Editor W. CURTIS RUSS Associate Editor MRS, HILDA WAY GWYN W. Curtis Russ and Marion T. Bridges, Publishers PUBLISHED EVERY TUESDAY AND FRIDAY HAYWOOD COUNTY AND SERVICE MEN \$3 00 One Year Six Months 1.75 NORTH CAROLINA \$4.00 One Year Six Months 2.25 OUTSIDE NORTH CAROLINA \$4.50 One Year Six Months 2.50

Entered at the post office at Waynestille, N. C., as Second Chase Mail Matter, as provided under the Act of March  $\beta_{1}$  [1879, November 29, 1914.

Oblituary notices, resolutions of respect, card of thanks, and all notices of entertainment for profit, will be charged for at the rate of one and a hulf cents per word.

In the passing of Ernest J. Hyatt, this community has lost one of its most worthwhile and progressive citizens. Mr. Hyatt was a builder in every sense of the word. With sound business judgment he applied his talents to his business and to the affairs of the community.

He gave the same consideration to civic and church activities that he gave his own personal affairs. Modest at all times, he never sought the limelight, but his recognized ability drew others to seek his advice on all matters of public interest.

Though conservative, he was progressive, for his attitude of weighing things before taking action inspired others with confidence.

### Summer Theater

Players and patrons of Tampa's Little Theatre are interested in the announcement that Maurice Geoffrey, the theater director, is opening a summer theater in Waynesville, N.C. He is taking with him several professional players who have been wintering in Tampa and students from this area. The summer theater is sponsored by the Waynesville Chamber of Commerce.

Tampans vacationing in North Carolina will have the opportunity of seeing good plays and the group will advertise Tampa to visitors from other parts of the country. This gives Tampa more ambassadors of good will.

# Hay Fever Again

What do we do about hay fever? This being the part of year when this malady affects some people, we have looked into the subject to gather a little general information about what causes it and what can be done to keep it down. Western North Carolina, remarks a local

physician, is about as free of hay fever as any section of the country. Still there are some who find themselves sneezing, their eyes getting red and swollen, and suffer the discomfort of hay fever-or as it is sometimes called, bronchial asthma.

What are its causes? There are many. The pollen from ragweed which blooms here in the autumn is looked upon as one of the principal causes. However, dust itself, the pollen from a great variety of grasses and flowers irritate some people. The emanation of animals and birds bring hay fever to others

The individual who wishes to do something about his hay fever must first find exactly what brings his on. Very likely it is more than one plant or one type animal. Medical specialists in this field determine this by giving skin tests. They take whatever is suspected as the cause, put a sample of it in a small slit in the sufferer's skin, and after testing the variety of items can tell from the skin reaction just what that individual is allergic to.

With the cause definitely known, the suf-

### ferer can then use precautions not to come in contact with it. If it is animal hair-no cats or dogs should be allowed in the house. If it is a certain type of grass or flower, don't grow them near the house and avoid fields in which they grow. There is no "cure" for any fever, only means of relief to one suffering from it, and the best step a person can take is to keep from coming in contact with what causes it. It has no special season, except that few persons are bothered seriously during cold weather; for some find spring plants and flowers bring theirs on, a few are affected during summer months, and a larger number suffer when autumn dries up the growth and winds blow the ripened pollen across fields to the nostrils of unfortunate individuals.

### The 100 Men

The past years, among other things, have been a lesson in geography to Americans, those with formal education as well as those who rely upon experience as their teacher. The list of Army dead from Haywood County calls attention to how the events of far-away that much prophesied depression places have a direct bearing upon our lives.

One hundred Army men, and this honored roll will be added to by the Navy and Marine Corps, were left on the battle field of little Pacific Islands, the rocky grounds of North Africa and Italy, on the roads leading to Manila, in the snow of the Ardennes and on the hedgerows of Normandy and concrete of like him who met death with courage and faith that we would carry the Siegfried Line. Ships that carried supplies to Russia and planes that flew bomb on. We have had many ideas ourroutes to Berlin were manned by Haywood talk began here, and the longer County men alongside of New York and Cali- we think of the matter the more

### Match Factories

Match factories today house not nly the chemical and manufacturing plants to make matches, but also make their own boxes for the stand that some of the Brass and several politicians placed wreaths matches, the cartons for shipping, on the tomb of the Unknown small garden and operate the printing plants which produce multi-colored ad vertisements on the covers. The oldest book matches with advertising were not only hand-made but hand-printed. The labor and time consumed in these operations made the cost high, one of the contributing factors in the early unpopularity of this type of match.

