TUESDAN, OCTOBER 28, 1947

National Ajople Week

This week Hayw ood county joins with the rest of the nation) in the observance of National Apple Week. It is only litting that we here in Haywood recognize this occasion, because right here in these hills are grown some of the most delicious apples to be found anywhere,

During the past few years. Haywood has seen a little lax in advertising the apple crop. The market has been good and eager buyers were on hand before the crop was harvested or haul them to market. A score or more cears ago, Haywood's reputation for growing celicious apples was known far and wide. Apples from here even received distinguished a wards in foreign apple shows as well as in all parts of the nation.

Our neighboring county, just across Piscah, Henderson, realized last spring that something must be done to attract buyers to their orchards, so they successful staged an A ple Blossom Festival as one means of gettrig national publicity focused on their apple crop.

Here in Haywood this week, merchants and other business places are displaying Haywood grown apples.

One grower lamented last week that the ioin and wind of two days blew some 1,500

Industrial Growth

Recently a special committee was named in Asheville to make a study and survey of the facilities of Buncombe county, for the purpose of bringing in more indust; ies. The committee has gone to work.

Now comes the news from the Eastern part of the state, known as the "agriculture empire" according to the Smithfield Herald, that the farming is not enough, they must have industries.

Johnston county is one of the most progressive and prosperous agriculture counties in the state, yet the leaders realize that as mechanized farming expands that the number of displaced farm workers will increase.

A number of communities realizing the importance of industry to the economic stability of the community, are leaving no stone unturned to induce new "smokestacks" into their borders.

There is another side of the picture that should not be overlooked-there are some communities which have industries, yet the community as a whole do not seem to appreciate them. That is a pathetic situation.

Getting industry is one thing, and an important one. Helping industry after they have established in your community is another thing, and even more important than getting them in the first place. What a blackeye it is to a community to have a thriving, profitable industry leave a town.

And don't think for a moment that such a thing cannot be done. Just take a look at hundreds of plans that have changed their address from New England towns and moved South.

Take an example closer home. Enka is county. It is the granite grey of building a gigantic plant-not beside the one in western North Carolina, but in Eastern around with the cameo-like lines Tennessee.

This matter of getting and keeping industry deserves our attention.

Crime Is Crime

The latest silly attempt to load a heavy be like the New Yorkers. They burden on taxpayers is for Uncle Sam or North Carolina to appropriate millions of dollars for alcoholics on the theory that drinking be there ..., and they can go any Continued on Page 2, 2nd Section too much is a disease and not a vice.

We are also told that sex crimes are not crimes at all, but are caused by disease, and that stealing is not stealing but is caused by an irresistible impulse. The next thing will be to coddle murderers on the ground that it was disease and not vice that prompted the killing.

Crime is crime, and it will be increased by IN ART WORLD such maudlin excuses as are now being of-

fered by those who violate the "Thou shalt nots" of the Almighty.. and the sound statute law to protect people from the effect of criminal acts.

MIRROR OF YOUR MIND

Can wives make too many sacrifices?

Answer: Decidedly. To begin with, few of us are free enough from childish impulses to resist the chance to take advantage of a person who seems to invite such treatment, so that too "unselfish" or "self-sacrificing" wives breed selfish, inconsiderate husbands the way dampness breeds mosquitoes. Furthermore, even such wives are human at heart, so that as a rule they end by growing bitter at their husbands' failure to "appreciate" them. Mutual honesty and fairness alone make a permanently happy marriage.

shels of choice apples from the trees, but there was no question whether there would by a market for them, since truckers did not m interested this year in hauling fruit to 11. market. The better grades of hand-picked apples have found a ready market from the is ginning of the season.

Haywood needs to get busy and regain the st inding in the apple world which we once h.d. We still have the quality of apples, we soll have an abundance of fruit, and capable o mers of orchards. All we need is to exert a little energy in the right channels to regain the distinction which is rightfully ours.

Autumn Mirage

Spring we may welcome more heartily, Autumn we are the more loathe to let go. "fhe days, shortened by early twilight, become yet more precious, as do most things when demand begins to exceed supply.

Over our autumns impends always that feeling of imminent departure. Autumn is like a short sojourn in some far and lovely land. From every peak we climb, from every tower of momentary delight, from every window looking on the year's sunset-we can see in the darkening harbor the shadow of a great ship. It is a vessel built for long and arduous traveling through work-a-day oceans back to a work-a-day world.

No other season builds this strange mirage. Winter, spring, summer, lead each to the very doorstep of the other.

Only from the edge of autumn, standing on gold with deep purple overhead, do we look out as if on unchartered distances. Only here are we touched with the feeling that, come autumn after autumn through a long procession of years, we may not meet this moment again, or ever find this one exquisite promontory.-The Christian Science Monitor.

It appears that the dry forces in the city of Asheville are gaining strength as the referendum draws nearer if one can go by the letters to the editor columns of the press.

No Gambling

Some people have always argued that a county or state fair cannot be successfully staged without the usual carnival attractions to bring in the crowds.

To offset this argument, we quote from the news columns of the Raleigh News and Observer:

"The 1947 edition of the Greater North Carolina State Fair came to an end at midnight last night with officials declaring attendance records were smashed.

"Despite the worst weather in 24 years-it rained every day except the last day-an estimated 300,000 Tar Heels poured through the gates to see the five-day exposition, said Dr. J. S. Dorton, Fair manager,

Featuring the final day of the event were the auto races which drew the greatest crowd cal corps, has arrived safely overever-some 20,000 who overflowed grandstand, bleachers and standing room space and took up a good part of the infield.

"The most significant thing about the fair is that all those attendance records were smashed even though there was not a single gambling joint on the midway."

Not So Peachy

It looks like troubles never end for Governor M. E. Thompson, of Georgia. Perhaps no governor in America ever had such a time getting into office as did Mr. Thompson since he had to rout Herman Talmadge from the place

And just about the time things begin to smooth over in Georgia, here comes Governor Thurmond, of South Carolina, advising the Georgian to take the words "peach state" off of Georgia license tags, forthwith. That was enough to upset the Georgia governor, yet the South Carolinian had to add to the sting by saying: "We admit that California grows more peaches than we do, but Georgianever. And furthermore, our peaches taste better than yours."

It looks very much like everything is not so peachy with the governor of Georgia.
