**HALLOWE'EN GOODIES**

PUMPKIN PARTY . . . Halloween icings for cupcakes.

By CECILY BROWNSTONE  
 Associated Press Food Editor

Make a batch of cupcakes for Halloween and let the kids in your family have the fun of decorating them. You'll like the following recipe because the condensed tomato soup in it gives a delicious flavor and helps the cakes keep moist.

**HALLOWE'EN TOMATO SOUP CUPCAKES**

Ingredients: 2 cups sifted cake flour, 3 teaspoons baking powder, 1/2 teaspoon baking soda, 1/2 teaspoon cloves, 1/2 teaspoon mace, 1/2 teaspoon nutmeg, 1 cup seedless raisins, 1/2 cup shortening, 1 cup sugar, 2 eggs, 1 ten-and-one-half-ounce can condensed tomato soup.

Method: Mix and sift flour, baking powder, baking soda, cloves, mace, and nutmeg. Wash raisins under hot running water and drain well; chop with a knife. Cream shortening, add sugar gradually and continue to cream thoroughly. If electric mixer is used beat in the eggs well, one at a time; if not beat the eggs well first with a rotary beater and then beat in well with mixing spoon. Add the flour mixture in four additions, alternately with the soup; begin and end with the flour and mix only until well combined each time. Fold in the raisins. Turn into fluted paper baking cups that have been placed in muffin pans of matching size. Bake in a moderate (375° F.) oven for about 15 or 20 minutes or until done (depending on size). Remove from pans and place on cake racks to cool thoroughly before frosting.

**HALLOWE'EN FROSTING**

Ingredients: 1/4 cup butter or margarine, dash of salt, 2 cups sifted confectioners' sugar, 4 tablespoons (about) cream or milk, 1/2 teaspoon vanilla, orange food coloring, 2 squares (2 ounces) unsweetened chocolate (melted).

Method: Cream butter or margarine and salt. Add sugar and milk alternately until proper consistency to spread. Add vanilla. Divide frosting in half; add orange food coloring to one part, chocolate to the other.

**EASY HALLOWE'EN CUPCAKE DECORATIONS**

To make decorations the kids will love try these: For chocolate pumpkins and witches' cats, form round balls of chocolate frosting, flatten in palms of hands, and shape. For eyes, nose, mouth, and pumpkin stems use bits of jellied candy, cloves, chocolate bits, slices of maraschino cherries, and corn candy. A fence for the cat may be cut from a long jellied licorice candy.

For small pumpkin faces use round flat orange jelly candies; cut in half crosswise to make pumpkin faces a shiny orange.

**Care Needed When Packing Summer Clothes**

By RUTH CURRENT  
 State Home Demonstration Agent

Memo for packing away spring and summer clothes: Keep a pad and pencil in your apron pocket when you are packing away summer clothes. Jot down as you work what you put away and where. You will save time, trouble, and confusion next spring.

Systematic housekeepers post on attic or closet doors a list of articles stored in bags, boxes, or certain closets. Some also label each trunk, box, and bag with its contents. Any device which helps the housekeeper and her family know where possessions are at a moment's notice makes for good home management.

A tested recipe for pecan pie: Pecan pie will appear on dinner tables the country over this fall and early winter when pecans will be in good supply on markets, especially in sections of the State where pecans are grown.

Here is a tested pecan recipe from food specialists: Ingredients: 1 cup pecan kernels; 3 eggs; 1/2 cup melted table fat. To make: Beat the eggs, add sugar and sirup, then salt and vanilla, and last the melted fat. Place the pecans in the bottom of an unbaked pie crust. Add the filling and bake slowly in a moderate oven (350° F.) for 50 to 60 minutes. The nuts will rise to the top of the pie filling and form a crusted layer.

When not being worn, gloves should not be folded up into a ball and crammed into a purse or pocket. They should be smoothed out and folded, not in half, but at the base of the fingers. This will keep the creases away from the body of the glove and help prevent cracking of the leather in the palm or over the back of the hand.

**ODOR LINGERS**

FORT WORTH, Tex. (UP)—Police couldn't stand the smell of one prisoner, so they released him from jail upon his promise to appear in court for trial on a peace disturbance charge. The man had been working for a feather firm, clean-up feathers inundated in a spring flood. The odor from the feathers lingered on his clothing and smelled up the entire jail.

New Patient: "Shake hands, I'm cheezy."  
 Old Patient: "So—so. I'm aching from lumbago."  
 New Patient: "Shake hands, 'n Middleton from Humbolt."

**Experiments Show Tomatoes Can Grow In Haywood**

D. E. Ellis, associate plant pathologist for the North Carolina Agricultural Experiment Station, reported this week that tests at the Mills River Fruit and Vegetable Laboratory near Hendersonville "demonstrate conclusively that, despite severe outbreaks of late blight, tomatoes can be grown successfully in Western North Carolina."

A severe epidemic of late blight occurred during the past summer, Ellis said, but tomato plots dusted with tri-basic copper were still producing good fruit in mid-October, whereas non-dusted plants were killed by the late blight fungus in early August and produced practically no disease-free fruit during the entire season. Frost, rather than blight fungus, will be responsible for killing the vines on dusted plots, he added.

The tests are being conducted by C. E. Lewis, supervisor of the Mills River Laboratory, in cooperation with Ellis. This year's results, similar to those obtained in 1948, show that tri-basic copper sulphate dust containing 7 per cent metallic copper is one of the best and least expensive fungicides for controlling the late blight disease.

Two other fungicides, Dithane Z-78 and Parzate, also showed considerable promise in the 1949 tests, Ellis said.

Recommendations for controlling late blight are given in Extension Circular No. 331, copies of which may be obtained from county farm agents or from the Agricultural Editor, State College Station, Raleigh. There is no charge.

**83% Of Farms In State Electrified**

RALEIGH — Electrification of farms in North Carolina took a substantial upswing in 1948-49, resulting in this state for the first time topping the national percentage of electrified farms, according to data received here from the U.S. Department of Agriculture.

North Carolina's percentage of farms with electricity jumped from 68.3 on June 30, 1948, to 83.6 on June 30, 1949. In the entire U.S. only 78.2 per cent of the farms are electrified. Nineteen of the states are below the U.S. average, and 23 states top North Carolina's standing.
