### Payments To N. C. Unemployed 3 Times That Of '48

RALEIGH—Almost three times as much was paid to unemployed eligible workers in North Carolina in the first half of 1949 than was paid in the first six months of 1948 in the regular U.C. program of the Employment Security Commission of North Carolina, it is revealed by a report of Chairman Henry E. Lemall.

Under this program unemployed workers received \$2,048,137 in benefits, in compensation for 714,300 weeks, or part weeks, of unemployment, in the Jan.-June period of 1949, in contrast to the \$3,094,144 in benefits, compensation for 293,701 weeks of unemployment during the first six months of 1948. In fact, for the entire year of 1948, benefits amounted to only \$6,619,763 for 611,628 weeks of unemployment, against slightly more than \$9,000,000 for almost 710,000 weeks of unemployment in the past six months.

During its 15 years of operation the Federal Housing Administration has insured more than \$16 billion in loans for buildings and improvements.

### Wool Pool To Be Held In Haywood County This Year

County Agent Wayne Corpening in a recent letter advised all Haywood County sheep raisers arrangements have been made to have a wool pool this year for the county.

He announced the producers can bring their wool to the Haywood County Farmers Cooperative any time until Wednesday.

To get the most from their product, he advised the raisers to follow these recommendations in preparing it for the market:

1. Have shearing equipment in good order well ahead of shearing time. For repairs send equipment to factory. Also send old combs and cutters to factory for sharpening. For new equipment, see your local dealer.
2. Never shear when wool is wet. If wool gets damp spread it out to dry before bagging it.
3. Shear on clean floor and avoid getting straw, manure or trash of any kind in the wool.
4. Avoid second cuts. Cut close and keep fleece unbroken.
5. Tie each fleece with paper twine in a circle. There will be a discount of 2 cents per pound on all wool not tied with paper twine, and when tied or banded twine is used 10 cents per pound will be deducted. Baling wire should never be used.
6. Take all tags, along with the fleece, back to the factory together with sweepings in a separate bag.
7. Pack black, dirty, dead, cottoned wool or reject of any kind in separate bag, properly marked.
8. Keep fine or half blood wool from western sheep, and lands wool separate from medium grade wool.
9. Store wool in dry place, never in wet basement, on ground or cement floor.

SELLER MUST BEWARE—TUSCOLOA III 41 P. M. and Mrs. Loui. Carter filed a suit for \$10,000 for injuries and moon sentences they say they suffered when a man fell off a tavern stool and knocked Mr. Carter down. Under Illinois dram shop act, owners of taverns serving a person who become intoxicated are liable for damage he may do while drunk.

The earth's population in 1940 was over two billion, or more than double that in 1800.
