

Upper Crabtree Citizens Are Working To Pave Cemetery Road

By **HERSHELL ROGERS**
Mountaineer Correspondent

The members of the Upper Crabtree Community Development Program are working intensively to complete the various projects for the improvement of the community.

Major effort currently is being directed toward having the road to the cemetery paved either with concrete or crushed rock.

We are also campaigning to have a mailbox bearing the name of the owner set up before every home in the community.

Jack Rogers, who was elected chairman of the Upper Crabtree Program when Frank Medford resigned, presided at a business meeting last Friday night at the home of Brack James.

All the members of the organization are working enthusiastically to push the program for community progress.

Soybean Seed From Tennessee Shipped To N. C.

Many Top Hat soybean growers in Tennessee are anxious to buy foundation seed for their crop this year, says Dr. B. P. Moore, director in charge of the North Carolina Crop Improvement Association.

Dr. Moore states that producers of Certified Golden soybeans in this state recently had 275 bushels of the foundation seed shipped from Tennessee. This shipment will assist in maintaining the high quality of certified seed, he said. Golden variety was released first by the Tennessee Agricultural Experiment Station in North Carolina. It is most widely grown on the Blue, poorly drained soils of the state.

All varieties of soybean seed have been moving rather slowly so far this spring, Dr. Moore adds. Since the planting season is not far away, farmers desiring certified seed should make arrangements with their seedsmen now.

Certified soybean seed is noted for a high degree of purity. All fields producing certified seed were inspected last fall before harvest. Buyers are cautioned to accept seed only if the blue certification tags are present.

Egg Output Will Be Heavy In May

The N. C. State College Extension Service says egg production is expected to be seasonally heavy in May, and that is why eggs are at the top of U. S. Department of Agriculture's list of foods that most likely will be plentiful on southern markets during the month. Supplies not only will be good throughout May, but for the most part, prices should be reasonable.

Next to eggs, broilers and fryers will be one of the most plentiful buys on southern markets. A heavy production is being marketed now from growing areas located in the South, and shoppers can count on good supplies on markets for the next 60 days at least.

Most plentiful fresh vegetables will be carrots, cabbage, and Irish potatoes. Of the canned vegetables, buyers will find supplies of corn and peas heavier than others. The lower grade peas especially will be plentiful.

Oranges are the only fresh fruit on southern markets in sufficient quantity to be termed plentiful. The Department reports. Dried fruits on the May plentiful list are prunes and raisins.

In addition, markets in this area should be well supplied with various kinds of corn products, oatmeal, honey, processed dairy foods, dried beans and peas, peanut butter, and fish.

Nearly 527,000,000 bushels of grain and grain products were exported from the United States in the nine-month period from July, 1948, through March, 1949.

Local Men Go To USDA Meeting

Three Haywood County men left yesterday for Memphis, Tenn., where they will attend a U. S. Department of Agriculture conference on Bang's disease, the ailment that attacks cattle.

They are County Agent Wayne Corpening, George Stamey of Center Pigeon, member of the County Community Development Program's Livestock Commission and of the County Hereford Breeders Association; and G. C. Palmer, Jr., of Crabtree, who will represent the County Milk Producers Association.

Livestock raisers, dairymen and agricultural workers from throughout the South are attending the meeting.

Library Gets 763-Page Book Of Biographies

Many prominent names that figured in the news of 1948 appear in CURRENT BIOGRAPHY 1948, the 763-page volume just added to the reference collection of the Haywood County Library, Margaret Johnson, Librarian, announced.

Because much of the highlight of 1948 focused on our election, many new United States Senators and Representatives are included. Political leaders and heads of states abroad, among them Robert Schuman and Chaim Weizmann and world figures—such as Albert Schweitzer and Ralph J. Bunche—appear in this yearbook. Also featured are other persons important in the fields of science, art, literature, labor and industry, the social sciences, education and the rest of the thirty-two classifications by profession.

In some instances those whose life stories were in the 1940 or 1941 Yearbooks now out of print, such as Jawaharlal Nehru, Sir Stafford Cripps, Harold Stassen and Arthur Vandenberg, but whose added prominence warrants new sketches, are presented again in CURRENT BIOGRAPHY 1948.

Like its predecessors of the past eight years, CURRENT BIOGRAPHY 1948, WHO'S NEWS AND WHY, is a one-alphabet cumulation of articles and obituary notices that appeared in the monthly issues during the year, revised and brought up to date as of December 1948. Each sketch includes a photograph and references to additional material. Considerable research makes possible impartial and accurate biographical information, while an informal style adds readability.

A nine-year index, covering 1940 through 1948, includes the names of all those whose biographies or obituaries have appeared in CURRENT BIOGRAPHY from its beginning in January 1940 through the issue of December 1948.

Good Driving Plus
RUIDOSO, N. M. (UP)—Louis Vick, who has driven a school bus longer than anyone else in New Mexico, sports a record of 240,480 miles without a scratch on his bus. In 19 years of driving school buses, Vick has worn out seven vehicles but hasn't nicked a fender.