#### First Movie

The Edison kinetoscope made its first public appearance in New York April 14, 1894, but the commercial career of the motion picture began with the presentation of the Armat machine as the vitascope April 23, 1896. The first picture, "The Life of an American Fireman" offered in 1903, was without a plot. This was followed by the first story picture in 1905, "The Great Train Rob-In 1927, Al Jolson appeared bery.' in "The Jazz Singer," the first picture with spoken sequences and the

first all-talking picture, "Lights of

New York," appeared the following

year.

A NEW SOCIAL distinction, says Grandpappy Jenkins, may soon appear: Those who stand in a line awaiting to buy a loaf of bread and those who line up in hope of nylons.

### The Fourth

Haywood County put aside her cares on the Fourth and met on the grounds of the Waynesville high school in a holiday mood. The day was spent in wholesome amusement, with a serious hour given over to a speech by Monroe Redden, Democratic nominee for Congress, who touched on the problems of the day.

His speech was timely, for nowhere could such a day of relaxation and cooperative pleasures be combined better than right here in America. He spoke of peace, and how we Americans are peace loving.

Perhaps one reason for the keen enjoyment of the event was the fact that not so long ago we could not have enjoyed such a day, but now we start life over again, with hopes of peace. The contrast of this July. 1946 was quite different with those of the past four years.

We congratulate the Boosters Club for their sponsorship of the event, which we feel sure will continue to grow as a set feature of each year's program of amusement in Haywood County. With Canton centering the interest on Labor Day, it is fitting for this section of the county to also have its day, when the county joins hands in a celebration.

We would also like to offer congratulations on the type of entertainment offered, and the fact that there were no side shows, nor any gambling devices to tempt a person to spend "his last dime"-and yet there was plenty of amusement for all ages.

We look forward to another year-and another Fourth of July, sponsored by the Boosters Club.

A friend of ours took up beekeeping as a hobby, and it has developed into a profitable business. Which again proves that in selecting his life work a man should choose the thing he likes to do.

N BO

fornia boys, Canadians, British, French, Australians and men who had escaped their conquered countries in Europe and Asia. On the same team were the undefeatable Chinese and Russians, fighting for the preservation of liberty as they know it as we fought for our own ideals.

Now that the fighting is over and we can assess the cost in lives, money and materials. we are returning to "normal" times of peace. During the war we spoke and listened to an accounting of the failures following the last war and what should be done to prevent another. Now that the task of doing these things is with us, our efforts towards unifying the world under a common police force. the delegation of international controversies to our United Nations is becoming a difficult job. Unrest and fighting never end with the peace treaties, as we can see now in the news from China and the tension and hunger in Europe.

We do not know if the 100 men could speak Editor The Mountaineer: now what they ask that we do. Perhaps they would say "We have gone out over the whole world to fight and die. We did not give our lives in vain, for we won the fight. We have given you who fought with us and you who supported us at home an opportunity and you now have the strength for leadership . . Whatever others may do, do the best you manner in which you are giving know how. The responsibility rests with you all."

Of course that U.S. Senator had his tongue in his cheek when he suggested that John L. Lewis be appointed ambassador to Russia and he evidently doesn't like Russia or Stalin. The Senator put it this way: "Lewis would fit in well in a country where they follow his rules of "I won't play unless you play with my marbles,"

# Restraint is the Watchword

No one can say at this moment whether OPA is to stay dead or return to life. While the issue is being debated we will do well to keep our heads . . . manufacturers and retailers on one hand and consumers on the other. There will be no upward surge of prices if buyers do not scramble for goods. Conservative buying of nedessities only is the way to hold the price line. Let's all be reasonable. Self-control will save the day.
