

Caravan Conference Monday At Lake

Heads Lake Group

REV. HOOVER RUPERT, of Nashville, will head the Youth Caravan Training at the Lake. The conference opens Monday for ten days. About 100 young people are expected to attend.

Corzines Honor Member Of Family With Reunion Sunday

A home coming was observed on last Sunday at the home of D. F. Corzine in Clyde in honor of Lynn Corzine, former resident of Haywood county who has resided in Everett, Wash., for the past 40 years, and is now visiting in Clyde. Among those present for the affair were: Mrs. Inez Cline, sister of Mr. Corzine, Tracy Cline and son, William, Mr. and Mrs. William McCallister, Miss Nina Taylor, Mr. and Mrs. Bozo Adams, and daughter, Mr. and Mrs. Joe Beaver, all members of the family of Mr. and Mrs. Cline, Mr. and Mrs. D. F. Corzine, Mr. and Mrs. R. W. Corzine, and daughter, Mr. and Mrs. J. E. Corzine and son and Mr. and Mrs. Carlton Corzine.

Household Suggestions

By RUTH CURRENT, N. S. State College

Perhaps your blankets are beginning to show the strain of yanking and pulling because they were too short to begin with. If so, there'll never be a better time to lengthen them with a strip of cloth something suitable, at the bottom. Although more than 11 million yards of wool went into blankets during the last quarter of 1945, supplies are still tight.

"Mothproof" containers alone do not eliminate the pest hazard. If they're tightly enough sealed, with no cracks, they keep moths from getting in from the outside but they don't prevent any moth larvae already lurking in the clothes from doing their dirty work. Hence the necessity for having the woolsens thoroughly cleaned. As an added protection, use a spray or flakes of naphthalene, or paradichlorobenzene, or moth balls—a pound for a small chest, 3 pounds for an average closet. The flakes or balls give off a gas which discourages the larvae from feeding and kills them if the concentration is high enough. As the gas is heavier than air and sinks, the flakes should be put high in the closet and renewed, if necessary.

Don't forget the wool upholstery on your furniture either. Frequent brushing and cleaning will help keep the moths away. It isn't safe to dress up your overstuffed chair and sofa with furniture covers for the summer and forget about the upholstery—not if it has wool in it. Better take a look at it once in a while, clean any spots and brush away the dust and any insect eggs that may be waiting to hatch out.

Miss Betsy Siler, who has attended St. Mary's Junior college last year has arrived home and will spend the summer vacations with her parents, Mr. and Mrs. Rutus Siler.

KING FAROUK AT GRADUATION

WITH ASSURANCE GIVEN that British troops are to be withdrawn from Egypt and future independence in sight, youthful King Farouk I is shown here in the gardens of Abidin Palace, Cairo, during a reception for Cairo University graduates who visited him. (International)

Air Show Slated For Week-End

Final plans are now being made for handling a record crowd at the Asheville-Biltmore airport on June 8-9 when the World Air Show stages a thrilling two-day exhibition of aerial maneuvers and acrobatics. The show is sponsored by the Asheville Junior Chamber of Commerce.

Advance ticket sales at the Jaycees office in the Langren Hotel, Biltmore Plaza, Edwin Bunge and at Standard service stations throughout this section point to an attendance of nearly 25,000 for the 18-air show.

Both Saturday and Sunday performances are scheduled to begin at 3 o'clock.

The show is directed by Jess Brisow of Miami, Fla., widely-known stunt flyer and king of the nation's power-manuever pilots in 1940 and '41.

Another feature of the performance will be given by Ted Schumuck of Atlanta, who puts his motorless sail plane through a series of loops, spins, barrel rolls and other hair-raising sky maneuvers climaxed by a single-wheel landing directly in front of the grandstand.

Other events listed on the program include a two-mile delayed parachute jump by Jack Huber of Miami, crazybatics by Miss Jean Broadhead, Denver, Colo., in a tiny Cub plane, take off and landing from the top of a speeding automobile and a forcing 100 special power diving through a solid wall of fire.

Cord Only Legal Unit For Sale Of Pulpwood

All pulpwood must be bought and sold only on the regular cord basis of 120 cubic feet in North Carolina, according to C. D. Bacon, superintendent of the Weights and Measures division of the State Department of Agriculture.

Prior to May 31 the 1945 legislation had permitted the use of measure of 100 cubic feet to be used in transactions of fuel and pulpwood but that now the law reads "the unit of said measurement shall be the cord and no other."

Mr. and Mrs. Sam Kneale, who have been residing in Waynesville for the past several months, are leaving this week for Kansas City. Mrs. Kneale, the former Miss Miriam Luckates of Canton, has held a position in the office of the Register of Deeds, and Mr. Kneale, a discharged veteran, has been employed by the Haywood Company. Mr. Kneale will enter the University of Kansas, following a visit with his family in Oklahoma.

Farm Questions and Answers

QUESTION: Is there any alternative for re-setting hair-damaged tobacco?

ANSWER: Yes. Because of the hard, knotty condition of most plants at this late date, it actually may be best to trim the damaged stem with a knife, loosen the dirt around the stem as it will take. This, of course, may be done only if a good part of the stem and the root system remain intact. A stem attached to a good root system will make rapid recovery and a good sucker will soon appear near the soil line.

QUESTION: How and when is the best time to take steps to control cabbage maggot?

ANSWER: Right now is the time. A four per cent calcium cyanide dust, applied during the first four days after the plants are set in the field, is the "huc." Right now these flies are laying eggs near the ground level or just below on the stem of early-planted cabbage and cauliflower. These plants tend to wilt on warm days after being attacked by the maggot. Dust applications should be repeated every 10 days.

QUESTION: Are cattle warts infectious?

ANSWER: Yes. Dairy cows with extensive warty growths on the udder or teats should be segregated from the rest of the herd, milked last and handled just as they would be if suffering from any other infectious condition. Warts of small attachment may be successfully clipped off and the stump treated with iodine. In many cases they may be tied off successfully. If warts are numerous removal of the growths should be supervised by a veterinarian.

Women's Feet Are Getting Bigger

BOSTON—Bigger feet are healthier feet, says Executive Secretary Maxwell Field of the New England Shoe & Leather Assn., exploding a popular belief.

Field claims sizes are up "about one-half size," but he's not worried. Women will be better off for it, he contends.

Anyhow, men's feet apparently have grown more because Field reports that many men outfitted properly for shoes when they entered the Army, found themselves wearing a whole size larger.

Its Time To Be Shopping

For Dad... for Father's Day

And while we don't have everything for him

You Can Find At RAY'S A Nice Selection

Including most of the things illustrated below

Caution--No Dress Shirts

Sorry but it does not appear that we shall be able to offer dress shirts for this occasion.

But We Do Have

Sport Shirts in a lovely group

SLACK SUITS

That will help Dad get through the summer shortage on clothing

HOUSE ROBES THAT ARE NICE

BOTANY WOOL TIES AT...\$1.00

PURE LINEN HANDKERCHIEFS

The First in Over Two Years

SOCKS...UNDERWEAR...ETC.

STRAWNS

If they are on the market... You'll find them at

RAY'S DEPT. STORE

Can't Help But Feel Better In A Good Fur Felt Hat

mention how much they improve your looks—we like to sell them here at Ray's

Just Received A new shipment including lightweights in nice colors.

Better Hats---With Snappy Appeal Like The One Above

second floor hat department where we feature excellent values at

\$4.50 and \$6.50

on our main floor at \$1.49, \$2.24 and \$2.98
