#### Pushing Dairying

FRANK M. DAVIS, chairman of the dairying commission of Haywood, are seeking 50 more grade A dairies.

#### Dairy Commission Sets Goal To Increase Dairying In Haywood During 1949

Fifty more grade A dairies in Haywood, was the goal adopted by the dairy commission meeting here Tuesday night, as part of the community development program.

The group named Frank M. Davis, of Iron Duff, chairman, and scheduled a series of meetings for next week, as the first step towards getting the new dairies started.

"There are about 250 farms in Haywood producing manufacture type milk," Wayne Corpening, county agent said.

The price of manufacture milk is now \$3.10 per hundred pounds, as compared with \$6.40 for grade A," he pointed out.

Two farmers who sell manufacture grade milk had a net loss of \$2,100 and \$1,600, as based on Grade A sales, it was explained at the meeting, which was attended by representatives of grade A dairies, feed men, distributors, wholesalers and the health department.

F. R. Farnham, dairy specialist of State College, was also present.

Mr. Corpening said that at the community meetings next week there will be distributors to discuss the market; financial men to discuss providing the money; contractors to discuss building costs; feed men to tell of feed costs; together with Mr. Farnham.

"With these men present, we can answer any dairy question," Mr. Corpening said.

"Grade A dairies will not require more cows, but just modern and approved barns," Mr. Corpening said.

The meetings will be held as follows: Monday, at the Bethel school, at 7:30.

Tuesday, at the court house, at 7:30.

Wednesday, at the Crabtree-Iron Duff school, at 7:30.

Thursday, at the Fines Creek school, at 7:30.

Plans are being completed where Mr. Farnham, together with Mr. Corpening, will visit any farm and make a blue print of the needs for construction of a grade A dairy, it was explained.

Dairying is one of the six projects which will be carried out in this same manner under the general community development program. Other projects include forestry, poultry, beef cattle, fruits-vegetables and burley tobacco.

This was the first meeting of the group at which representatives from at least two-thirds of its members were present.

The trout are about an inch long, and under normal conditions, should be 5 to 6 inches long within a year.

The hatchery will in the near future start distributing trout that are 6 to 8 inches long to public streams. This work usually begins in March and continues through the spring.

### Official Reports Show Haywood Weather Extremely Mild

Unless you are in the fuel business you can't very well complain about the weather for January and February.

Using the official weather report of the State Test Farm for the basis of study, it was found that the average minimum for both January and February was 35. The average maximum for January was 59, and only two degrees lower for February.

During January the mercury hit freezing on 22 days, and during February only 11 days. Then most of the time it was just a degree or two below 32.

At no time in 1949 has the mercury failed to climb above freezing every day. That perhaps is a record that will stand up for a long time to come.

The coldest day of the year was the first day, when the mercury hit 12. But 10 days later the same mercury hit 32.

David Felmet, Jr., has a savings account in the bank which he adds to regularly from his earnings as a carrier boy for The Mountaineer.

David started on his route in September, and has added 22 new customers, with more in prospect.

David is 12 years old, the son of Mr. and Mrs. David Felmet, of Cherry Stret. He is in the seventh grade at Junior high, and plays the trombone in the school band.

### Ministers Ready With Petitions For Election

The Haywood Ministerial Association will ask for an election prohibiting the sale of wine and beer in Haywood just as soon as they are definitely assured there will not be a state-wide referendum on liquor.

This fact was announced yesterday by Rev. M. R. Williamson, chairman of the moral and civil welfare committee of the Association.

The Haywood ministers, together with laymen, started this project last fall, and secured names on petitions asking for the election. The formal request was held up pending action of the General Assembly on the proposed state-wide referendum. The petitions were signed by several hundred more qualified voters than are needed under the law which requires 15 per cent of those voting last November. Rev. Mr. Williamson explained.

The Ministerial association, which is headed by Rev. Russell L. Young, pastor of the First Methodist church here, had the petitions in every protestant church in the county last December. The petitions contain names from every section of the county. Rev. Mr. Williamson explained.

Rev. Mr. Williamson explained that the reason the petitions had not been presented to the Board of Elections sooner for an election, was the Ministerial Association was waiting on the outcome of the proposed state referendum bill, and did not want the county to go to the expense of two elections on the same matter.

"We have been gratified at the outcome of the many counties that have voted of ousting wine and beer. (See Election—Page 8)
