**Sentinels of Health**  
Don't Neglect Them!  
Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feet tired, nervous, all worn out. Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisons—body waste. Use Doan's Pills. They have had more than forty years of public approval. An endorsed the country over. Irons, on Doan's. Sold at all drug stores.
