Unwise Marketing

The North Carolina Department of Agriculture through the cattle marketing specialist, T. Lenoir Gwyn, issues a timely warning it seems to us. Mr. Gwyn says, "the tendency on the part of producers to rush their animals to the market before definite action on price control on August 20, is unfortunate from both the producer and consumer standpoint."

No doubt cattle that are fed and ready for the slaughter should be marketed now in numbers consistent with the demand, points out Mr. Gwyn. An expensive feed bill can be stopped and the consuming public is willing and anxious to pay better prices for better

There is grave danger to both the producer and the consumer in the rush of half-fat, immature cattle to the already overcrowded markets, according to the specialist.

Such cattle in competition with the better grades now coming on the market are likely to suffer sharp decline in price and will mean scarcity later on in our meat supply, it was pointed out by Mr. Gwyn.

Regardless of what the OPA does on August 20th, there is little danger of any very great decline in price of well finished cattle any time soon or any surplus of meat or meat products.

be to check the present liquidation of unfinished cattle until ready for the market. A steady flow of animals to market and consistent and dependable prices are far more to be desired in the long run than violent fluctuations such as we have had since the control was lifted on June 30,

Guard The Soil

We reprint the following we read during the week as a warning lest history repeat

What set the sage for the great drought of 1930-36, the dust storms and "dust bowls." and ecoonmic disaster for thousands of prairie and plains farmers, was the huge demand and high prices for foodstuffs after World War One. Farmers plowed up 30,000,-000 acres of marginal land, most of it suitable only for pasture in all but wet years. and put them in grain.

America faces much the same conditions now. And the pressure of prices and actual shortages is growing stronger. But the defenders of the land are stronger, too. Since those memorable spring days when cities like Salina, Kansas, were literally snowed under by blankets of wind-blown dust, soil conservation has come to have real meaning. Contour plowing and cover crops are familiar terms. People don't laugh at shelter belts

What was once branded as "a lot of expensive ideas of Government theorists." now has backing from farm organizations, railroads, banks, and even churches which have large rural memberships.

But, at that, the cause of the soil will need all the help it can get. Today offers strong temptation to speculative "farmers." who for big, quick profits will "mine" the land and get out. That is irresponsible tampering with the nation's future. Not even the richest country can stand much of it.

The price of Swiss cheese has been cut possibly to make allowance for the holes .-Indianapolis News.

12 Rules For Housewives

The supreme duty of every American family now is to help save the lives of starving men, women, and children, and babies in foreign lands. Millions of them will die in . agony unless we deny ourselves. Look at your own children or grandchildren or your own aged parents and imagine them likely to starve in 90 days unless Europe helped them. Well, it is now our privilege to help Europe just as we should in the same case pray for Europe to help us.

The Associated Press, after interviewing the foremost experts in Washington, has given American housewives 12 simple rules by which they can help save the world's starving millions. See how many of these 12 rules you can practice every day in your own home, as follows:

Don't overeat.

Never overserve a guest.

Give each person only one small slice of bread or its equivalent at a meal.

Use dry leftover bread in toast, puddings, and stuffings. Never throw away a piece of bread or a teaspoonful of fat.

Don't fry meats, poultry, fish. Bake, boil, or stew them.

Use fresh fruits, berries, etc., for dessert instead of pastries.

Serve open-faced sandwiches. Or better still serve vegetables, salads instead.

Stow bread in moisture-proof wrapping in a refrigerator. This retards mold,

Cut out dry cereals as much as possible, Substitue oatmeal, grits, etc. Potatoes also make a fine breakfast dish.

Serve homemade salad dressing, vinegar,

or lemon sauce instead of rich salad dress-

Use meat drippings to flavor vegetables. dressings, sauces.

Make sure you throw away nothing as garbage except bones, eggshells, and uneatable parts of fruits and vegetables.-From The Progressive Farmer.

Not Even Mentioned

A recent pamphlet entitled "Points of Interest in North Carolina," sent out by the State Department of Conservation is quite attractive on the outside and lists spots of interest in the state, taking both the Eastern and the Western parts. It is printed in green ink and is suggestive of summer trips.

As a citizen of Haywood county we wish mend the department on the issuance of this information, though in brief form it publicizes many of the attractions of our state. which offers such variety both of historical interest and natural beauty.

