Chair-Bound Veteran Builds Own Home

TELYRIA, O. (U.P.)—A 28-year-old war veteran who can move around only in a wheelchair has nearly completed construction of a four-room bungalow.

Paralyzed from the waist down by a German sniper's bullet, Robert E. Riley spurred government loans to pay contractors' fees and pitched into building his home himself.

Working from his wheelchair, Riley began to lay the foundation of the house on Oct. 1, 1946. He also put on the siding, paint and mortar as high as he could reach and installed the plumbing. Then he supervised and aided an 11-year-old cousin in doing the higher-up work. Three friends put on the shingles.

one yellow paint spot below stump height and may be removed at the purchaser's discretion. All chestnut is included in the sale whether marked or not.

It is estimated that the said designated trees will produce approximately 1,349,000 bd. feet of hardwood lumber, 251,000 bd. feet of chestnut lumber, and several hundred cords of acid wood, and many waste trees for fuel wood. Detailed estimates of the timber to be cut are on file in the Town Hall, Waynesville, N. C.

Timber to be cut is from an area of the watershed from which water is not being used, but it is to be cut and logged under the strict supervision and restrictions as required by the State Health Department for the protection of the watershed.

The right is reserved to reject any and all bids.

The successful bidder will be required to sign a written timber sale agreement which includes terms of sale, road and skid trail locations, and specifications, and other requirements regarding the logging operation. A sample sale agreement, bid forms and related information are available from the Town of Waynesville. All interested persons are invited to contact Mr. G. C. Ferguson, Town Hall, Waynesville, N. C. in regard to additional information and permission to inspect the timber.
