

### Good Turns Thumbs Down Short Bobs For The Women

COYLE ALLEN  
News and Observer

It is the style I would still say no. Clothes today are feminine, the way men like them, and short hair does not go with feminine clothes. Any man likes a girl to look, above all things, like a woman and not an imitation of a man.

An indication of the way it is in Hollywood was shown one day recently when a syndicate photographer went to the Warner Brothers Studio to get pictures of "this new short bob." After a hurried and unsuccessful search for a subject, a model had to be hired because among the Warner Brothers actresses, not one with short hair could be found.

Well, girls. That's the story—as Hollywood sees it. Looks like a swan song for the feather cut. For you, maybe, but not for me. Personally, I'll sacrifice glamour for comfort any season—especially during the summer months.

I can see the point in Hollywood's stand for long hair for actresses. They play such varied roles, including many period parts and of necessity must wear any number of hair styles. But I think they're grinding the axe too sharply in spots. For instance, a motion picture clothes designer says, "Short hair does nothing for a woman's looks. Hair should make a lovely frame for the face and the short bob does nothing for it."

Hollywood is a strange place. They crow about long hair vs. short hair, they are all for letting "women's crowning glory remain as it should be—long and beautiful," and what do they do but dye hair from one shade to another without a single quail.

I doubt if many short-haired women will lose sleep over what the Hollywood clan thinks of short bobs. Perhaps there are women wearing short hair who would look a sight better with long tresses, and vice-versa, but everyone to their own opinion.

Edward Stevens, dresses many top men's handkerchiefs in that short hair

Hollywood is a strange place. They crow about long hair vs. short hair, they are all for letting "women's crowning glory remain as it should be—long and beautiful," and what do they do but dye hair from one shade to another without a single quail. I hate to think what that must do to a crop of soft, lustrous hair.
