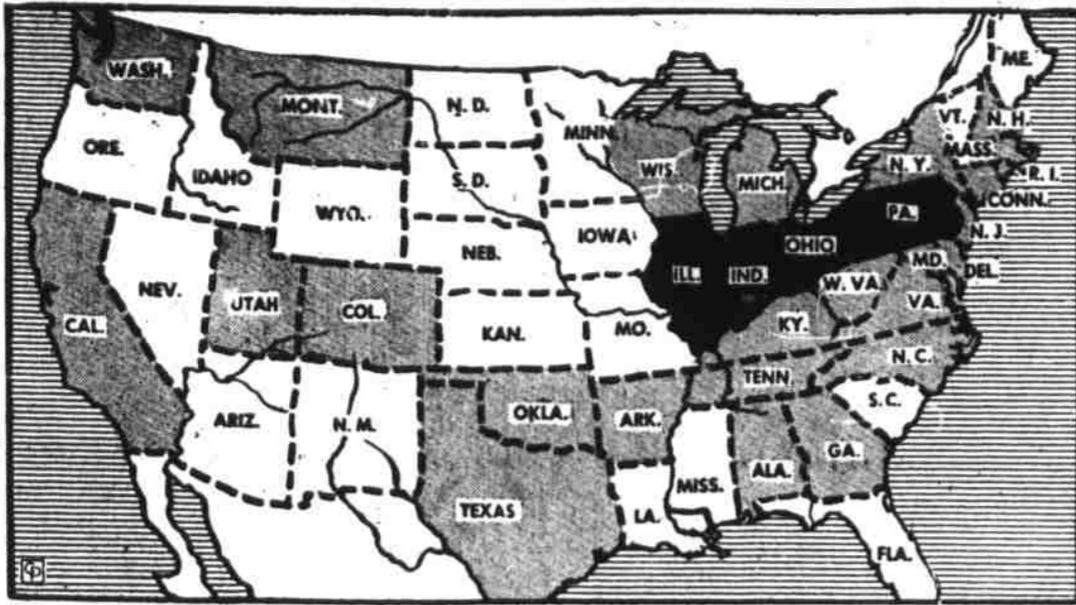

The Haywood Home Building and Loan Direct Reduction Loan Plan does just that... makes home ownership easy to achieve. It spreads the major share of cost over long periods, as long as 15 years. It provides for regular, monthly reduction of the debt. It holds closing costs to a money-saving minimum and eliminates broker's commissions or fees for making the loan.

Low interest charges, absence of renewal fees and full advance payment privileges make The Haywood Home Building and Loan Plan a preferred method of home financing. Ask for details of a loan planned to meet your requirements when you are ready to build or buy.

WHERE STEEL PRODUCTION IS HIT BY STRIKES

SHADED AREAS ON THE MAP show where steel plants are located across the nation. The black areas indicate the four States which produce about 72 per cent of the estimated total production of 95,505,280 tons. Pittsburgh is the "steel strike capital," and in this area some 350,000 workers are involved, whereas Washington has but two plants. The figures below show the tonnage by States according to recent figures.

Table listing steel production tonnage by state: Pennsylvania, 29,679,000; Ohio, 19,377,000; Indiana, 11,110,000; Illinois, 6,543,000; New York, 4,350,000; Maryland, 4,189,000; Alabama, 2,509,000; Michigan, 2,190,000; West Virginia, 2,186,000; California, 1,941,000; Utah, 1,283,000; Colorado, 1,272,000; Kentucky, 1,196,000; Minnesota, 610,000; Texas, 500,000; New Jersey, 463,000; Delaware, 460,000; Missouri, 426,000; Washington, 347,000; Massachusetts, 280,000; Connecticut, 168,000; Georgia, 154,000; Oklahoma, 43,000; Rhode Island, 40,000; Tennessee, 38,000.

Building Permits Total \$135,000 In Canton Area

Building permits, covering the construction of new buildings in the Canton area amounted to more than \$107,800 during 1945, according to figures released by W. Luther Snyder, deputy city clerk and tax collector for the town of Canton. Permits for additions to buildings and general repair work totaled more than \$17,004, the report revealed, making a total valuation of permits during the year just closed of more than \$135,000. Less than 75 per cent of the new building permits have actually been placed in effect as a result of scarce materials. Mr. Snyder said, but most of the applicants will begin construction as soon as materials are available.

PILOTLESS AIRPLANES TO CHECK ON STORMS

WASHINGTON — Pilotless airplanes will be sent into the heart of dangerous thunderheads to bring back vital information on storms and aircraft stresses. Announcing the tests which are expected to get under way about March 1 from Army and Navy bases in Florida, the Navy said its new radio-controlled FGF "Ghost" Helcats will be used. The purpose of the project, which is under supervision of the weather bureau, is to discover the safest flight levels at which planes can operate in a thunderhead and to analyze the stresses to which pilots and planes are subject in violent storms. Data will be recorded on instruments carried by the planes and studied after they have landed, ed, automatic cameras will take pictures of instrument readings while the plane is being buffeted by the storm. Much of the nation's reserve stock of lumber is depleted and timber production is short of the mark which foresters believe should have been turned out with proper care of woodlands.

BIRTHS

Mr. and Mrs. Gene Barrett, of Canton, R.F.D. No. 3, announce the birth of a son on Jan. 22nd. Mr. and Mrs. Odie Fish, of Cove Creek, announce the birth of a son on Jan. 22nd. WHAT'S AHEAD IN TELEPHONE SERVICE?

In case you don't recognize me in the turban, I'm Telephone Tommy...gazing into the future. What I see is of great importance to every forward-looking citizen of North Carolina. I see telephones in the future for all who want them. I see a lot of people with new jobs and steady incomes...more good customers for more businesses...added prosperity for North Carolina—all as a result of the tremendous expansion program started by the Telephone Company. This program involves the expenditure of more than \$300,000,000 in the nine southeastern states and means that the present investment in telephone facilities in North Carolina will be practically doubled in the future. So, I see the need for a heap of money. This money will have to come, as it has in the past, from the savings of hard working, thrifty people. Unless they have confidence in the safety of their investment and feel assured of a reasonable return on that investment, new funds for future expansion will not be forthcoming. So, it is easy to see that earnings have an important place in your future telephone service.

SOUTHERN BELL TELEPHONE AND TELEGRAPH COMPANY INCORPORATED

Have you ever worked in a store?

It doesn't take long, when you work behind a counter, to find out that when things are advertised they sell better than when they are not.

In other words, advertising means more goods sold and more manufactured.

And that means more jobs in stores and factories.

That's worth keeping in mind—advertising makes jobs.
