How to make a GERM squirm!

Hear the wail of Jerome the Germ! "Oh, for the good old days, when we slid down spoon handles and played tag in the laundry bag... when we swung our gals on corner cobwebs, and always had lots to eat and cozy places to sleep!"

"Now look at us! They dump clothes, and dishes, too, into washers before we can turn a somersault! They pop food into the refrigerator, and slam freezer doors in our faces! They yank us out of corners with vacuum cleaners! They have lamps that kill us off like mad!"

Poor Jerome really has a grievance, because cheap, dependable electricity goes a long way toward making life healthier—as well as easier and more comfortable.

No other item in your budget gives you such living value for so little money. And, in spite of the rising cost in supplying electricity to you, today's budget dollar buys twice as much electric service for the average family as it did 20 years ago. Yes, it's enough to make a germ squirm!
