Veteran Coal Needs Survey Is Underway

Results of Survey Determine Amount Of Fuel Allotted Haywood Veterans

A coal need survey for veterans will be made in Haywood county to determine allotments to be given the veterans, it was learned this week from James Harden Howell, Jr., county service officer. All veterans who will benefit from the survey are asked to contact the service officer or others at their earliest convenience who can supply the necessary blanks.

The blanks for the desired information will be ready for distribution at the office of the service officer here on Saturday, October 12, and must be returned by the last week in October.

All veterans, who are married or who are responsible for fuel needs for other dependents, are asked to fill out the blanks, stating their estimated coal needs from November 1, to April 1, 1947.

The amount of coal the veterans will be allotted will depend on the results of the survey, so complete cooperation is urged by the service officer.

The data obtained from the survey will be passed on to the Solid Fuels Administration which will determine the amount of fuel to be allowed, based on the number of veterans maintaining bona fide homes for themselves and their dependents.

When the findings have been compiled and coal allotments made coal tickets will be issued in this area to the veterans on the basis of their proportionate needs for fuel.

The blanks may be obtained at the office here of the county service officer and in Canton are of the county from Lorenzo Smathers, head of the V.F.W., Jeter P. Williams, commander of the Canton post of the American Legion and J. L. Sprinkles, Jr., at the Canton Ice and Coal Company. Blanks are also being distributed by the veterans' organizations in the county.

Mr. Howell may be contacted in Canton during his office hours there on Tuesday afternoon and all day Friday.