As a citizens of Haywood county we wish to register our complaint that we feel in the "Western section" there is a serious oversight. Points of interest are listed in Buncombe county, Burke, Graham, Henderson, Jackson (many mentioned) Macon, Transyl-A wise policy in Mr. Gwyn's opinion would vania, Swain, McDowell, and others, but and Glenn Palmer to pass a law never a reference to Haywood county.

> Do not get us wrong, we are happy for our advantages of macriage in your neighbors to come in for such fine advertising . . . not only for their own benefit, but also for ours, for the prospective visitors will to be married on your own native have to pass this way in order to reach many of the spots. We will have a "passing" acquaintance with them. But we feel that in listing the attractions of the West, Haywood should come in for at least mention.

For instance compare the impressions of Barber's Orchard, the largest apple orchard look forward to the day when they east of the Mississippi, and Jackson county's Grimshaw post office, the smallest in the world, the latter is listed but never a reference to the former. Lake Junaluska might Mr Medford, who was all excited daughter on July, 24 have been moved North when the Southern and the Northern churches united as one, as far as this pamphlet is concerned.

We could make a lot more comparisons, but maybe that would be boasting too much. for we do not wish to discredit the points of interest in any section, but merely wish to suggest that next time Haywood county be

listed among the other counties. The root of the trouble is that few North Carolinians know their state. As we have recorded from time to time, we have often thought what a fine thing if some enterprising bus company would organize "See-your-Own-state-tours," and let the East and the West learn something about each other.

The people who come to the West from the East are always surprised at the few North Carolinians they meet here, among the large number of visitors who visit this section.

Russia, we are again reminded, now pays workers according to their worth. It will learn, in time, as others have, that some won't work that cheap.-Detroit News.

"Japs to Get 'Soap Opera' "-headline. No better than a defeated enemy deserves.-St. Louis Post-Dispatch.

We hope that Washington soon discovers what this country needs is less fact-finding and more fact-facing.

HERE and THERE

Handicap to Children

By CARRY CLEVELAND MYERS, Ph.D. 1

UNFORTUNATELY, some parents, because they think of the young child as an object of curiosity rather than the precious personage he is, suppose that his infantile speech is "cute." This attitude becomes a great handicap to the youngster as he enters school. His speech suggests to his teacher or schoolmates that 'e istill much younger than he is.

Come of his utterances, indeed, may cause him to be laughed at, when the effect on him may be very harmful. Looking forward to your young child's first day at school, you should carefully consider these matters.

Most children have trouble with certain sounds, in their early years; a few even after they enter school. Samples of such are d for g, t for e, ch for q, b for v.

Rhymes and Stories Until the child has a pretty good start at speaking, it were better not to bother about these wrong sounds, speaking yourself very clearly and distinctly as you tak or read to him. You might select some rhymes or stories to read often to him, which contain these

Occasionally, you should say the correct sound after him nonch ; lantly but not insist then that he repeat after you. He may be more ready to co-operate with you when he is four, five or six, than earlier. But to succeed, you must use infinite patience, tact and wisdom in order to make him want to cooperate with con. Better not try to correct be when others are

present nor when he is earnestly telling you something.

Indeed, you should never interrupt him or break in on a sentence. When, however, you feel very calm and affectionate and he good-natured, gently repeat clearly the right sound or word at the end of his sentence or remarks. Show strong approval as he succeeds, but no disappointment as he fails. You even might induce him to look into a mirror at your mouth and his as you and he in a kind of game make these sounds which are hard for him. (I have a new bulletin, "The Young Child And His Speech," to be had in a stamped envelope.)

Young Child's Grammar Be not concerned about you

young child's grammar. If you hold yourself to accurate use of English and read a great deal to him until after he enters school, he will hardly make many grammatical errors until he learns them from his playmates. Even then, it need not be a matter of concern to

Please do not interrupt him to correct his grammar nor show ir-ritation over it. Now and hen calmy say correctly what he has finished in bad grammatical form but don't insist he repeat it after you. If you continue to use good English and betray no vexation over his errors of speech he, wishing to seem grown up, will gradually choose to speak correctly, especially after he is ten or twelve

Some Grammatical Mistakes by Parents and Children," is a new bulletin of mine which may be had in a stamped envelope.
