Highways Shine

BOSTON (U.P.)—Millions of tiny beads have been sprayed with bullet-like force into 3,000 miles of state highways to make center white lines more vivid at night. The project consumed 40,000 gallons of white paint and 240,000 pounds of glass beads.

Plans To Dissolve A&P To Be Fought By Management

Describing the suit to dissolve the Great Atlantic & Pacific Tea Company as a threat to the welfare and living standards of every American citizen, officials of the company announced today they would oppose it with every legitimate means. The suit filed in the federal court for the southern district of New York asked the courts to dispose of its manufacturing and processing facilities and to break up the company into smaller chains.

This action is a threat to the welfare and living standards of every American citizen. If successful—it will mean less food on every dinner table and fewer dollars in every pay envelope. This is not just an effort to destroy A&P but an attack on the entire system of efficient low-cost—low-profit mass distribution which this company pioneered.

A&P was the first chain store in this country and the methods we developed have been adopted by other grocers as well as merchants in other lines. There are today literally hundreds of chain stores and voluntary groups of individual merchants operating with the same methods and in the same pattern here under attack.

If the Anti-Trust lawyers succeed in destroying A&P—the way will be cleared for the destruction of every other efficient large scale distributor.

There is nothing even approaching monopoly here—for as every housewife knows—the retail grocery business is the most competitive in the country and we do only a small part of it. Nor was there ever any charge that we raised prices—for the whole basis of this attack is the fact that we sold good food too cheap. There is nothing in our operations—or in any previous court decisions involving us—or in the Anti-Trust laws themselves to justify the dissolution of A&P.

Obviously—it is the theory of the Anti-Trust lawyers that the People of America have no right to patronize a company if their patronage will make that company grow—and that any big business must be destroyed simply because it is big—and even if the public gets hurt in the process.

This action is just opposite to the purpose of the Anti-Trust laws—which were meant to increase competition and keep prices down—for if it succeeds—it will serve only to cut down competition and force prices up. A&P's policy always maintained and kept alive the spirit of competition.

Frankly—the owners of A&P could make enormous amounts of money by breaking up this company—as the Anti-Trust lawyers wish—and selling off the parts.

But we believe this attack is a threat to millions of consumers who rely on us for quality foods at low prices—to hundreds of thousands of farmers who rely on us for fast—low-cost distribution of their products—and to our 110,000 loyal employees.

There has never been any question in our mind that it is good business and good citizenship to sell good food as cheaply as possible and we feel that it is our responsibility to our customers—our suppliers and our employees to defend this company and that theory by every legitimate means.

MORE ABOUT Justice

(Continued from Page 3)

High School in Asheville. Joe and Jack, who started the brilliant Justice record that's become almost a legend, "just got interested" in football while they were watching the Lee Edwards squad practice shortly after they started school.

As Jack put it recently, it seemed to come "just naturally." Both made the Maroon Devils' first team shortly after they put on football uniforms for the first time in their lives.

Joe, who also starred in two other sports during his undergraduate days in college, started his coaching career in 1940 as an assistant at Winter Haven, Fla., High School.

The next season, he went back to his alma mater to coach the Rollins freshman gridlers, and was named head coach at Tampa University in 1942.

But before the football season opened, he was inducted into the Navy and, after his discharge three years later, was named assistant coach at Rollins.

He was promoted head coach within a few hours after Jack McDowall, former North Carolina State College football star, resigned because of ill health.

McDowall, named to the All-Southern while playing at State, coached Rollins to 84 victories in 127 games. His teams tied seven others and lost 36 in his 20 years at Rollins.

Rollins College officials said his resignation was accepted "reluctantly."

After graduating from State, McDowall coached one season at Lee Edwards before starting his brilliant career at Rollins.
