### State College Hints To Farm Homemakers

By Ruth Current  
State Home Demonstration Agent

Musty basement odors, common in wet weather, may be whisked away with a spray of weak formaldehyde solution.

For a flourishing "crop" of mold in the basement, a pound of formaldehyde should be used to 1 1/4 gallons of water. The garden sprayer or sprinkling can may be used. If there are musty odors only, a weaker solution may suffice. A small amount may be used in water for wall washing or floor scrubbing, for instance.

Smelly garbage cans, sinks, pantries, and attics also can be deodorized with the formaldehyde solution. The chemical can be purchased at drug stores, and at seed stores in certain sections of the country where it is used as a seed disinfectant.

The space treated with formaldehyde should be thoroughly aired before occupancy. Rubber gloves should be worn if the hands are to come in contact with the solution, to avoid skin irritation. Spills on the skin should be washed off at once. Used in dilute solution, however, the chemical does not injure textiles, household utensils, etc. Do follow directions.

If your silver needs polishing, here's a way you can make your own silver polish. Dissolve four tablespoonsful of neutral soap flakes in one pint of hot water. Then stir in one-fourth pound of whitening and two teaspoons of ammonia.

Store this polish in labeled jars with tight covers. To use, apply it to the silver with a soft cloth, allow it to dry and then rub off with a clean cloth. After that wash and thoroughly dry the silver.

### It Wasn't the Ten Cents; Just Principle of Thing

OMAHA, Neb. (U.P.)—A cab driver took an elderly woman from her home to a church. The meter showed 45 cents.

"Young man," said the woman, "I come here every day and it always cost me just 35 cents."

The driver explained his meter might be "fast" and told her she could get a 10-cent refund at the company office if it was.

Still complaining, the woman got out of the cab, then tipped the driver 20 cents.
