

Ranch Knows Water Is

Clyde Vacation Bible School Starts Today

A community Vacation Bible School, combining faculty and students from both the Methodist and Baptist Churches in Clyde, opened in the Clyde Baptist Church today at 8:30 a. m. Mrs. Howard Shook of Clyde will serve as Superintendent of the school.

Preparation Day for the school will be observed Friday, June 3rd. At 2:00 p. m. Friday faculty and students will meet at the Baptist Church. Students will be registered and other preparations will be made for the opening of the school Monday.

Clyde Chief To Stay Till After Tuesday Election

Shay Henson indicated last week he would remain in his post as Clyde police chief until after the town election tomorrow.

Chief Henson has said he would file his resignation to become a Portland, Ore., city policeman.

Mrs. Joyce Haynes, town clerk, quoted the officer as saying he had been asked to stay in office until after the voting.

Mr. Henson has been Clyde chief for the last 28 months. He once served as constable for the four townships around Clyde and as a deputy sheriff.

He said he planned to leave Clyde on June 15 for his new position on the West Coast.

They are Harder and Grow Heavier on Grass Feeding than any Other Breed

The ranch also developed its own strain of quarter-horses for its expert Vaqueros (cowboys) to ride and experimented many years to perfect strains of grasses for its fine livestock.

Commenting on the livestock price decline, Dr. Northway said: "We are on a production basis. We breed, raise and market cattle. The fellows caught by the decline are the ones who buy high-priced cattle to fatten and buy high-priced feed to fatten them on. A fat cow is just as perishable as a ripe peach. When she's ready—and the man who paid too much for the cow and her feed loses money when the livestock market drops."

And, too, the King Ranch has varied its interests. It does no farming but it has 400 oil wells.

YS

...the new equipment, the scientists point out, permits the subject to be examined under almost any exercise or work conditions, which never before was possible. Of course, the cables can be attached to a regular recording machine in case no long-distance diagnosis is desired.

POLIO VICTIM SMILES BRAVELY

IN AN IRON LUNG at the Los Angeles General Hospital, Mrs. Marion Kopytko, 30, manages to smile although she is critically ill of infantile paralysis. Her husband, Chief Storekeeper William Kopytko, left Guam by Navy plane to be at her side. With Mrs. Kopytko, mother of two small children, is Nurse G. Bunker. (International Soundphoto)

Air Force Device Helps Diagnose Heart Ailments

By PAUL F. ELLIS
United Press Science Editor
NEW YORK (U.P.)—Perhaps your doctor thinks something may be wrong with your heart. However, he is not sure. He wants the advice of a specialist many miles away.

So he picks up the telephone and puts in a long distance call. He gets the specialist on the other end of the line. Then your heart beats are sent over the long distance lines.

Result: a correct diagnosis with proper treatment prescribed.

Fantastic procedure. Not at all. It may become routine procedure, thanks to a development at the U. S. Air Force school of aviation medicine at Randolph Field, Tex.

"Brain Waves" Sent
The development is the creation of miniature devices capable of picking up the extremely faint "brain waves" and "heart waves," transmitting them over telephone lines and then the recording and interpretation by specialists.

The technique of measuring heart or brain waves is not new. The science is known as electroencephalography. It has required the use of a large, bulky machine and the patient necessarily has

been enclosed in a room alone, and in a room where outside electrical interference would not spoil the examination. Furthermore, such machinery has been expensive and only the most elaborately equipped hospitals have it.

At Randolph Field, however, the scientists have perfected a cheap, miniature device. It is so handy that tests of a patient in motion can be taken. With the bulky machine, the patient must be lying down.

How It Works
The conventional electroencephalograph, the Randolph scientist pointed out, is built in three stages. Electrodes, fitted to the head, lead into a pre-amplifier which slightly builds up the 10 to 50 millionths of a volt wave given off by the brain. The impulse, in turn goes through a second amplifier which increases the effect enough to be recorded.

The scientists further explain that most outside interference, such as from power lines and radio transmitters, comes in the first stage between electrodes and pre-amplifier.

The Randolph equipment, however, incorporates the pre-amplifiers directly into the electrodes, eliminating the major area of disturbance. Wires lead from these pre-amplifier electrodes to a small power amplifier measuring only 37 cubic inches. Attached to that, small caps can be fitted to a standard hand phone.

Candidates Screened
The new devices are expected to have civilian application but right now they are being used to examine and screen candidates for the Air Force. The Randolph scientists say that if past history is falsified, epileptics now cannot be eliminated unless a seizure takes place during examination. They point out that epileptics have passed physical tests only to become potential dangers to themselves and others, once they were behind the controls of a plane.

It was explained that full-scale electroencephalographs cannot be installed in every examination center. But with the new equipment, readings from dozens of

examination centers can be relayed by telephone wires to a central station.

Such will allow comprehensive coverage and standardized interpretation.

The preliminary checks also will serve another purpose. That is the detection of hidden, or lingering concussions—the result of an accident.

Each year there are at least two eclipses of the sun, which occur when the shadow of the moon falls on the earth. There may be as many as five in a single year.

Farm Prices Down But Costs Still Same

Although prices received by farmers for their farm products have been going down in recent months, they still average higher than prices paid. But the prices farmers pay for labor and materials used in production, except for some farm-produced commodities like feed, have shown little sign of a downturn as yet.

