Rationing Of Food Unlikely

WASHINGTON — OPA officials are pretty certain that rationing will not be resumed in this country, despite mounting world-wide hunger and misery. They claim that it would be almost impossible even to muster a staff to handle rationing in time to do any good, since the peak of the world food crisis should be over by the end of the summer.

However, OPA is still active in its crusade against black markets. The agency's Chicago area office says it's making an investigation to determine whether large amounts of cattle bought by easterners are being sold in an eastern black market. Major packers report sharp reductions in the flow of beef from their plants because they claim they cannot meet the competition of black market buyers and still observe ceiling prices.

Another black market—this one involving millions of dollars worth of used cars—is reported to have been uncovered in Detroit. A federal grand jury is expected to return indictments against persons connected with fictitious concerns handling sales for as much as \$500 over ceiling prices.

Meanwhile the long line of industries out to scrap price controls continue their attacks on OPA. The latest to throw support behind demands that congress abolish price controls, are the fruit growers. An attorney for the California Fruit Growers exchange claims ceilings are not needed because production in the citrus fruit industry is 50 per cent above the pre-war average.

A farm labor advisory committee has been formed in North Carolina to advise Extension Service leaders on problems now blocking the efficient use of a short labor supply.

EX-BUND LEADER HAULS BAGGAGE

FORMER HEAD OF THE GERMAN BUND in the United States, Fritz Kuhn—now interned in the Hohen-Asberg Castle near Stuttgart, Germany—is shown at work on his new job as baggage man for the camp. Kuhn served a prison term for his Bund activities in the United States, and was deported to Germany some months ago. (International Soundphoto)

Lions To Hear State Symphony Instead Of Meet

Instead of the regular program of the Lions club Thursday night, the Lions will meet at the Maples for supper at 7 o'clock and go to the high school to hear the North Carolina Symphony which begins at 8:00 o'clock.

B. L. Merideth, drug salesman for the Squibb's Laboratory, was the guest speaker last week. He told something of the manufacture of the new miracle drugs, penicillin and the sulpha chain. Charlie Woodard, a returned service Lion was reinstated to active membership at the last meeting. The golden tournament winners of the Waynesville basketball team were guests of the club. Carlton Weatherly, chairman of the membership committee, presided in the absence of the president and vice president.

Former President Hoover Now On European Trip

PARIS—Former President Herbert Hoover, arriving by plane on a fact-finding study of Europe's food crisis, said recently producing nations would ship 14,000,000 tons of food abroad between now and the July harvest, but that it would not be enough to satisfy all wants.

Much depends on the world's July harvest for a speedy solution to the threat of famine, he said. Hoover said he planned to remain in Paris a few days, setting up his headquarters and conferring with French officials, and then would leave for Rome.

He said he hoped to visit all food-short areas of Europe, but that he "probably will not go to Spain," which he classed among the needy nations.

President Truman says that a world food crisis has developed which "may prove to be the worst in modern times."

Wanted! Pied Piper For N. C.: Expert Says Rats Already Outnumber State's Population

RALEIGH—Is there anybody in North Carolina who can blow a mean flute? Or maybe someone interested in making their first million friends, would like to go into the rat exterminating business?

Anybody, yes, North Carolina would welcome anybody who could rid the state of its overwhelming rodent population. For, according to Charles B. Woodhouse, rodent control expert of the State College Extension Service, Tar Heel rats already outnumber Tar Heel residents.

Furthermore, they caused an estimated damage of between seven and eight million dollars to property, fowls and animals in the state last year. Each rat, Woodhouse says, is charged with an annual property damage of \$2. For example, a resident of Goldboro, scene of a recent rat clean up drive, reported the loss to rodents of 20 broilers, weighing between two and three pounds each.

The rats are becoming bolder as time goes by, Woodhouse declares, pointing out that many have been observed in cities during daylight, probably laying plans for a potential night raid.

Meanwhile, organized rat control programs have been completed in Smithfield, Mocksville, Coolemore, Goldsboro and Stoneville. Other drives are scheduled for Benson and Canton as part of the extension service effort.

Woodhouse says that more than 1200 pounds of red squill bait is used for mixing with raw fish, scrap cornmeal and oatmeal in a town the size of Mocksville. However, the newest rodenticide, 1030, while

widely used, is not set in areas which can't be closed to domestic animals because of its rapid lethal action. "The state could virtually rid itself of rats within three or four years," Woodhouse claims, "if each local community would conduct its own eradication campaign once a year."

Georgia Commissioner of Agriculture, Tom Linder, who aspires to succeed Arnall as governor, favors the immediate abolition of OPA.

TAMBORINI CASTS HIS BALLOT

IN THE FIRST PRESIDENTIAL ELECTION held in Argentina in a number of years, Dr. Jose Tamborini (at right) casts his vote, following his bitter campaign to unseat and eliminate politically Col. Juan Peron. The absence of violence, plus the number of votes cast in the election, attracted attention since trouble was expected. (International Radiophoto)

MODERN BLUEBEARD FACES COURT

IN OR OUT OF FICTION there is no parallel for the amazing case of Marcel Petiot, doctor and former mayor of Villeneuve-sur-Yonne, France, who boastfully insists that he murdered 63 persons—rather than a mere 26 as charged. Shown here chatting with his lawyer, M. Floriot, as his trial opened in Paris, Petiot seeks to defend his crimes as those of a patriot who killed only Gestapo men, spies and others seeking to escape France in war time. The prosecution says he murdered for profit and robbed his victims of valuable gems and money. (International Radiophoto)

Dated Tires

that's how Dayton keeps you up-to-date with Tire Improvements

Here's why—
Crude rubber is produced by nature.
Rubber from trees comes in only one form. Better tire compounds came slowly.
Synthetic rubber is produced by man.
The wonders of the chemical laboratory enable man to make synthetic rubber of many kinds, controlling its every characteristic almost at will.
Scientific improvements come every day.
Progress is swift! Today's synthetic tires are better than yesterday's. Tomorrow's will be even better.
How can you buy tires wisely?
Obviously, you and your dealer need to know when the tires were manufactured to be sure of latest improvements.
Buy dated tires by Dayton.
Dating is a new special Dayton service to assure you of the latest and the best in tire compounds and construction.

Look for the date on **THOROBREDS by Dayton**

DATING... a brand new service of DAYTON RUBBER RESEARCH to help guide you to a wise tire purchase
