Household Hints

Shoes that are stiff after being worn in the rain will become quite pliable if vaseline is well rubbed in with a soft rag.

Clean the underside of rugs frequently, for dirt works through, and insects are likely to hide underneath.

To darn a hole in your son's sweater sleeve, baste a square of mosquito netting over the hole on the under side. This makes a firm base on which to do your mending.

If salt fish are soaked and cooked in milk they become much sweeter than when soaked in water.

Cat-stitch seams on baby's sleeping garments and underwear to hold them flat. Helps prevent needless irritation to his sensitive skin.

Should the loud ticking of a clock in the sick room bother the patient, place a glass bowl over the timepiece.

Screw a hook into the end of your room handle. You'll find it handy for reaching objects on high shelves, also the window shade pull that springs to the top. And naturally you hang the broom up by its hook in order to preserve the bristles.

Paint wooden knitting needles and crochet hooks with a coat of colorless nail polish the minute they begin to get rough or scratchy. Smooths them off. Make sure polish is thoroughly dry and hard before putting needles to use again.

For cleaning tiles in the bathroom and kitchen, use a soft cloth moistened with kerosene.