Prices farmers received in mid-December averaged the lowest since February 1947, or 13 per cent below the record high reached last January. Prices paid by farmers averaged 1.6 per cent below the record high of last January, June, July and August.

According to W. I. Turner, N. C. State college farm management specialist, the adoption of more efficient farming practices, selecting crops fitted to the land and feed needs, a good balance between crops and livestock, and a good balance between the various classes of livestock depending upon available feed, labor and markets, will help the farmer to face the price-cost squeeze. Also the use of good production and management practices have proven very valuable to farmers.

By balancing farming operations now, the farmer will be in a better position to face any price-cost squeeze which may occur and at the same time obtain a better living for his family.

Bible School Starts At First Baptist Church

Vacation Bible School classes started today at the First Baptist Church of Waynesville following a weekend of preparation and registration.

Enrolled in the school, which will be held until noon Friday, are children ranging in age from 4 to 16.

The school will close Friday, June 10, at noon.

Commencement exercises are scheduled for Sunday night, June 12.

Miss Hattie Siler Freeman will serve as principal, and a large group of adult workers will assist her in taking care of what promises to be the largest enrollment in the history of the church.

Expert Tells What Marriage Requires
CHICAGO (U.P.)—Mrs. Emily B. H. Mudd, director of the Philadelphia Marriage Council, listed for National Parent-Teacher magazine these requirements for a successful marriage:

1. The ability to obtain and hold a job that provides enough income to support a home and children.
2. Knowledge of how to maintain a comfortable home and repair usual household equipment.
3. Knowledge of cooking, balanced diets.
4. Ability to budget income and knowledge of what is necessary for financial protection and security.
5. Knowledge of health.
6. Knowledge of sexual needs and behavior.
7. Some knowledge of child care and what planning for a baby involves.

Such will allow comprehensive coverage and standardized interpretation.

The preliminary checks also will serve another purpose. That is the detection of hidden, or lingering concussions—the result of an accident.

CHINA REDS MARCH TO THE SEA

DRIVING TOWARD HANGCHOW (1), Chinese Communist armies are reported driving a wedge (arrow) from Nanking to the sea to trap an estimated 300,000 Nationalists below Shanghai (2). The Reds took Kunshan, 30 miles from Shanghai, cutting the vital rail line and also Kueiching, on the rail line to the southwest. (Central Press)

FORRESTAL WIDOW BACK IN U. S.

WIDOW OF THE FORMER Defense Secretary, Mrs. James V. Forrestal (dark glasses) arrives at Washington from Paris in the President's personal plane. She is followed by Brig. Gen. Robert B. Landry, Air Force aide to President Truman.

Defender of Sister Routs Bandits Who Get Rough

CHICAGO (U.P.)—Joseph P. Lewis, 40, quietly obeyed the commands of four bandits who entered his real estate office until one of them grabbed his sister, Irene, 22. Then Lewis got mad. He hurled the office seal, which missed one of the gunmen and crashed through the glass panel of the door. Next, he grappled with the bandit holding his sister.

In the struggle a shot was fired into the ceiling. It so frightened the holdup men that they fled without taking the \$500 in the office safe.

Garrett Starts Furniture Auction This Afternoon

Garrett Furniture Company started a store-wide auction sale today, with two sales daily for a week.

The store is advertising that \$50,000 worth of furniture will be offered for sale at auction because the store is over-stocked.

Sales will be held at 2:30 and 7:30 daily with an unusual number of prices offered at each sale.

Plans have been completed for taking care of a large number of people, and more than 300 chairs have been provided.

L. M. Sweet and son will have charge of the sale. They are well known furniture auctioneers, and have been in the business for 20 years. They have many friends in this area.

Laziest Driver Blinks Lights for Service
LAWRENCE, Kan. (U.P.)—Sheriff Will Johns has a candidate for laziest man.

Deputies investigated a report that a motor car operator was blinking his lights to attract attention on a highway near here.

They found the motorist parked at the side of the road with a flat tire. The "laziest" driver explained: he wasn't enthusiastic about the bike to a nearby service station for help so he blinked the lights to get a passing motorist to stop.

Sentinels of Health
Don't Neglect Them!
Nature drags the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The art of living "life itself" is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisons, the body waste. Use **Doan's Pills**. They have had more than forty years of public approval. Are endorsed the country over. Insist on **Doan's**. Sold at all drug stores.

DOAN'S PILLS

When a Kitchen is Practical and Pretty
...of course, it's electric!

An All-Electric Kitchen is practical because you base your plans on an Electric Range, Electric Refrigerator, Electric Dishwasher and plenty of electric outlets. Around these appliances you build your "Electric Time-Saving Centers." This equipment does much of your work for you automatically. And your All-Electric Kitchen is pretty, because there's practically no limit to what you can do decoration-wise, due to the cleanliness of this equipment in appearance and operation. Yes, an All-Electric Kitchen is both practical and pretty!

AN all-electric KITCHEN includes:

- Cooking Center.** The Electric Range automatically provides the exact cooking temperature needed. Surrounding work surfaces and storage cabinets keep cooking utensils and food supplies within arm's reach.
- Dishwashing Center.** Ample work space for stacking used dishes and cooking utensils. The Electric Dishwasher handles not only dishes and silver, but pots and pans as well, and dries them without wiping.
- Refrigeration Center.** The Electric Refrigerator provides ample food storage, and large freezing capacity. Adjacent work surfaces provide space for food preparation.
