Sergeant Explains Army Life

By SGT. 1/c HENRY B. ALLEN U. S. Army Recruiting Service
"How long do I sign up for?" is one of the first questions asked by the man enlisting in the Army or Air Force.
Enlistments are authorized in the Regular Army only for two, three, four, five, or six years at the option of the individual enlistee. Two year enlistments are restricted to men with no previous service in the Regular Army or Air Force. That is, no applicant with prior service in the Regular Army or Air Force is eligible for a two year enlistment.
In addition to the above, enlistments are authorized in the Regular Army only for 21 months for men who are 19 years of age, but who have not reached their 24th birthday, and who have not heretofore served for more than one year in the armed forces prior to June 24, 1948, or more than 99 days between December 7, 1941 and September 12, 1945, or more than three years at any time.
Applicants with no prior service applicants with prior service in the Army, Navy, Marine Corps and Coast Guard, and applicants with prior service in the Air Force who have been discharged more than 30 days are authorized to enlist in the Air Force for four, five, or six years at the option of the individual enlistee. Armeren who enlist in the Air Force within 30 days from date of discharge from the Air Force may reenlist for three, four, five, or six years.

Biding His Time

CLUTCHING a bag of groceries, coal miner Mike Krasovsky, 65, of Pittsburgh registers an emphatic "I don't know," when asked "when do you think the coal strike will end?" Mike's unusually luxurious beard is a throwback to the days when he was a member of the White Russian Army in 1905. (International)

This Film Very Fishy Business

HOLLYWOOD (UP)—If the current seven days haven't already been spoken for by equally worthy causes, they should be designated "Feel Sorry for Claudette Colbert Week."
That long-suffering comedy star has, according to RKO studio, been driven to the extremes of her endurance. And by a storage bin full of fish, 200 dead, finny, smelly pounds of them.
"This is just about it," she says. "Now I've done everything."
It seems that the script of "Love Is Big Business" calls for her to give a pitch hold on Robert Young and toss him among the potted fish.
Maude Baer—he's in the movie too—then throws the highly-paid Miss C in after Young.
Baer himself follows the stars into the seamy mess, though RKO isn't specific about how or why.
Must Be Comedy
Just what the slapstick is all about also is left unexplained, but the producers hint the picture is a comedy. And Claudette never was a fish to hang back when a laugh is at stake.
This anything-for-a-guffaw comedienne recalls that she pitched into Fred MacMurray while standing waist deep in mud for "No Time for Love". In "The Egg and I" she chased pigs through the mire. A baby leopard shared her throne in "Cleopatra," and she accidentally knocked her self out while working on "So Proudly We Hail."
"Lloyd Lloyd would be about the only star," she laments, "who could shed an understanding tear with me about my troubles."
"Some time, I'm not sure if I'm not getting paid as a stunt woman instead of an actress."
The studio reports, however, that Miss Colbert has settled that question to her own satisfaction.

The burner's the heart of any heater...
Only DUO-THERM gives you this Amazing Burner!

No fuel oil heater can be better than its burner. That's why Duo-Therm builds a heater from the burner out—designs the complete heater around the burner itself. And what a burner!
It gives more heat from every drop of oil! That's because its exclusive full-bodied, mushroom type flame hugs the side of the heat chamber, transfers more heat to the home quickly.
It burns a clean, efficient flame from lowest to highest fire! That's because air is injected in 6 stages (a Duo-Therm exclusive) to give proper balance between air and oil for perfect combustion and clean performance from low pilot setting to highest flame.
It's absolutely noiseless! No moving or mechanical parts, nothing to wear out. And low velocity air intake produces a gentle diffusion of combustion air. You feel the heat—you never hear it.
