PITY THE LORDLY MINK: COAT GETTING THINNER

CHICAGO (UP)—Getting a good mink coat is a problem sometimes even for a mink, according to the American Veterinary Medical Association.

Mink ranchers and veterinarians have been reporting heavy losses from a mink disease called steatitis, the association said.

The disease causes normal tissues to be replaced by fat in various parts of the body. Many young mink die from the ailment, while survivors usually are left with inferior coats.

Colorful Comfort

Wool and camels hair coat.

By VERA WINSTON

CAMELS HAIR combined with wool adds up to cozy warmth and light weight, so important for cool weather wear. Not just the plain old camels hair brown, navy or black are used for the newest cuts of the fabric, but instead there are lovely shades of blue, green or red. Soft dull blue is used for this camels hair and wool mixture fitted top coat smartly buttoned to the waist below a convertible collar. Buttoned down flaps point up the pockets which are cut in one with the panels at either side. A further detail is the flat seaming which continues way up the sides of the bodice to form shoulder seams. A brown self belt slips through fabric loops, making for a coat of colorful comfort.
