

Dr. N. M. Medford Moves To New Offices On Main

Dr. N. M. Medford, dentist, has moved from the offices in the former Masonic Temple to the offices especially built for him on the second floor of the Noland building on Main street.

There is a large entrance into the reception room which has large windows opening onto the roof of the building in the back and glass brick windows separate it from the recovery room adjoining.

The reception rooms opens into the office, from which the laboratory, dark room and the three operating rooms may be reached. In the operating rooms are the latest dental equipment, including new sterilizers, cabinets and other articles.

The floors throughout are of asphalt tile and the walls of a delicate green.

A total of 23,356 inspections were made by the eight inspectors in the Weights and Measures division of the State Department of Agriculture during March. C. D. Baumert, who is in charge of this work, reports:

Of the 17,193 packages inspected, 12,600 were approved and 4,593 were condemned for irregularity in weight.

In the "deliveries of all kinds," five inspections were made, four being approved and one condemned.

Throughout the State, approvals on scales, weights, packages, dry measures, and deliveries ran 79 per cent, while condemnations totaled 21 per cent.

Ceilings Lifted On N. C. Potatoes

The State Department of Agriculture has been informed that price ceilings will be off all North Carolina Irish potatoes to be marketed between April 11 and June 26. It is estimated that over 50 per cent of Northeastern North Carolina's early commercial potatoes would be sold free of ceilings. This marks the first time since 1943 that potatoes harvested in this state have been marketed free of price restrictions.

COMMON DEGREE

Among the major tribulations of Col. George W. Goethals in the building of the Panama canal were the hordes of Washington politicians who periodically descended upon him to inspect, to question, and to offer useless suggestions. But the doughty colonel was more than their match.

One congressman, of the chronic double-breasted-coat variety, climbed up one of the 82-foot iron ladders that were embedded in the lock-walls, at the imminent peril of being hit with concrete from the great buckets that were flying about. Coming down from his dangerous perch, he strutted over to the colonel and said:

"What degree do you give me for that, Colonel?" Goethals smiled. "D-F-," he replied. (International)

Old Testament Too

Mutual Admiration

Sister—I wish you'd stop picking your nose! Brother (calmly)—Why is my picking my nose like that ragged riding dress you have on? Sis—Why? Brother—Because it's a bad habit.

Nature Study

Dora—Why are small birds always melancholy in the morning? Cora—I dunno. Why are they? Dora—Because their little bills are all over dew!

True Pessimism