Menus For The Kids Sweet Potato Custard Will Please Youngsters

DOLL TEA PARTY . . . Liver spread on toasted bread

By **CECILY BROWNSTONE**

Associated Press Food Editor

To help celebrate National Baby Week in your own household—this year from April 30th to May 7th—we've chosen some special recipes that you can serve to your youngster.

Place of resistance of the meal is a Sweet Potato Custard full of vitamin A and made in record time with strained sweet potatoes—a new baby food. It is easy to prepare the custard on the top of the range—a method that takes only 5 to 7 minutes. The individual, orange-flavored custard will be tempting and delicately puffed, even though it lacks some of the smooth consistency of a custard baked in a slow oven for a much longer period of time. With a serving of junior meat and another vegetable, milk and fruit, you'll have a well-rounded meal for an active toddler.

5-MINUTE SWEET POTATO

CUSTARD

Ingredients: 1 four-and-one-half ounce can strained sweet potatoes, 1 egg (slightly beaten), 2 tablespoons orange juice, 1/2 teaspoon sugar.

Method: Combine all ingredients. Pour into buttered custard cups placed in a pan partly filled with gently boiling water. Be sure that the water does not boil vigorously. Cover snugly and cook 5 to 7 minutes, or until a knife inserted in the custard will come out clean. Makes 2 medium-size custards.

Just to delight your youngster give her a tea-party dinner once in a while. Serve nutritious liver-cottage-cheese spread. An individual serving of about three-eighths cup of the spread provides more than one-half of the recommended daily allowance for protein and more than one-third of the daily iron allowance for children from one to

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The art of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all such signs.

Frequent, scanty or burning passages are some of the further evidence of kidney or bladder disturbance.

The recognized and proper treatment is Doan's Backache Kidney Pills. They have had more than thirty years of public approval. Are endorsed by the county, state, and national medical associations. Sold at all drug stores.

Clinics Continue For Pre-School County Children

The clinics for pre-school children throughout Haywood County will continue through next month, Dr. Mary Michal, district health officer, has announced.

Dr. Michal explained that these examinations also are for an enrollment record, which becomes part of the cumulative school record of each child.

Dr. Michal urged parents of pre-school children to have these physical examinations made each spring.

Such checkups are urged as a means of assuring that the child will be ready physically for school enrollment in the fall.

The pre-school examination clinic schedule is as follows:

- May 4: East Waynesville, 1 p.m.
- May 9: Maggie, 9 a.m.; Rock Hill 11 a.m.; Junaluska, 1 p.m.
- May 11: Clyde, 1 p.m.
- May 16: Patton, 1 p.m.
- May 17: Penn Avenue, 1 p.m.

Cove Creek Man Graduates From Army School

Pfc. William Y. Conard, serving with the Fifth Field Artillery Battalion in Germany, completed a course in supply this month at the U. S. Army's Quartermaster School Center, at Darmstadt.

He left his truck driving job to enlist in the Army at Waynesville in 1944—the third anniversary of the Jap attack on Pearl Harbor, and served for two years in the Philippines.

In the supply course, the 22-year-old Haywood County man studied unit supply proceedings for four weeks. The schooling qualifies him to work as a supply clerk or a supply sergeant.

IN NEW YORK to appear on a radio show, 101-year-old Henry Roe smiles after completing his first ride in a plane. The centenarian, married five times, says he hopes to wed again. (International)

Within Next Five Years U. S. To Spend Millions On Tennessee Gho

By **WILLIAM J. FOX**

United Press Staff Correspondent
NEW JOHNSONVILLE, Tenn. (UP)—This is a semi-ghost town. It's not on the maps. Yet the federal government will spend \$4,000,000 here within the next five years.

The answer is simple. New Johnsonville is the site of the planned Tennessee Valley Authority's controversial steam generating plant.

Located on the west bank of the Tennessee River, this little hamlet is scarcely a community today. But with the impact of new millions, it is all set to become a roaring boom town.

Congress okayed the steam plant amid cries of "Socialism" from private power groups.

An initial \$2,500,000 will get work started on the plant. Divided principally on party lines, the Republicans protested that the steam unit would foster socialistic trends in the federal government. Democrats countered that it is needed to make up for power shortages in the area.

1952 Goal Set
Ultimately to cost about \$54,000,000, the plant is expected to increase the TVA system's steam capacity by 375,000 kilowatts and speed an expansion of its hydroelectric facilities. TVA hopes to have it finished and in operation by 1952.

Looking at the rather desolate stretch of land in this West Tennessee region where so many millions will be expended, it's hard to visualize the future.

Actually, there is no "new" or "old" Johnsonville—just Johnsonville. Man and nature combined in the past to lift up an entire community and move it from one place to another. Hence the "old" and the "new."

The old town originally was located four miles farther down the river, close to the spot where Gen.
