He also alluded twice to the American 105-MM gun, saying that the British "liked it very much He also appeared greatly impressed by the sports program conducted at West Point, which he visited recently, and the methods of classroom instruction-"jolly good, extremely good, the way the stuff was got over in the classrooms. He was "terribly impressed" with the military academy itself -"thought it absolutely the cat's whiskers.

Montgomery's discussion of British army reform along American lines was louched off by the question whether he is here to discuss closer co-ordination between the American and British armies at command levels from the general staff down to divisions and in simtlar types of equipment, so that they might fight together even more effectively than in World War II in case of a third war.

The Field Marshal replied in general terms, alluding to some of the equipment interchanged during the war, and observing that with the war over "the natural tendency would be for professional soldiers to at down and think if the other to my hasn't got a better

As for prospects of peace in Europe, he remarked, "Ah, that's political," and he had made it emphatic at the outset of the session building that he was not going to answer any political questions.

State Highway Traffic At High

RALEIGH-North Carolina highway traffic last month smashed all previous monthly records.

James S. Burch, engineer of statistics and planning for the state highway and public works commission, said that August's volume exceeded the previous records of August, 1941, when new vehicles were being purchased in unprecedented number.

On the average day of last month 56,219 vehicles passed the 20 fulltime electric-eye counting stations in North Carolina, as compared with 54,987 in August, 1941. Last July the figure was 54,600.

Please Read this Notice of Request For Increase in Telephone Rates

Your Telephone Company has found it imperative to file application with the North Carolina Utilities Commission for higher rates on business telephones and on most long distance calls within the state. This action was taken because telephone earnings are dangerously low and reasonable earnings are required to furnish adequate service. We ask that you read this message carefully so you will understand clearly why increased telephone rates are necessary.

Your telephone rate is low and it is the earnest desire of your Telephone Company to keep it low.

While your rate has remained the same for many years, the total cost of furnishing telephone service has steadily gone up. Since 1941 our expenses for North Carolina operations have increased more than 102 per cent, while revenues increased only 76 per cent.

Wages Up \$2,311,415

Much of the increase in expenses is represented by wages, since wages make up the greater part of the cost of furnishing telephone service. In keeping with the general trend of wage increases throughout the country and to assure through competent personnel the provision of an adequate service, telephone wage rates have been raised \$2,311,415 in North Carolina in the past 12 months.

Since the first of this year, 36,000 new telephones have been installed in North Carolina, but 23,000 people are still waiting for telephones. This demand forces us to build new facilities now, in the face of high costs. The cost of erecting buildings has jumped 75 to 100 per cent; the cost of erecting telephone facilities is up 45 to 60 per cent and the cost of telephone materials has increased 15 to 25 per cent. Despite these high costs we must continue to improve telephone service generally, and to expand it. Our plans call for gross expenditures of approximately \$40,000,000 for telephone construction in North Carolina during the next five years.

Pay-Out Is Increasing Faster Than Take-In

With the tremendous increase in the expense of furnishing telephone service and with rates unchanged for years, we telephone folks, and there are over 4,300 of us in the State, have had a difficult time making ends meet. So much so, that today we find ourselves confronted with the lowest earnings in our history in spite of a record volume of business.

No business can long continue to render service when the amount paid out to provide that service is increasing faster than the amount taken in. Therefore, it is our duty, as your public servant, to report this condition to you

since it directly affects your telephone service. We must appeal to you for relief through the North Carolina Utilities Commission, which regulates our rates.

Increase Placed on Business Telephones

The requested rate increase for local service would apply to business customers only and would be on a sliding scale depending on size of locality. Authority is also being asked for an increase of 5 cents on most long distance calls within the state.

Today's high costs indicate a need for greater increases than we are asking, but it is hoped the proposed new rates will prove sufficient. In view of this, no increases are being requested on residential service. Your Telephone Company feels that it is to the best interest of every business man in North Carolina that residential rates remain as low as possible.

The new rates we are asking represent an increase of only 7 per cent of our total revenue in North Carolina. This is small when compared with the increased costs of doing business. In fact, even with the new rates, long distance charges generally would be lower than they were 21 years ago and business rates only slightly higher, while service has been considerably extended and its value has been increased many times.

Southern Bell wants rates no higher than necessary to furnish everyone with good service and expand it. The proposed rates are the very minimum increases we can get by on. In face of rising costs, they are very modest.
